The performance data shown represents past performance, which does not guarantee future results. Returns for periods shorter than one year are cumulative. Shares will fluctuate in value and, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance cited. Performance figures assume that all distributions are reinvested. For the most recent month-end performance, visit [jhinvestments.com](http://jhinvestments.com).

**Growth of a hypothetical \$10,000 investment**

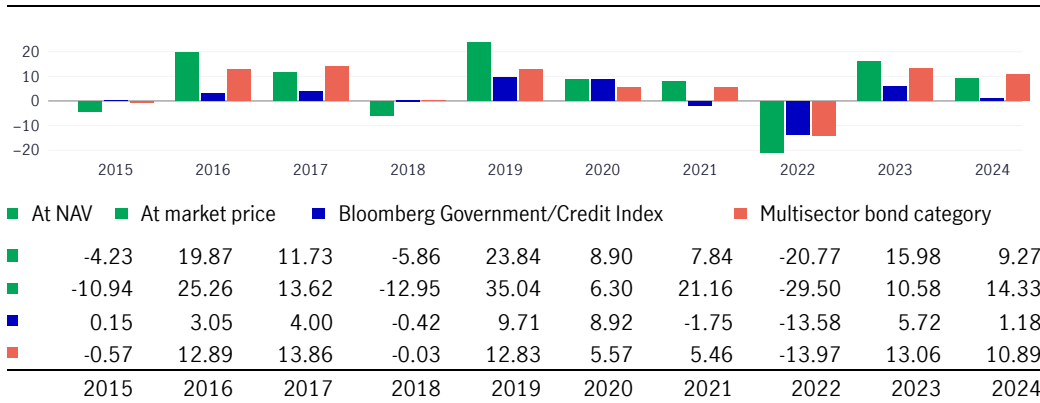

11/1/88 – 3/31/25

This chart illustrates the growth of a hypothetical \$10,000 investment based on net asset value beginning on the date noted with all distributions reinvested. Performance data shown excludes fees and expenses. The performance data would be lower if such fees and expenses were included. Past performance does not guarantee future results. Returns for periods shorter than one year are cumulative.

**1** The fund was incepted on 1/29/71. Performance data prior to 10/31/88 is not available. **2** It is not possible to invest in an index. Index definitions can be found within the "What you should know before Investing" section on the last page of this fact sheet. **3** Net expenses ratio reflect any applicable voluntary or contractual fee waivers and/or expense reimbursements/recoupment, which may be discontinued at any time. For more information on fee waivers and/or expense reimbursements, please see the expense table and footnotes in the prospectus.

**Calendar year returns** %

The past performance shown here reflects reinvested distributions and does not guarantee future results.

**4** Ratings are from Moody's, if available, and from Standard & Poor's or Fitch, respectively, if not. Securities in the Not rated category have not been rated by a rating agency; however, the subadvisor performs its own credit analysis for many of these securities and assigns comparable ratings that are used for compliance with applicable investment policies. Prior to June 30, 2021, internal ratings provided by the subadvisor were included. Ratings composition will change. Individual bonds are rated by the creditworthiness of their issuers; these ratings do not apply to the fund or its shares. U.S. government and agency obligations are backed by the full faith and credit of the U.S. government. All other bonds are rated on a scale from AAA (extremely strong financial security characteristics) down to CCC and below (having a very high degree of speculative characteristics). "Short-term investments and other," if applicable, may include security or portfolio receivables, payables, and certain derivatives. **5** Holdings, sector weightings, market capitalization and portfolio characteristics are subject to change at any time. There is no guarantee the fund will maintain the portfolio characteristics, or the future profitability of the securities identified and set forth herein. **6** The current distribution rate reflects the most recent distribution annualized and divided by the net asset value (NAV) as of the most recent quarter end. **7** The fund's distributions may be from ordinary income, return of capital, or short- or long-term capital gains. **8** The asset mix excludes any negative exposures that may result from the use of futures or forward contracts.

**What you should know before investing**

As is the case with all exchange-traded closed-end funds, an investment in this fund may trade at a discount or premium to the fund's net asset value (NAV) and is subject to investment and market risks, including the possible loss of principal. Distribution levels are subject to change and may include a substantial return of capital, which is a return of some or all of a shareholder's investment in the fund. Fixed-income investments are subject to interest-rate and credit risk; their value will normally decline as interest rates rise or if a creditor, grantor, or counterparty is unable or unwilling to make principal, interest, or settlement payments. An issuer of securities held by the fund may default, have its credit rating downgraded, or otherwise perform poorly, which may affect fund performance. Investments in higher-yielding, lower-rated securities are subject to a higher risk of default. Liquidity—the extent to which a security may be sold or a derivative position closed without negatively affecting its market value, if at all—may be impaired by reduced trading volume, heightened volatility, rising interest rates, and other market conditions. The fund's use of leverage may not be successful and create additional risks, including heightened price and return volatility. Derivatives transactions, such as hedging and other strategic transactions, may increase a fund's volatility and could produce disproportionate losses, potentially more than the fund's principal investment.

The Bloomberg U.S. Government/Credit Index tracks the performance of U.S. government bonds, U.S. corporate bonds, and Yankee bonds. It is not possible to invest directly in an index.

<sup>9</sup> Listed holdings reflect the largest portions of the fund's total and may change at any time. They are not recommendations to buy or sell any security. Data is expressed as a percentage of net assets and excludes cash and cash equivalents. <sup>10</sup> Closed-end fund shares are not redeemable, but instead are traded in the secondary market and frequently trade at a discount to net asset value. Specialized funds may carry additional risks. <sup>11</sup> The difference between total managed assets and total net assets is due primarily to the fund's use of leverage through borrowings; net assets do not include borrowings.
