

John Hancock Floating Rate Income Fund

A: JFIAX C: JFIGX I: JFIIX R6: JFIRX

Seeks: A high level of current income
Use for: High current income and reducing interest-rate risk

Morningstar category: Bank Loan
Lipper category: Loan Participation Funds

High income potential

Uses rigorous fundamental research to generate income through investments in senior floating-rate bank loans

Interest-rate hedge

Coupon payments on bank loans "float" above prevailing rates, so exposure to the asset class can help reduce a portfolio's rate sensitivity

Diversification potential

The asset class's historical return pattern has differed from those of stocks and traditional bonds, a key to creating diversification

GROWTH OF A HYPOTHETICAL \$10,000 INVESTMENT

Class I without sales charge—1/2/08 to 6/30/17

The past performance shown here reflects reinvested distributions and the beneficial effect of any expense reductions, and does not guarantee future results. Returns for periods shorter than one year are cumulative, and results for other share classes will vary. Shares will fluctuate in value and, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance cited. For the most recent month-end performance, visit jhinvestments.com.

¹ Ratings are from Moody's, Standard & Poor's, or Fitch, and the composition may change. "Short-Term Investments & Other," if applicable, may include fund receivables, payables, and certain derivatives.

² Excludes any negative exposures that may result from the use of futures or forward contracts.

³ The S&P/LSTA Performing Loan Index tracks the performance of below-investment-grade and unrated securities in the United States' leveraged loan market, excluding those issuers in default. It is not possible to invest directly in an index.

WHAT YOU SHOULD KNOW BEFORE INVESTING

Fixed-income investments are subject to interest-rate and credit risk; their value will normally decline as interest rates rise or if an issuer is unable or unwilling to make principal or interest payments. Investments in higher-yielding, lower-rated securities include a higher risk of default. Liquidity—the extent to which a security may be sold or a derivative position closed without negatively affecting its market value, if at all—may be impaired by reduced trading volume, heightened volatility, rising interest rates, and other market conditions. Foreign investing, especially in emerging markets, has additional risks, such as currency and market volatility and political and social instability. A portfolio concentrated in one sector or that holds a limited number of securities may fluctuate more than a diversified portfolio. Fund distributions generally depend on income from underlying investments and may vary or cease altogether in the future. Please see the fund’s prospectus for additional risks.

Request a prospectus or summary prospectus from your financial advisor, by visiting jhinvestments.com, or by calling us at 800-225-5291. The prospectus includes investment objectives, risks, fees, expenses, and other information that you should consider carefully before investing.

Unless noted, data from Morningstar, Inc. is based on Class I shares for the five-year period ended 6/30/17.

4 Listed holdings are a portion of the fund’s total and may change at any time. They are not recommendations to buy or sell any security. Data is expressed as a percentage of net assets and excludes cash and cash equivalents.
5 The portfolio turnover is as of the fund’s fiscal year end and is subject to change. The fund’s annual report includes further details regarding the portfolio turnover ratio.
6 Upside capture ratio measures a manager’s performance in up markets relative to the market itself. Downside capture ratio measures a manager’s performance in down markets relative to the market itself.
7 Unsubsidized yield reflects what the yield would have been without the effect of reimbursements and waivers.
