**Supplement dated August 31, 2022 to the current Prospectus and Statement of Additional Information (the SAI), as may be supplemented**

In December 2020, the Securities and Exchange Commission adopted Rule 2a-5 (the “Valuation Rule”) under the Investment Company Act of 1940 (“1940 Act”), providing a framework for fund valuation practices and addressing the particular role of boards of directors with respect to the fair value of such fund’s investments. Among other things, the Valuation Rule permits a fund’s board to designate a fund’s investment adviser to perform the fund’s fair value determinations, subject to board oversight and certain reporting and other requirements. Compliance with the Valuation Rule is required by September 8, 2022.

The Board of Trustees of the Trusts (each, a “Board” and collectively, the “Boards”) listed above, as of September 1, 2022 (the “Effective Date”), have each designated John Hancock Investment Management LLC (the “Advisor”) as the valuation designee to perform fair value functions in accordance with the Advisor’s Valuation Policies and Procedures (the “Valuation Policy”), relating to the assets held by each fund of each Trust on any day that a fund’s NAV is determined. The Advisor undertakes such process in accordance with its Valuation Policy and related procedures that the Advisor maintains and may update from time to time. Each Board has, as of the Effective Date, delegated the fair valuation responsibility to the Advisor, subject to its oversight, and the Advisor’s use of its Valuation Policy replaces any and all references to the contrary.

**Supplement dated August 19, 2022 to the current Statement of Additional Information, as may be supplemented (the “SAI”)**

Effective immediately, the following replaces the similar information contained in each SAI, as applicable:

The regulation of the U.S. and non-U.S. derivatives markets has undergone substantial change in recent years and such change may continue. In particular, effective August 19, 2022 (the “Compliance Date”), Rule 18f-4 under the 1940 Act (the “Derivatives Rule”) replaces the asset segregation regime of Investment Company Act Release No. 10666 (“Release 10666”) with a new framework for the use of derivatives by registered funds. On the Compliance Date, the SEC rescinded Release 10666 and withdrew no-action letters and similar guidance addressing a fund’s use of derivatives and began requiring funds to satisfy the requirements of the Derivatives Rule. As a result, on or after the Compliance Date, the funds will no longer engage in “segregation” or “coverage” techniques with respect to derivatives transactions as outlined in this SAI and will instead comply with the applicable requirements of the Derivatives Rule.

The Derivatives Rule mandates that a fund adopt and/or implement: (i) value-at-risk limitations (“VaR”) in lieu of asset segregation requirements; (ii) a written derivatives risk management program; (iii) new Board oversight responsibilities; and (iv) new reporting and recordkeeping requirements. In the event that a fund’s derivative exposure is 10% or less of its net assets, excluding certain currency and interest rate hedging transactions, it can elect to be classified as a limited derivatives user (“Limited Derivatives User”) under the Derivatives Rule, in which case the fund is not subject to the full requirements of the Derivatives Rule. Limited Derivatives Users are excepted from VaR testing, implementing a derivatives risk management program, and Board oversight and reporting requirements mandated by the Derivatives Rule. However, a Limited Derivatives User is still required to implement written compliance policies and procedures reasonably designed to manage its derivatives risks. The Derivatives Rule also provides special treatment for reverse repurchase agreements, similar financing transactions and unfunded commitment agreements. Specifically, a fund may elect whether to treat reverse repurchase agreements and similar financing transactions as “derivatives transactions” subject to the requirements of the Derivatives Rule or as senior securities equivalent to bank borrowings for purposes of Section 18 of the 1940 Act. In addition, a fund, including money market funds, may invest in a security on a when-issued or forward-settling basis, or with a non-standard settlement cycle, and the transaction will be deemed not to involve a senior security, provided that: (i) the fund intends to physically settle the transaction; and (ii) the transaction will settle within 35 days of its trade date.

Furthermore, it is possible that additional government regulation of various types of derivative instruments may limit or prevent a fund from using such instruments as part of its investment strategy in the future, which could negatively impact the fund. New position limits imposed on a fund or its counterparty may also impact the fund’s ability to invest in futures, options, and swaps in a manner that efficiently meets its investment objective.

This Statement of Additional Information (“SAI”) is not a prospectus and is authorized for distribution to prospective investors only if preceded or accompanied by the prospectus of John Hancock Asset-Based Lending Fund (the “Fund”) dated July 5, 2022 (the “Prospectus”) and any related supplement thereto (“Prospectus Supplements”), which are incorporated herein by reference. This SAI should be read in conjunction with such Prospectus and any related Prospectus Supplements, copies of which may be obtained without charge by contacting your financial intermediary or calling the Fund at the telephone number or address set forth above.

## INVESTMENT OBJECTIVE AND POLICIES

The investment objective and principal investment strategies of John Hancock Asset-Based Lending Fund (the “Fund”) are set forth in the Fund’s prospectus (the “Prospectus”). Certain additional investment information is set forth below.

## INVESTMENTS, TECHNIQUES, RISKS AND LIMITATIONS

The principal securities or other investments in which the Fund invests are described in the Fund’s Prospectus. The Fund also may invest in securities or other investments as non-principal investments for any purpose that is consistent with its investment objective. The following information is either additional information in respect of a principal security or other investment referenced in the Prospectus or information in respect of a non-principal security or other investment in which case there is no related disclosure in the Prospectus.

**Ratings as Investment Criteria.** In general, the ratings of Moody’s and S&P represent the opinions of these agencies as to the quality of the securities which they rate. It should be emphasized, however, that ratings are relative and subjective and are not absolute standards of quality. There is no guarantee that these institutions will continue to provide ratings. These ratings may be used by the Fund as initial criteria for the selection of debt securities. The Fund may also invest in securities that are not rated by a rating agency. Among the factors which will be considered are the long-term ability of the issuer to pay principal and interest and general economic trends. Appendix A contains further information concerning the ratings of Moody’s and S&P and their significance. Subsequent to its purchase by the Fund, an issue of securities may cease to be rated or its rating may be reduced below the minimum required for purchase by the Fund. Neither of these events will require the sale of the securities by the Fund. The Fund may invest in securities rated by rating agencies other than Moody’s and S&P including without limitation securities rated by Fitch, Kroll and DBRS.

**Repurchase Agreements, Reverse Repurchase Agreements, and Sale-Buybacks.** Repurchase agreements are arrangements involving the purchase of an obligation and the simultaneous agreement to resell the same obligation on demand or at a specified future date and at an agreed-upon price. A repurchase agreement can be viewed as a loan made by the Fund to the seller of the obligation with such obligation serving as collateral for the seller’s agreement to repay the amount borrowed with interest. Repurchase agreements provide the opportunity to earn a return on cash that is only temporarily available. Repurchase agreements may be entered with banks, brokers, or dealers. However, a repurchase agreement will only be entered with a broker or dealer if the broker or dealer agrees to deposit additional collateral should the value of the obligation purchased decrease below the resale price.

Generally, repurchase agreements are of a short duration, often less than one week but on occasion for longer periods. Securities subject to repurchase agreements will be valued every business day and additional collateral will be requested if necessary so that the value of the collateral is at least equal to the value of the repurchase obligation, including the interest accrued thereon.

Marathon Asset Management LP (the “Subadvisor”) shall engage in a repurchase agreement transaction only with those banks or broker dealers who meet the Subadvisor’s quantitative and qualitative criteria regarding creditworthiness, asset size and collateralization requirements. John Hancock Investment Management LLC (the “Advisor”) also may engage in repurchase agreement transactions on behalf of the Fund. The counterparties to a repurchase agreement transaction are limited to a:

- Federal Reserve System member bank;
- primary government securities dealer reporting to the Federal Reserve Bank of New York’s Market Reports Division; or
- broker dealer that reports U.S. government securities positions to the Federal Reserve Board.

The Fund also may participate in repurchase agreement transactions utilizing the settlement services of clearing firms that meet the Subadvisor’s creditworthiness requirements.

The Advisor and the Subadvisor will continuously monitor repurchase agreement transactions to ensure that the collateral held with respect to a repurchase agreement equals or exceeds the amount of the obligation.

The risk of a repurchase agreement transaction is limited to the ability of the seller to pay the agreed-upon sum on the delivery date. In the event of bankruptcy or other default by the seller, the instrument purchased may decline in value, interest payable on the instrument may be lost and there may be possible difficulties and delays in obtaining collateral and delays and expense in liquidating the instrument. If an issuer of a repurchase agreement fails to repurchase the underlying obligation, the loss, if any, would be the difference between the repurchase price and the underlying obligation's market value. The Fund also might incur certain costs in liquidating the underlying obligation. Moreover, if bankruptcy or other insolvency proceedings are commenced with respect to the seller, realization upon the underlying obligation might be delayed or limited.

Under a reverse repurchase agreement, the Fund sells a debt security and agrees to repurchase it at an agreed-upon time and at an agreed-upon price. The fund retains record ownership of the security and the right to receive interest and principal payments thereon. At an agreed-upon future date, the fund repurchases the security by remitting the proceeds previously received, plus interest. The difference between the amount the fund receives for the security and the amount it pays on repurchase is payment of interest. In certain types of agreements, there is no agreed-upon repurchase date and interest payments are calculated daily, often based on the prevailing overnight repurchase rate. A reverse repurchase agreement may be considered a form of leveraging and may, therefore, increase fluctuations in the Fund's NAV per share. Subject to the requirements noted under "Risk of Additional Governmental Regulation of Derivatives" and "Use of Segregated and Other Special Accounts," the Fund will cover its repurchase agreement transactions by maintaining in a segregated custodial account cash, Treasury bills, other U.S. government securities, or other liquid assets having an aggregate value at least equal to the amount of such commitment to repurchase including accrued interest, until payment is made.

The Fund may effect simultaneous purchase and sale transactions that are known as "sale-buybacks." A sale-buyback is similar to a reverse repurchase agreement, except that in a sale-buyback, the counterparty that purchases the security is entitled to receive any principal or interest payments made on the underlying security pending settlement of the Fund's repurchase of the underlying security. The Fund's obligations under a sale-buyback typically would be offset by liquid assets equal in value to the amount of the Fund's forward commitment to repurchase the subject security.

**Foreign Repurchase Agreements.** Foreign repurchase agreements involve an agreement to purchase a foreign security and to sell that security back to the original seller at an agreed-upon price in either U.S. dollars or foreign currency. Unlike typical U.S. repurchase agreements, foreign repurchase agreements may not be fully collateralized at all times. The value of a security purchased may be more or less than the price at which the counterparty has agreed to repurchase the security. In the event of default by the counterparty, the Fund may suffer a loss if the value of the security purchased is less than the agreed-upon repurchase price, or if it is unable to successfully assert a claim to the collateral under foreign laws. As a result, foreign repurchase agreements may involve higher credit risks than repurchase agreements in U.S. markets, as well as risks associated with currency fluctuations. In addition, as with other emerging market investments, repurchase agreements with counterparties located in emerging markets, or relating to emerging markets, may involve issuers or counterparties with lower credit ratings than typical U.S. repurchase agreements.

**Lending of Securities.** The Fund may lend its securities so long as such loans do not represent more than 33 1/3% of its total assets. As collateral for the loaned securities, the borrower gives the lending portfolio collateral equal to at least 100% of the value of the loaned securities. The collateral will consist of cash (including U.S. dollars and foreign currency), cash equivalents or securities issued or guaranteed by the U.S. government or its agencies or instrumentalities. The borrower must also agree to increase the collateral if the value of the loaned securities increases. If the market value of the loaned securities declines, the borrower may request that some collateral be returned.

During the existence of the loan, the Fund will receive from the borrower amounts equivalent to any dividends, interest or other distributions on the loaned securities, as well as interest on such amounts. If the Fund receives a payment in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not be eligible for the dividends-received deduction (the "DRD") for corporate shareholders or for treatment as qualified dividend income for individual shareholders. The DRD and qualified dividend income are

discussed more fully in this SAI under “Additional Information Concerning Taxes.”

As with other extensions of credit, there are risks that collateral could be inadequate in the event of the borrower failing financially, which could result in actual financial loss, and risks that recovery of loaned securities could be delayed, which could result in interference with portfolio management decisions or exercise of ownership rights. The collateral is managed by an affiliate of the Advisor. The Fund will be responsible for the risks associated with the investment of cash collateral, including the risk that the Fund may lose money on the investment or may fail to earn sufficient income to meet its obligations to the borrower. In addition, the Fund may lose its right to vote its shares of the loaned securities at a shareholder meeting if the Subadvisor does not recall or does not timely recall the loaned securities, or if the borrower fails to return the recalled securities in advance of the record date for the meeting.

Securities lending involves counterparty risk, including the risk that the loaned securities may not be returned or returned in a timely manner and/or a loss of rights in the collateral if the borrower or the lending agent defaults or fails financially. This risk is increased when the Fund’s loans are concentrated with a single or limited number of borrowers. There are no limits on the number of borrowers to which the Fund may lend securities and the Fund may lend securities to only one or a small group of borrowers.

Investment of cash collateral offers the opportunity for the Fund to profit from income earned by this collateral pool, but also the risk of loss, should the value of the Fund’s shares in the collateral pool decrease below their initial value. The Fund did not engage in securities lending activities during the most recent fiscal year, as the Fund had not commenced operations as of the date of this SAI.

**Short Sales.** The Fund may engage in short sales and short sales “against the box.” In a short sale against the box, the Fund borrows securities from a broker-dealer and sells the borrowed securities, and at all times during the transaction, the Fund either owns or has the right to acquire the same securities at no extra cost. If the price of the security has declined at the time the Fund is required to deliver the security, the Fund will benefit from the difference in the price. If the price of a security has increased, the Fund will be required to pay the difference.

In addition, the Fund may sell a security it does not own in anticipation of a decline in the market value of that security (a “short sale”). To complete such a transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing it at market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay the lender any dividends or interest which accrues during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The proceeds of the short sale are typically retained by the broker to meet margin requirements until the short position is closed out. Until the Fund replaces a borrowed security, it will segregate with its custodian cash or other liquid assets at such a level that the amount segregated plus the amount deposited with the broker as collateral (generally not including proceeds from the short sales) will equal the current value of the security sold short. Except for short sales against-the box, the amount of the Fund’s net assets that may be committed to short sales is limited and the securities in which short sales are made must be listed on a national securities exchange.

The Fund will incur a loss as a result of the short sale if the price of the security increases between the date of the short sale and the date on which the Fund replaced the borrowed security and theoretically the Fund’s loss could be unlimited. The Fund will generally realize a gain if the security declines in price between those dates. This result is the opposite of what one would expect from a cash purchase of a long position in a security. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of any premium, dividends or interest the Fund may be required to pay in connection with a short sale. Short selling may amplify changes in the Fund’s NAV. Short selling also may produce higher than normal portfolio turnover, which may result in increased transaction costs to the Fund.

**Short-Term Bank and Corporate Obligations.** The Fund may invest in depository-type obligations of banks and savings and loan associations and other high-quality money market instruments consisting of short-term obligations of the U.S. government or its agencies and commercial paper. Commercial paper represents short-term unsecured promissory notes issued in bearer form by banks or bank holding companies, corporations and finance companies. Depository-type obligations in which the Fund may invest include certificates of deposit, bankers’ acceptances and fixed time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial

bank for a definite period of time and earning a specified return.

Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning, in effect, that the bank unconditionally agrees to pay the face value of the instrument at maturity. Fixed time deposits are bank obligations payable at a stated maturity date and bearing interest at a fixed rate. Fixed time deposits may be withdrawn on demand by the investor, but may be subject to early withdrawal penalties which vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third party, although there is no market for such deposits. Bank notes and bankers' acceptances rank junior to domestic deposit liabilities of the bank and *pari passu* with other senior, unsecured obligations of the bank. Bank notes are not insured by the Federal Deposit Insurance Corporation or any other insurer. Deposit notes are insured by the Federal Deposit Insurance Corporation only to the extent of \$100,000 per depositor per bank.

**Preferred Securities.** The Fund may invest in preferred securities. Preferred securities, like common stock, represent an equity ownership in an issuer. Generally, preferred securities have a priority of claim over common stock in dividend payments and upon liquidation of the issuer. Unlike common stock, preferred securities do not usually have voting rights. Preferred securities in some instances are convertible into common stock. Although they are equity securities, preferred securities have characteristics of both debt and common stock. Like debt, their promised income is contractually fixed. Like common stock, they do not have rights to precipitate bankruptcy proceedings or collection activities in the event of missed payments. Other equity characteristics are their subordinated position in an issuer's capital structure and that their quality and value are heavily dependent on the profitability of the issuer rather than on any legal claims to specific assets or cash flows.

Distributions on preferred securities must be declared by the board of directors and may be subject to deferral, and thus they may not be automatically payable. Income payments on preferred securities may be cumulative, causing dividends and distributions to accrue even if not declared by the board or otherwise made payable, or they may be non-cumulative, so that skipped dividends and distributions do not continue to accrue. There is no assurance that dividends on preferred securities in which the Fund invests will be declared or otherwise made payable. The Fund may invest in non-cumulative preferred securities.

Shares of preferred securities have a liquidation value that generally equals the original purchase price at the date of issuance. The market values of preferred securities may be affected by favorable and unfavorable changes impacting the issuers' industries or sectors, including companies in the utilities and financial services sectors, which are prominent issuers of preferred securities. They may also be affected by actual and anticipated changes or ambiguities in the tax status of the security and by actual and anticipated changes or ambiguities in tax laws, such as changes in corporate and individual income tax rates, and in the dividends received deduction for corporate taxpayers or the characterization of dividends as tax-advantaged as described herein.

Because the claim on an issuer's earnings represented by preferred securities may become onerous when interest rates fall below the rate payable on the stock or for other reasons, the issuer may redeem preferred securities, generally after an initial period of call protection during which the stock is not redeemable. Thus, in declining interest rate environments in particular, the Fund's holdings of higher dividend-paying preferred securities may be reduced and the Fund may be unable to acquire securities paying comparable rates with the redemption proceeds.

**Asset Backed Securities.** The value of asset-backed securities (ABS) may be affected by certain factors such as interest rate risk, the availability of information concerning the pool of underlying assets and its structure, the creditworthiness of the servicing agent for the pool or the originator of the underlying assets and the ability of the servicer to service the underlying collateral. Under certain market conditions, ABS may be less liquid and may be difficult to value. Movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of ABS. Unscheduled prepayments of ABS may result in a loss of income if the proceeds are invested in lower-yielding securities. Conversely, in a rising interest rate environment, a declining prepayment rate will extend the average life of many ABS, which increases the risk of depreciation due to future increases in market interest rates. ABS can also be subject to the risk of default on the underlying assets.

**Collateralized Loan Obligations ("CLO").** CLOs are pools of loans, the debt service on which is repackaged into cash flows payable on different tranches of debt collateralized by each pool. Payments on such debt are dependent on

payments on the underlying loans. The CLOs in which the Fund may participate involve substantial organizational, syndication and ancillary fees. The Fund's investments in CLOs will frequently be subordinate in right of payment to other securities sold by the CLO and not readily marketable. Depending upon the default rate on the collateral of the CLO, such the Fund may incur substantial losses on its CLO investments. CLO structures are complex, and the Fund may be subject to a number of as yet unanticipated risks in participating in CLOs.

CLO securities are subject to various structural risks, including risks relating to the capital structure of the issuer thereof and the collateral management arrangements relating thereto. The capital structure will be highly leveraged (which will affect the CLO securities of different seniorities in different ways), and the underlying instruments will generally contain various triggers and remedies, which may adversely affect the Fund as an investor therein. CLO securities are secured primarily by loans (including commercial loans and eligible synthetic securities whose reference obligations consist of commercial loans), which are subject to liquidity, market value, credit, interest rate, reinvestment and certain other risks. These risks could be exacerbated to the extent that the loans are concentrated in one or more particular types of loans.

**Collateralized Debt Obligations ("CDO").** CDOs may be collateralized by mortgages or other bonds. Like CLOs, CDOs typically issue securities in various tranches across the capital structure. The Fund may invest in one or more tranches of the debt and/or equity of a CDO and may utilize a wide variety of trades including directional positions and relative value trades.

CDO securities generally have underlying risks such as interest rate mismatches, trading and reinvestment risk and tax considerations. Each CDO security, however, involves risks specific to the particular CDO security and its underlying portfolio. The value of the CDO securities generally fluctuates with, among other things, the financial condition of the obligors on or issuers of the underlying portfolio, general economic conditions, the condition of certain financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates.

CDOs are subject to credit, liquidity and interest rate risks. The performance of CDOs will also be adversely affected by macroeconomic factors, including: (i) general economic conditions affecting capital markets and participants therein; (ii) the economic downturns and uncertainties affecting economies and capital markets worldwide; (iii) the effects of, and disruptions and uncertainties resulting from, terrorist attacks; (iv) recent concern about financial performance, accounting and other issues relating to various publicly traded companies; and (v) recent and proposed changes in accounting and reporting standards and bankruptcy legislation.

The risks associated with investing in CDO securities may in addition depend on the skill and experience of the managers of the CDOs' underlying portfolios, particularly with respect to active trading.

**Covenant-Lite Loans.** The Fund may invest in loans that may be "covenant lite." This term typically refers to loans that lack, or contain fewer or contingent, financial maintenance covenants or other provisions intended to provide certain financial protections in favor of lenders as compared to other types of loans. Financial maintenance covenants generally require a borrower to satisfy certain financial metrics at regular intervals over the life of the loan. Loans that include financial maintenance covenants will typically require the borrower to provide a calculation of its financial maintenance covenants and other related financial information on a periodic basis, which permits the lender to monitor the borrower's financial performance over time. The failure to satisfy a financial maintenance covenant as of any required testing period will result in a default and permit the lender, in certain circumstances, to exercise its rights and remedies against the borrower. Additionally, a lender may determine, based on a borrower's financial maintenance covenant calculations, that a borrower is experiencing financial distress or decline, which typically permits the lender to engage in negotiations with the borrower or take other actions in order to mitigate losses.

Covenant-lite loans carry greater risks than loans with financial maintenance covenants because the borrower will generally have more flexibility with respect to its activities, and the Fund or lender may receive less frequent or less detailed financial reporting from the borrower and may experience greater delays and difficulties in enforcing its rights if the borrower's financial performance declines, which may result in losses to the Fund. For example, if a default occurs, covenant-lite loans may exhibit diminished recovery values because the Fund or lender may not have had the opportunity to negotiate with the borrower prior to the default and otherwise may have limited financial information or a limited ability to intervene or obtain concessions from a borrower prior to default. Ultimately, these loans provide

fewer protections in favor of the Fund, including with respect to the possibility of default, as well as a more limited ability to declare a default. These risks are particularly acute during a downturn in the credit cycle.

**Foreign Government Securities.** Foreign government securities include securities issued or guaranteed by foreign governments (including political subdivisions) or their authorities, agencies, or instrumentalities or by supra-national agencies. Different kinds of foreign government securities have different kinds of government support. For example, some foreign government securities are supported by the full faith and credit of a foreign national government or political subdivision and some are not. Foreign government securities of some countries may involve varying degrees of credit risk as a result of financial or political instability in those countries and the possible inability of the Fund to enforce its rights against the foreign government issuer. As with other fixed income securities, sovereign issuers may be unable or unwilling to make timely principal or interest payments. Supra-national agencies are agencies whose member nations make capital contributions to support the agencies' activities.

**Investments in Foreign Securities.** The Fund may invest directly in the securities of foreign issuers as well as securities in the form of sponsored or unsponsored American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs") or other securities convertible into foreign securities. The Fund may invest up to 30% of its total assets in securities denominated in foreign currencies. ADRs are receipts typically issued by a U.S. bank or trust company which evidence ownership of underlying securities issued by a foreign corporation. EDRs are receipts issued in Europe which evidence a similar ownership arrangement. Issuers of unsponsored ADRs are not contractually obligated to disclose material information, including financial information, in the United States. Generally, ADRs are designed for use in the United States securities markets and EDRs are designed for use in European securities markets.

An investment in foreign securities including ADRs may be affected by changes in currency rates and in exchange control regulations. Issuers of unsponsored ADRs are not contractually obligated to disclose material information, including financial information, in the United States and, therefore, there may not be a correlation between such information and the market value of the unsponsored ADR. Foreign companies may not be subject to accounting standards or government supervision comparable to U.S. companies, and there is often less publicly available information about their operations. Foreign companies may also be affected by political or financial instability abroad. These risk considerations may be intensified in the case of investments in ADRs of foreign companies that are located in emerging market countries. ADRs of companies located in these countries may have limited marketability and may be subject to more abrupt or erratic price movements.

**Emerging Markets Risk.** In addition, the Fund may invest in the securities of issuers based in countries with "emerging market" economies. Funds that invest a significant portion of their assets in the securities of issuers based in countries with "emerging market" economies are subject to greater levels of foreign investment risk than funds investing primarily in more-developed foreign markets, since emerging market securities may present market, credit, currency, liquidity, legal, political and other risks greater than, or in addition to, the risks of investing in developed foreign countries. These risks include: high currency exchange-rate fluctuations; increased risk of default (including both government and private issuers); greater social, economic and political uncertainty and instability (including the risk of war); more substantial governmental involvement in the economy; less governmental supervision and regulation of the securities markets and participants in those markets; controls on foreign investment and limitations on repatriation of invested capital and on the Fund's ability to exchange local currencies for U.S. dollars; unavailability of currency hedging techniques in certain emerging market countries; the fact that companies in emerging market countries may be newly organized, smaller and less seasoned; the difference in, or lack of, auditing and financial reporting standards, which may result in the unavailability of material information about issuers; different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions; difficulties in obtaining and/or enforcing legal judgments in foreign jurisdictions; and significantly smaller market capitalizations of emerging market issuers.

**European Risk.** Countries in Europe may be significantly affected by fiscal and monetary controls implemented by the European Union ("EU") and European Economic and Monetary Union ("EMU"), which require member countries to comply with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls. Decreasing imports or exports, changes in governmental or other regulations on trade, changes in the exchange rate or dissolution of the Euro, the default or threat of default by one or more EU member countries on its sovereign debt, and/or an economic recession in one or more EU member countries may have a significant adverse effect on the other

European economies and major trading partners outside Europe.

In recent years, the European financial markets have experienced volatility and adverse trends due to concerns about economic downturns, rising government debt levels and the possible default of government debt in several European countries. The European Central Bank and IMF have previously bailed-out several European countries. There is no guarantee that these institutions will continue to provide financial support, and markets may react adversely to any reduction in financial support. A default or debt restructuring by any European country can adversely impact holders of that country's debt and sellers of credit default swaps linked to that country's creditworthiness, which may be located in countries other than those listed above, and can affect exposures to other EU countries and their financial companies as well.

Uncertainties surrounding the sovereign debt of a number of EU countries and the viability of the EU have disrupted and may in the future disrupt markets in the United States and around the world. If one or more countries leave the EU or the EU dissolves, the world's securities markets likely will be significantly disrupted. On January 31, 2020, the UK left the EU, commonly referred to as "Brexit," and the UK ceased to be a member of the EU. Following a transition period during which the EU and the UK Government engaged in a series of negotiations regarding the terms of the UK's future relationship with the EU, the EU and the UK Government signed an agreement on December 30, 2020 regarding the economic relationship between the UK and the EU. This agreement became effective on a provisional basis on January 1, 2021 and formally entered into force on May 1, 2021. While the full impact of Brexit is unknown, Brexit has already resulted in volatility in European and global markets. There remains significant market uncertainty regarding Brexit's ramifications, and the range and potential implications of possible political, regulatory, economic, and market outcomes are difficult to predict. The uncertainty resulting from the transition period may affect other countries in the EU and elsewhere, cause volatility within the EU, or trigger prolonged economic downturns in certain countries within the EU. It is also possible that various countries within the UK, such as Scotland or Northern Ireland, could seek to separate and remain a part of the EU. Other secessionist movements including countries seeking to abandon the Euro or withdraw from the EU may cause volatility and uncertainty in the EU. Despite the influence of the lockdowns, and the economic bounce back, Brexit has had a material impact on the UK's economy. Additionally, trade between the UK and the EU did not benefit from the global rebound in trade in 2021, and remained at the very low levels experienced at the start of the coronavirus (COVID-19) pandemic in 2020, highlighting Brexit's potential long-term effects on the UK economy.

The UK has one of the largest economies in Europe and is a major trading partner with the EU countries and the United States. Brexit might negatively affect The City of London's economy, which is heavily dominated by financial services, as banks might be forced to move staff and comply with two separate sets of rules or lose business to banks in Continental Europe. In addition, Brexit may create additional and substantial economic stresses for the UK, including a contraction of the UK economy and price volatility in UK stocks, decreased trade, capital outflows, devaluation of the British pound, wider corporate bond spreads due to uncertainty, and declines in business and consumer spending as well as foreign direct investment. Brexit may also adversely affect UK-based financial firms that have counterparties in the EU or participate in market infrastructure (trading venues, clearing houses, settlement facilities) based in the EU. Additionally, the spread of the coronavirus (COVID-19) pandemic is likely to continue to stretch the resources and deficits of many countries in the EU and throughout the world, increasing the possibility that countries may be unable to make payments on their sovereign debt. The events and the resulting market volatility may have an adverse effect on the performance of the Fund.

Investing in the securities of Eastern European issuers is highly speculative and involves risks not usually associated with investing in the more developed markets of Western Europe. Securities markets of Eastern European countries typically are less efficient and have lower trading volume, lower liquidity, and higher volatility than more developed markets. Eastern European economies also may be particularly susceptible to disruption in the international credit market due to their reliance on bank related inflows of capital.

To the extent that the Fund invests in European securities, it may be exposed to these risks through its direct investments in such securities, including sovereign debt, or indirectly through investments in money market funds and financial institutions with significant investments in such securities. In addition, Russia's increasing international assertiveness could negatively impact EU and Eastern European economic activity. Please see "Market Events" for additional information regarding risks related to sanctions imposed on Russia.

**Equity Risk.** Equity risk is the risk that the value of securities held by the Fund will rise or fall over time. These fluctuations could be a sustained trend or a drastic movement. Historically, the equity market has moved in cycles, and the value of the Fund's equity securities may fluctuate from day to day. The Fund's portfolio will reflect changes in prices of individual portfolio stocks or general changes in stock valuations. Consequently, the Fund's Share price may decline. Although common stocks have historically generated higher average returns than fixed-income securities over the long term, common stocks also have experienced significantly more volatility in returns. An adverse event, such as an unfavorable earnings report, may depress the value of equity securities of an issuer held by the Fund; the price of common stock of an issuer may be particularly sensitive to general movements in the stock market; or a drop in the stock market may depress the price of most or all of the common stocks held by the Fund. In addition, common stock of an issuer in the Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments because, among other possible reasons, the issuer of the security experiences a decline in its financial condition. Furthermore, equity interests in an issuer held by the Fund may not be listed on public stock exchanges and therefore subject to risks typical of privately held equity. Finally, common stock prices may be sensitive to rising interest rates, as the costs of capital rise and borrowing costs increase.

The Advisor attempts to manage market risk by limiting the amount the Fund invests in each company's equity securities. However, diversification will not protect the Fund against widespread or prolonged declines in the stock market.

**ESG Integration Risk.** The Subadvisor may integrate research on environmental, social and governance ("ESG") factors into the Fund's investment process. The Subadvisor may consider ESG factors that it deems relevant or additive, along with other material factors and analysis, when managing the Fund. ESG factors may include, but are not limited to, matters regarding board diversity, climate change policies, and supply chain and human rights policies. Incorporating ESG criteria and making investment decisions based on certain ESG characteristics, as determined by the Subadvisor, carries the risk that the Fund may perform differently, including underperforming, funds that do not utilize ESG criteria or funds that utilize different ESG criteria. Integration of ESG factors into the Fund's investment process may result in the Subadvisor making different investment decisions for the Fund than for a fund with a similar investment universe and/or investment style that does not incorporate such considerations in its investment strategy or processes, and the Fund's investment performance may be affected. Integration of ESG factors into the Fund's investment process does not preclude the Fund from including companies with low ESG scores or excluding companies with high ESG scores in the Fund's investments.

The ESG characteristics utilized in the Fund's investment process may change over time, and different ESG characteristics may be relevant to different investments. Successful integration of ESG factors will depend on the Subadvisor's skill in researching, identifying, and applying these factors, as well as on the availability of relevant data. The method of evaluating ESG factors and subsequent impact on portfolio composition, performance, proxy voting decisions and other factors, is subject to the interpretation of the Subadvisor in accordance with the Fund's investment objective and strategies. ESG factors may be evaluated differently by different subadvisors, and may not carry the same meaning to all investors and subadvisors. The regulatory landscape with respect to ESG investing in the United States is evolving and any future rules or regulations may require the Fund to change its investment process with respect to ESG integration.

**Hedging and Other Strategies.** Hedging refers to protecting against possible changes in the market value of securities or other assets that the Fund already owns or plans to buy, or protecting unrealized gains in the Fund. When securities prices are falling, the Fund can seek to offset a decline in the value of its current portfolio securities through the sale of futures contracts. When securities prices are rising, the Fund, through the purchase of futures contracts, can attempt to secure better rates or prices than might later be available in the market when it effects anticipated purchases.

If, in the opinion of the Advisor, there is a sufficient degree of correlation between price trends for the Fund's portfolio securities and futures contracts based on other financial instruments, securities indices or other indices, the Fund may also enter into such futures contracts as part of its hedging strategy. Although under some circumstances prices of securities in the Fund's portfolio may be more or less volatile than prices of such futures contracts, the Advisor will attempt to estimate the extent of this volatility difference based on historical patterns and compensate for any differential by having the Fund enter into a greater or lesser number of futures contracts or by attempting to achieve only a partial hedge against price changes affecting the Fund's portfolio securities.

When a short hedging position is successful, any depreciation in the value of portfolio securities will be substantially offset by appreciation in the value of the futures position. On the other hand, any unanticipated appreciation in the value of the Fund's portfolio securities would be substantially offset by a decline in the value of the futures position. On other occasions, the Fund may take a "long" position by purchasing futures contracts.

**Hedging, derivatives, and other strategic transactions risk.** The ability of the Fund to utilize hedging, derivatives, and other strategic transactions to benefit the Fund will depend in part on the portfolio manager's ability to predict pertinent market movements and market risk, counterparty risk, credit risk, interest-rate risk, and other risk factors, none of which can be assured. The skills required to utilize hedging and other strategic transactions are different from those needed to select the Fund's securities. Even if a portfolio manager only uses hedging and other strategic transactions in the Fund primarily for hedging purposes or to gain exposure to a particular securities market, if the transaction does not have the desired outcome, it could result in a significant loss to the Fund. The amount of loss could be more than the principal amount invested. These transactions may also increase the volatility of the Fund and may involve a small investment of cash relative to the magnitude of the risks assumed, thereby magnifying the impact of any resulting gain or loss. For example, the potential loss from the use of futures can exceed the Fund's initial investment in such contracts. In addition, these transactions could result in a loss to the Fund if the counterparty to the transaction does not perform as promised.

The Fund may invest in derivatives, which are financial contracts with a value that depends on, or is derived from, the value of underlying assets, reference rates, or indexes. Derivatives may relate to stocks, bonds, interest rates, currencies, or currency exchange rates, and related indexes. The Fund may use derivatives for many purposes, including for hedging, and as a substitute for direct investment in securities or other assets. Derivatives may be used in a way to efficiently adjust the exposure of the Fund to various securities, markets, and currencies without the Fund actually having to sell existing investments and make new investments. This generally will be done when the adjustment is expected to be relatively temporary or in anticipation of effecting the sale of Fund assets and making new investments over time. Further, since many derivatives have a leverage component, adverse changes in the value or level of the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the derivative itself. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. When the Fund uses derivatives for leverage, investments in the Fund will tend to be more volatile, resulting in larger gains or losses in response to market changes. To limit risks associated with leverage, the Fund may segregate assets determined to be liquid or, as permitted by applicable regulation, enter into certain offsetting positions to cover its obligations under derivative instruments. For a description of the various derivative instruments the Fund may utilize, refer to the Prospectus.

The regulation of the U.S. and foreign derivatives markets has undergone substantial change in recent years and such change may continue. In particular, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act"), and regulation proposed to be promulgated thereunder require many derivatives to be cleared and traded on an exchange, expand entity registration requirements, impose business conduct requirements on dealers that enter into swaps with a pension plan, endowment, retirement plan or government entity, and required banks to move some derivatives trading units to a non-guaranteed affiliate separate from the deposit-taking bank or divest them altogether. Although the Commodity Futures Trading Commission has released final rules relating to clearing, reporting, recordkeeping and registration requirements under the legislation, many of the provisions are subject to further final rule making, and thus its ultimate impact remains unclear. New regulations could, among other things, restrict the Fund's ability to engage in derivatives transactions (for example, by making certain types of derivatives transactions no longer available to the Fund) and/or increase the costs of such derivatives transactions (for example, by increasing margin or capital requirements), and the Fund may be unable to fully execute its investment strategies as a result. Limits or restrictions applicable to the counterparties with which the Fund engages in derivative transactions also could prevent the Fund from using these instruments or affect the pricing or other factors relating to these instruments, or may change the availability of certain investments.

At any time after the date of this SAI, legislation may be enacted that could negatively affect the assets of the Fund. Legislation or regulation may change the way in which the Fund itself is regulated. The advisor cannot predict the effects of any new governmental regulation that may be implemented, and there can be no assurance that any new governmental regulation will not adversely affect the Fund's ability to achieve its investment objective.

The use of derivative instruments may involve risks different from, or potentially greater than, the risks associated

with investing directly in securities and other, more traditional assets. In particular, the use of derivative instruments exposes the Fund to the risk that the counterparty to an OTC derivatives contract will be unable or unwilling to make timely settlement payments or otherwise honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction, although either party may engage in an offsetting transaction that puts that party in the same economic position as if it had closed out the transaction with the counterparty or may obtain the other party's consent to assign the transaction to a third party. If the counterparty defaults, the Fund will have contractual remedies, but there is no assurance that the counterparty will meet its contractual obligations or that, in the event of default, the Fund will succeed in enforcing them. For example, because the contract for each OTC derivatives transaction is individually negotiated with a specific counterparty, the Fund is subject to the risk that a counterparty may interpret contractual terms (e.g., the definition of default) differently than the Fund when the Fund seeks to enforce its contractual rights. If that occurs, the cost and unpredictability of the legal proceedings required for the Fund to enforce its contractual rights may lead it to decide not to pursue its claims against the counterparty. The Fund, therefore, assumes the risk that it may be unable to obtain payments owed to it under OTC derivatives contracts or that those payments may be delayed or made only after the Fund has incurred the costs of litigation. While the managers intend to monitor the creditworthiness of counterparties, there can be no assurance that a counterparty will meet its obligations, especially during unusually adverse market conditions. To the extent the Fund contracts with a limited number of counterparties, the Fund's risk will be concentrated and events that affect the creditworthiness of any of those counterparties may have a pronounced effect on the Fund. Derivatives are also subject to a number of other risks, including market risk and liquidity risk. Since the value of derivatives is calculated and derived from the value of other assets, instruments, or references, there is a risk that they will be improperly valued. Derivatives also involve the risk that changes in their value may not correlate perfectly with the assets, rates, or indexes they are designed to hedge or closely track. Suitable derivatives transactions may not be available in all circumstances. The Fund is also subject to the risk that the counterparty closes out the derivatives transactions upon the occurrence of certain triggering events. In addition, a portfolio manager may determine not to use derivatives to hedge or otherwise reduce risk exposure. Government legislation or regulation could affect the use of derivatives transactions and could limit the Fund's ability to pursue its investment strategies.

**Options on Securities and Securities Indices.** The Fund may purchase and write (sell) call and put options on any securities and securities indices. These options may be listed on national domestic securities exchanges or foreign securities exchanges or traded in the over-the-counter market. The Fund may write covered put and call options and purchase put and call options as a substitute for the purchase or sale of securities or to protect against declines in the value of portfolio securities and against increases in the cost of securities to be acquired.

*Writing Covered Options.* A call option on securities written by the Fund obligates the Fund to sell specified securities to the holder of the option at a specified price if the option is exercised at any time before the expiration date. A put option on securities written by the Fund obligates the Fund to purchase specified securities from the option holder at a specified price if the option is exercised at any time before the expiration date. Options on securities indices are similar to options on securities, except that the exercise of securities index options requires cash settlement payments and does not involve the actual purchase or sale of securities. In addition, securities index options are designed to reflect price fluctuations in a group of securities or segment of the securities market rather than price fluctuations in a single security. Writing covered call options may deprive the Fund of the opportunity to profit from an increase in the market price of the securities in its portfolio. Writing covered put options may deprive the Fund of the opportunity to profit from a decrease in the market price of the securities to be acquired for its portfolio.

All call and put options written by the Fund are covered. A written call option or put option may be covered by (i) maintaining cash or liquid securities in a segregated account with a value at least equal to the Fund's obligation under the option, (ii) entering into an offsetting forward commitment and/or (iii) purchasing an offsetting option or any other option which, by virtue of its exercise price or otherwise, reduces the Fund's net exposure on its written option position. A written call option on securities is typically covered by maintaining the securities that are subject to the option in a segregated account. The Fund may cover call options on a securities index by owning securities whose price changes are expected to be similar to those of the underlying index.

The Fund may terminate its obligations under an exchange-traded call or put option by purchasing an option identical to the one it has written. Obligations under over-the-counter options may be terminated only by entering into an offsetting transaction with the counterparty to such option. Such purchases are referred to as "closing purchase transactions."

**Illiquid and Restricted Securities Risk.** The Fund may have significant exposure to restricted securities. Restricted securities are securities with restrictions on public resale, such as securities offered in accordance with an exemption under Rule 144A under the Securities Act of 1933 (the “1933 Act”), or commercial paper issued under Section 4(a)(2) of the 1933 Act. Restricted securities are often required to be sold in private sales to institutional buyers, markets for restricted securities may or may not be well developed, and restricted securities can be illiquid. The extent (if at all) to which a security may be sold or a derivative position closed without negatively impacting its market value may be impaired by reduced market activity or participation, legal restrictions or other economic and market impediments. Funds with principal investment strategies that involve investments in securities of companies with smaller market capitalizations, foreign securities, derivatives, or securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk. Exposure to liquidity risk may be heightened for funds that invest in securities of emerging markets and related derivatives that are not widely traded, and that may be subject to purchase and sale restrictions.

The capacity of traditional dealers to engage in fixed-income trading has not kept pace with the bond market’s growth. As a result, dealer inventories of corporate bonds, which indicate the ability to “make markets,” i.e., buy or sell a security at the quoted bid and ask price, respectively, are at or near historic lows relative to market size. Because market makers provide stability to fixed-income markets, the significant reduction in dealer inventories could lead to decreased liquidity and increased volatility, which may become exacerbated during periods of economic or political stress.

**Purchasing Options.** The Fund would normally purchase call options in anticipation of an increase, or put options in anticipation of a decrease (“protective puts”), in the market value of securities of the type in which it may invest. The Fund may also sell call and put options to close out its purchased options.

The purchase of a call option would entitle the Fund, in return for the premium paid, to purchase specified securities or currency at a specified price during the option period. The Fund would ordinarily realize a gain on the purchase of a call option if, during the option period, the value of such securities or currency exceeded the sum of the exercise price, the premium paid and transaction costs; otherwise the Fund would realize either no gain or a loss on the purchase of the call option.

The purchase of a put option would entitle the Fund, in exchange for the premium paid, to sell specified securities at a specified price during the option period. The purchase of protective puts is designed to offset or hedge against a decline in the market value of the Fund’s portfolio securities. Put options may also be purchased by the Fund for the purpose of affirmatively benefiting from a decline in the price of securities which it does not own. The Fund would ordinarily realize a gain if, during the option period, the value of the underlying securities decreased below the exercise price sufficiently to cover the premium and transaction costs; otherwise the Fund would realize either no gain or a loss on the purchase of the put option. Gains and losses on the purchase of put options may be offset by countervailing changes in the value of the Fund’s portfolio securities.

The Fund’s options transactions will be subject to limitations established by each of the exchanges, boards of trade or other trading facilities on which such options are traded. These limitations govern the maximum number of options in each class which may be written or purchased by a single investor or group of investors acting in concert, regardless of whether the options are written or purchased on the same or different exchanges, boards of trade or other trading facilities or are held or written in one or more accounts or through one or more brokers. Thus, the number of options which the Fund may write or purchase may be affected by options written or purchased by other investment advisory clients of the Advisor. An exchange, board of trade or other trading facility may order the liquidation of positions found to be in excess of these limits, and it may impose certain other sanctions.

**Risks Associated with Options Transactions.** There is no assurance that a liquid secondary market on a domestic or foreign options exchange will exist for any particular exchange-traded option or at any particular time. If the Fund is unable to effect a closing purchase transaction with respect to covered options it has written, the Fund will not be able to sell the underlying securities or dispose of assets held in a segregated account until the options expire or are exercised. Similarly, if the Fund is unable to effect a closing sale transaction with respect to options it has purchased, it would have to exercise the options in order to realize any profit and will incur transaction costs upon the purchase or sale of underlying securities or currencies.

Reasons for the absence of a liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain options; (ii) restrictions may be imposed by an exchange on opening transactions or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle current trading volume; or (vi) one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options). If trading were discontinued, the secondary market on that exchange (or in that class or series of options) would cease to exist. However, outstanding options on that exchange that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

The Fund's ability to terminate over-the-counter options is more limited than with exchange-traded options and may involve the risk that broker-dealers participating in such transactions will not fulfill their obligations. The Advisor will determine the liquidity of each over-the-counter option in accordance with guidelines adopted by the Board of Trustees of the Fund (the "Board").

The writing and purchase of options is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The successful use of options depends in part on the Advisor's ability to predict future price fluctuations and, for hedging transactions, the degree of correlation between the options and securities or currency markets.

**Futures Contracts and Options on Futures Contracts.** The Fund may purchase and sell futures contracts based on various securities (such as U.S. government securities) and securities indices, and any other financial instruments and indices and purchase and write call and put options on these futures contracts. The Fund may also enter into closing purchase and sale transactions with respect to any of these contracts and options. All futures contracts entered into by the Fund are traded on U.S. or foreign exchanges or boards of trade that are licensed, regulated or approved by the Commodity Futures Trading Commission ("CFTC").

*Futures Contracts.* A futures contract may generally be described as an agreement between two parties to buy and sell particular financial instruments or currencies for an agreed price during a designated month (or to deliver the final cash settlement price, in the case of a contract relating to an index or otherwise not calling for physical delivery at the end of trading in the contract).

Positions taken in the futures markets are not normally held to maturity but are instead liquidated through offsetting transactions, which may result in a profit or a loss. While futures contracts on securities will usually be liquidated in this manner, the Fund may instead make, or take, delivery of the underlying securities or currency whenever it appears economically advantageous to do so. A clearing corporation associated with the exchange on which futures contracts are traded guarantees that, if still open, the sale or purchase will be performed on the settlement date.

The Fund may, for example, take a "short" position in the futures market by selling futures contracts in an attempt to hedge against an anticipated decline in market prices that would adversely affect the value of the Fund's portfolio securities. Such futures contracts may include contracts for the future delivery of securities held by the Fund or securities with characteristics similar to those of the Fund's portfolio securities.

*Options on Futures Contracts.* The purchase of put and call options on futures contracts will give the Fund the right (but not the obligation) for a specified price to sell or to purchase, respectively, the underlying futures contract at any time during the option period. As the purchaser of an option on a futures contract, the Fund obtains the benefit of the futures position if prices move in a favorable direction but limits its risk of loss in the event of an unfavorable price movement to the loss of the premium and transaction costs.

The writing of a call option on a futures contract generates a premium which may partially offset a decline in the value of the Fund's assets. By writing a call option, the Fund becomes obligated, in exchange for the premium (upon exercise of the option) to sell a futures contract if the option is exercised, which may have a value higher than the exercise price. Conversely, the writing of a put option on a futures contract generates a premium which may partially offset an increase in the price of securities that the Fund intends to purchase. However, the Fund becomes obligated (upon

exercise of the option) to purchase a futures contract if the option is exercised, which may have a value lower than the exercise price. The loss incurred by the Fund in writing options on futures is potentially unlimited and may exceed the amount of the premium received.

The holder or writer of an option on a futures contract may terminate its position by selling or purchasing an offsetting option of the same series. There is no guarantee that such closing transactions can be effected. The Fund's ability to establish and close out positions on such options will be subject to the development and maintenance of a liquid market.

**Other Considerations.** The Fund will engage in futures and related options transactions either for *bona fide* hedging or to facilitate portfolio management. The Fund will not engage in futures or related options for speculative purposes. To the extent that the Fund is using futures and related options for hedging purposes, futures contracts will be sold to protect against a decline in the price of securities that the Fund owns or futures contracts will be purchased to protect the Fund against an increase in the price of securities it intends to purchase. The Fund will determine that the price fluctuations in the futures contracts and options on futures used for hedging purposes are substantially related to price fluctuations in securities held by the Fund or securities or instruments which it expects to purchase. To the extent that the Fund engages in non-hedging transactions in futures contracts and options on futures to facilitate portfolio management, the aggregate initial margin and premiums required to establish these nonhedging positions will not exceed 5% of the net asset value of the Fund's portfolio, after taking into account unrealized profits and losses on any such positions and excluding the amount by which such options were in-the-money at the time of purchase.

Transactions in futures contracts and options on futures involve brokerage costs, require margin deposits and, in the case of contracts and options obligating the Fund to purchase securities, require the Fund to establish a segregated account consisting of cash or liquid securities in an amount equal to the underlying value of such contracts and options.

While transactions in futures contracts and options on futures may reduce certain risks, these transactions themselves entail certain other risks. For example, unanticipated changes in interest rates or securities prices may result in a poorer overall performance for the Fund than if it had not entered into any futures contracts or options transactions.

Perfect correlation between the Fund's futures positions and portfolio positions will be impossible to achieve. In the event of an imperfect correlation between a futures position and a portfolio position which is intended to be protected, the desired protection may not be obtained and the Fund may be exposed to risk of loss.

Some futures contracts or options on futures may become illiquid under adverse market conditions. In addition, during periods of market volatility, a commodity exchange may suspend or limit trading in a futures contract or related option, which may make the instrument temporarily illiquid and difficult to price. Commodity exchanges may also establish daily limits on the amount that the price of a futures contract or related option can vary from the previous day's settlement price. Once the daily limit is reached, no trades may be made that day at a price beyond the limit. This may prevent the Fund from closing out positions and limiting its losses.

**Interest Rate Swaps, Collars, Caps and Floors.** In order to hedge the value of the Fund's portfolio against interest rate fluctuations or to facilitate portfolio management, the Fund may, but is not required to, enter into various interest rate transactions such as interest rate swaps and the purchase or sale of interest rate caps and floors. To the extent that the Fund enters into these transactions, the Fund expects to do so primarily to preserve a return or spread on a particular investment or portion of its portfolio, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date or to manage the Fund's interest rate exposure on any debt securities or preferred shares issued by the Fund for leverage purposes. The Fund intends to use these transactions only as a hedge or to facilitate portfolio management. The Fund is not required to hedge its portfolio and may choose not to do so. The Fund cannot guarantee that any hedging strategies it uses will work.

**Interest Rate Swaps.** In an interest rate swap, the Fund exchanges with another party their respective commitments to pay or receive interest (*e.g.*, an exchange of fixed rate payments for floating rate payments). For example, if the Fund holds a debt instrument with an interest rate that is reset only once each year, it may swap the right to receive interest at this fixed rate for the right to receive interest at a rate that is reset every week. This would enable the Fund to offset a decline in the value of the debt instrument due to rising interest rates but would also limit its ability to benefit from falling interest rates. Conversely, if the Fund holds a debt instrument with an interest rate that is reset

every week and it would like to lock in what it believes to be a high interest rate for one year, it may swap the right to receive interest at this variable weekly rate for the right to receive interest at a rate that is fixed for one year. Such a swap would protect the Fund from a reduction in yield due to falling interest rates and may permit the Fund to enhance its income through the positive differential between one week and one year interest rates, but would preclude it from taking full advantage of rising interest rates.

The Fund usually will enter into interest rate swaps on a net basis (*i.e.*, the two payment streams are netted out with the Fund receiving or paying, as the case may be, only the net amount of the two payments). The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each interest rate swap will be accrued on a daily basis, and an amount of cash or liquid instruments having an aggregate net asset value at least equal to the accrued excess will be maintained in a segregated account by the Fund's Custodian. If the interest rate swap transaction is entered into on other than a net basis, the full amount of the Fund's obligations will be accrued on a daily basis, and the full amount of the Fund's obligations will be maintained in a segregated account by the Fund's Custodian.

**Interest Rate Collars, Caps and Floors.** The Fund also may engage in interest rate transactions in the form of purchasing or selling interest rate caps or floors. The Fund will not sell interest rate caps or floors that it does not own. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payments of interest equal to the difference of the index and the predetermined rate on a notional principal amount (*i.e.*, the reference amount with respect to which interest obligations are determined although no actual exchange of principal occurs) from the party selling such interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest at the difference of the index and the predetermined rate on a notional principal amount from the party selling such interest rate floor.

Typically, the parties with which the Fund will enter into interest rate transactions will be broker-dealers and other financial institutions. The Fund will not enter into any interest rate swap, cap or floor transaction unless the unsecured senior debt or the claims-paying ability of the other party thereto is rated investment grade quality by at least one nationally recognized statistical rating organization at the time of entering into such transaction or whose creditworthiness is believed by the Advisor to be equivalent to such rating. If there is a default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction. The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid in comparison with other similar instruments traded in the interbank market. Caps and floors, however, are less liquid than swaps. Certain federal income tax requirements may limit the Fund's ability to engage in interest rate swaps.

**Credit Default Swap Agreements.** The Fund may enter into credit default swap agreements. The "buyer" in a credit default contract is obligated to pay the "seller" a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference obligation has occurred. If an event of default occurs, the seller must pay the buyer the "par value" (full notional value) of the reference obligation in exchange for the reference obligation. The Fund may be either the buyer or seller in the transaction. If the Fund is a buyer and no event of default occurs, the Fund loses its investment and recovers nothing. However, if an event of default occurs, the buyer receives full notional value for a reference obligation that may have little or no value. As a seller, the Fund receives a fixed rate of income throughout the term of the contract, which can run between six months and ten years but is typically structured between three and five years, provided that there is no default event. If an event of default occurs, the seller must pay the buyer the full notional value of the reference obligation. Credit default swaps involve greater risks than if the Fund had invested in the reference obligation directly. In addition to general market risks, credit default swaps are subject to illiquidity risk, counterparty risk and credit risks. The Fund will enter into swap agreements only with counterparties who are rated investment grade by at least one nationally recognized statistical rating organization at the time of entering into such transaction or whose creditworthiness is believed by the Advisor to be equivalent to such rating. A buyer also will lose its investment and recover nothing should an event of default occur. If an event of default were to occur, the value of the reference obligation received by the seller, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund.

If the Fund enters into a credit default swap, the Fund may be required to report the swap as a "listed transaction" for

tax shelter reporting purposes on the Fund's federal income tax return. If the Internal Revenue Service (the "IRS") were to determine that the credit default swap is a tax shelter, the Fund could be subject to penalties under the Internal Revenue Code of 1986, as amended (the "Code").

**Warrants and Rights.** Warrants and rights generally give the holder the right to receive, upon exercise and prior to the expiration date, a security of the issuer at a stated price. Funds typically use warrants and rights in a manner similar to their use of options on securities, as described in "General Characteristics of Options" above and elsewhere in this SAI. Risks associated with the use of warrants and rights are generally similar to risks associated with the use of options. Unlike most options, however, warrants and rights are issued in specific amounts, and warrants generally have longer terms than options. Warrants and rights are not likely to be as liquid as exchange-traded options backed by a recognized clearing agency. In addition, the terms of warrants or rights may limit the Fund's ability to exercise the warrants or rights at such time, or in such quantities, as the Fund would otherwise wish.

The Fund may in the future employ new or additional investment strategies and hedging instruments if those strategies and instruments are consistent with the Fund's investment objective and are permissible under applicable regulations governing the Fund.

**Additional Regulatory Limitations on the Use of Futures and Related Options, Interest Rate Floors, Caps and Collars and Interest Rate and Currency Swap Contracts.** The CFTC has adopted regulations that subject registered investment companies and/or their investment advisors to regulation by the CFTC if the registered investment company invests more than a prescribed level of its NAV in commodity futures, options on commodities or commodity futures, swaps, or other financial instruments regulated under the Commodity Exchange Act ("CEA") ("commodity interests"), or if the registered investment company markets itself as providing investment exposure to such commodity interests. The Advisor is registered as a commodity pool operator ("CPO") under the CEA and is a National Futures Association member firm; however, the Advisor does not act in the capacity of a registered CPO with respect to the Fund.

Although the Advisor is a registered commodity pool operator ("CPO") under the CEA and is a National Futures Association member firm, the Advisor has claimed an exclusion from CPO registration pursuant to CFTC Rule 4.5 with respect to the Fund. To remain eligible for this exclusion, the Fund must comply with certain limitations, including limits on trading in commodity interests, and restrictions on the manner in which the Fund markets its commodity interests trading activities. These limitations may restrict the Fund's ability to pursue its investment strategy, increase the costs of implementing its strategy, increase its expenses and/or adversely affect its total return.

**Risk of Additional Governmental Regulation of Derivatives.** The regulation of the U.S. and foreign derivatives markets has undergone substantial change in recent years and such change may continue. In particular, new Rule 18f-4 (the "Derivatives Rule"), adopted by the SEC on October 28, 2020, replaces the asset segregation regime of Investment Company Act Release No. 10666 (Release 10666) with a new framework for the use of derivatives by registered funds. For funds using a significant amount of derivatives, the Derivatives Rule mandates the Fund adopt and/or implement: (i) value at risk limitations in lieu of asset segregation requirements; (ii) a written derivatives risk management program; (iii) new Board oversight responsibilities, and (iv) new reporting and recordkeeping requirements. The Derivative Rule provides an exception for funds with derivative exposure up to 10% of its net assets, excluding certain currency and interest rate hedging transactions. In addition, the Derivatives Rule provides special treatment for reverse repurchase agreements, similar financing transactions and unfunded commitment agreements. On August 19, 2022, the SEC will rescind Release 10666 and withdraw letters and similar guidance addressing the Fund's use of derivatives and require funds to satisfy the requirements of the Derivatives Rule. Unless the Fund elects to comply early with the Derivatives Rule, the Fund may continue to engage in certain asset segregation practices in accordance with Release 10666 and related staff letters and guidance until August 19, 2022.

It is possible that additional governmental regulation of various types of derivative instruments, including futures, options on futures and swap agreements, may limit or prevent the Fund from using such instruments as part of its investment strategy, which could negatively impact the fund. While many provisions of the Dodd-Frank Act have yet to be fully implemented and any regulatory or legislative activity may not necessarily have a direct, immediate effect upon the Fund, it is possible that, upon implementation of these measures or any future measures, they could potentially limit or completely restrict the ability of the Fund to use these instruments as a part of its investment strategy, increase the costs of using these instruments or make them less effective. In particular, new position limits

imposed on the Fund or its counterparty may impact the fund's ability to invest in futures, options, and swaps in a manner that efficiently meets its investment objective.

Hedging and other strategic transactions may be covered by means other than those described above when consistent with applicable regulatory policies. The Fund also may enter into offsetting transactions so that its combined position, coupled with any segregated assets, equals its net outstanding obligation. The Fund could purchase a put option, for example, if the exercise price of that option is the same or higher than the exercise price of a put option sold by the Fund. In addition, if it holds a futures contract or a forward contract, the Fund could, instead of segregating assets, purchase a put option on the same futures contract or forward contract with an exercise price as high as or higher than the price of the contract held. Other hedging and strategic transactions also may be offset in combinations. If the offsetting transaction terminates on or after the time the primary transaction terminates, no segregation is required, but if it terminates prior to that time, assets equal to any remaining obligation would need to be segregated.

**Use of Segregated and Other Special Accounts.** Use of extensive hedging and other strategic transactions by the Fund will require, among other things, that the Fund post collateral with counterparties or clearinghouses and/or segregate cash or other liquid assets with the Custodian, or a designated subcustodian, to the extent that the Fund's obligations are not otherwise "covered" through ownership of the underlying security, financial instrument or currency.

In general, either the full amount of any obligation by the Fund to pay or deliver securities or assets under a transaction or series of transactions must be covered at all times by (a) holding the securities, instruments or currency required to meet the Fund's obligations under such transactions or series of transactions, or (b) subject to any regulatory restrictions, segregating an amount of cash or other liquid assets at least equal to the current amount of the obligation. The segregated assets cannot be sold or transferred unless equivalent assets are substituted in their place or it is no longer necessary to segregate them. Some examples of cover requirements are set forth below.

**LIBOR Discontinuation Risk.** Certain debt securities, derivatives and other financial instruments may utilize the London Interbank Offered Rate ("LIBOR") as the reference or benchmark rate for interest rate calculations. However, following allegations of manipulation and concerns regarding liquidity, in July 2017 the U.K. Financial Conduct Authority, which regulates LIBOR, announced that it would cease its active encouragement of banks to provide the quotations needed to sustain LIBOR. The ICE Benchmark Administration Limited, the administrator of LIBOR, ceased publishing certain LIBOR maturities, including some U.S. LIBOR maturities, on December 31, 2021, and is expected to cease publishing the remaining and most liquid U.S. LIBOR maturities on June 30, 2023. It is expected that market participants have or will transition to the use of alternative reference or benchmark rates prior to the applicable LIBOR publication cessation date. Additionally, although regulators have encouraged the development and adoption of alternative rates such as the Secured Overnight Financing Rate ("SOFR"), the future utilization of LIBOR or of any particular replacement rate remains uncertain.

Although the transition process away from LIBOR has become increasingly well-defined in advance of the anticipated discontinuation dates, the impact on certain debt securities, derivatives and other financial instruments remains uncertain. It is expected that market participants will adopt alternative rates such as SOFR or otherwise amend financial instruments referencing LIBOR to include fallback provisions and other measures that contemplate the discontinuation of LIBOR or other similar market disruption events, but neither the effect of the transition process nor the viability of such measures is known. Further, uncertainty and risk remain regarding the willingness and ability of issuers and lenders to include alternative rates and revised provisions in new and existing contracts or instruments. To facilitate the transition of legacy derivatives contracts referencing LIBOR, the International Swaps and Derivatives Association, Inc. launched a protocol to incorporate fallback provisions. However, there are obstacles to converting certain longer term securities and transactions to a new benchmark or benchmarks and the effectiveness of one alternative reference rate versus multiple alternative reference rates in new or existing financial instruments and products has not been determined. Certain proposed replacement rates to LIBOR, such as SOFR, which is a broad measure of secured overnight U.S. Treasury repo rates, are materially different from LIBOR, and changes in the applicable spread for financial instruments transitioning away from LIBOR will need to be made to accommodate the differences. Furthermore, the risks associated with the expected discontinuation of LIBOR and transition to replacement rates may be exacerbated if an orderly transition to an alternative reference rate is not completed in a timely manner.

As market participants transition away from LIBOR, LIBOR's usefulness may deteriorate and these effects could be experienced until the permanent cessation of the majority of U.S. LIBOR rates in 2023. The transition process may lead to increased volatility and illiquidity in markets that currently rely on LIBOR to determine interest rates. LIBOR's deterioration may adversely affect the liquidity and/or market value of securities that use LIBOR as a benchmark interest rate, including securities and other financial instruments held by the Fund. Further, the utilization of an alternative reference rate, or the transition process to an alternative reference rate, may adversely affect the Fund's performance.

**Multinational Companies Risk.** To the extent that the Fund invests in the securities of companies with foreign business operations, it may be riskier than funds that focus on companies with primarily U.S. operations. Multinational companies may face certain political and economic risks, such as foreign controls over currency exchange; restrictions on monetary repatriation; possible seizure, nationalization or expropriation of assets; and political, economic or social instability. These risks are greater for companies with significant operations in developing countries.

**Negative Interest Rates.** Certain countries have recently experienced negative interest rates on deposits and debt instruments have traded at negative yields. A negative interest rate policy is an unconventional central bank monetary policy tool where nominal target interest rates are set with a negative value (i.e., below zero percent) intended to help create self-sustaining growth in the local economy. Negative interest rates may become more prevalent among foreign issuers, and potentially within the U.S. For example, if a bank charges negative interest, instead of receiving interest on deposits, a depositor must pay the bank fees to keep money with the bank.

These market conditions may increase the Fund's exposures to interest rate risk. To the extent the Fund has a bank deposit or holds a debt instrument with a negative interest rate to maturity, the Fund would generate a negative return on that investment. While negative yields can be expected to reduce demand for fixed-income investments trading at a negative interest rate, investors may be willing to continue to purchase such investments for a number of reasons including, but not limited to, price insensitivity, arbitrage opportunities across fixed-income markets or rules-based investment strategies. If negative interest rates become more prevalent in the market, it is expected that investors will seek to reallocate assets to other income-producing assets such as investment grade and high-yield debt instruments, or equity investments that pay a dividend. This increased demand for higher yielding assets may cause the price of such instruments to rise while triggering a corresponding decrease in yield and the value of debt instruments over time.

**Short-Term Trading and Portfolio Turnover.** Short-term trading means the purchase and subsequent sale of a security after it has been held for a relatively brief period of time. The Fund may engage in short-term trading in response to stock market conditions, changes in interest rates or other economic trends and developments, or to take advantage of yield disparities between various fixed-income securities in order to realize capital gains or improve income. Short-term trading may have the effect of increasing portfolio turnover rate. A high rate of portfolio turnover (100% or greater) involves correspondingly greater brokerage expenses.

**Real Estate Securities.** Investing in securities of companies in the real estate industry subjects the Fund to the risks associated with the direct ownership of real estate. These risks include:

- Declines in the value of real estate;
- Risks related to general and local economic conditions;
- Possible lack of availability of mortgage funds;
- Overbuilding;
- Extended vacancies of properties;
- Increased competition;
- Increases in property taxes and operating expenses;
- Changes in zoning laws;
- Losses due to costs resulting from the cleanup of environmental problems;
- Liability to third parties for damages resulting from environmental problems;

- Casualty or condemnation losses;
- Limitations on rents;
- Changes in neighborhood values and the appeal of properties to tenants;
- Changes in interest rates; and
- Liquidity risk.

Therefore, to the extent that the Fund invests a substantial amount of its assets in securities of companies in the real estate industry, the value of the Fund's shares may change at different rates compared to the value of shares of the Fund with investments in a mix of different industries.

Securities of companies in the real estate industry include equity real estate investment trusts ("REITs") and mortgage REITs. Equity REITs may be affected by changes in the value of the underlying property owned by the REIT, while mortgage REITs may be affected by the quality of any credit extended. Further, equity and mortgage REITs are dependent upon management skills and generally may not be diversified. Equity and mortgage REITs are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidations. In addition, equity and mortgage REITs could possibly fail to qualify for tax-free pass-through of income under the Code or to maintain their exemptions from registration under the Investment Company Act of 1940, as amended (the "1940 Act"). The above factors may also adversely affect a borrower's or a lessee's ability to meet its obligations to a REIT. In the event of a default by a borrower or lessee, a REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

In addition, even the larger REITs in the industry tend to be small- to medium-sized companies in relation to the equity markets as a whole. Moreover, shares of REITs may trade less frequently and, therefore, are subject to more erratic price movements, than securities of larger issuers.

**Operational and Cybersecurity Risk.** With the increased use of technologies, such as mobile devices and cloud-based service offerings and the dependence on the internet and computer systems to perform necessary business functions, the Fund's service providers are susceptible to operational and information or cybersecurity risks that could result in losses to the Fund and its shareholders. Cybersecurity breaches are either intentional or unintentional events that allow an unauthorized party to gain access to Fund assets, customer data, or proprietary information, or cause the Fund or a Fund service provider to suffer data corruption or lose operational functionality. Intentional cybersecurity incidents include: unauthorized access to systems, networks, or devices (such as through "hacking" activity or "phishing"); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cyberattacks can also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on the service providers' systems or websites rendering them unavailable to intended users or via "ransomware" that renders the systems inoperable until appropriate actions are taken. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information.

A cybersecurity breach could result in the loss or theft of customer data or funds, loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs, any of which could have a substantial impact on the Fund. For example, in a denial of service, Fund shareholders could lose access to their electronic accounts indefinitely, and employees of the Advisor, the Subadvisor, or the Fund's other service providers may not be able to access electronic systems to perform critical duties for the Fund, such as trading, NAV calculation, shareholder accounting, or fulfilment of Fund share purchases and redemptions. Cybersecurity incidents could cause the Fund, the Advisor, the Subadvisor, or other service provider to incur regulatory penalties, reputational damage, compliance costs associated with corrective measures, or financial loss. They may also result in violations of applicable privacy and other laws. In addition, such incidents could affect issuers in which the Fund invests, thereby causing the Fund's investments to lose value.

Cyber-events have the potential to materially affect the Fund and the Advisor's relationships with accounts, shareholders, clients, customers, employees, products, and service providers. The Fund has established risk management systems reasonably designed to seek to reduce the risks associated with cyber-events. There is no guarantee that the Fund will be able to prevent or mitigate the impact of any or all cyber-events.

The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the fund's service providers, counterparties, or other third parties, failed or inadequate processes and technology or system failures.

The Advisor, the Subadvisor, and their affiliates have established risk management or operational failure systems that seek to reduce cybersecurity and operational risks, and business continuity plans in the event of a cybersecurity breach or operational failure. However, there are inherent limitations in such plans, including that certain risks have not been identified, and there is no guarantee that such efforts will succeed, especially since none of the Advisor, the Subadvisor, or their affiliates controls the cybersecurity or operational systems of the Fund's third-party service providers (including the Fund's Custodian), or those of the issuers of securities in which the Fund invests.

In addition, other disruptive events, including (but not limited to) natural disasters and public health crises (such as the coronavirus (COVID-19) pandemic), may adversely affect the Fund's ability to conduct business, in particular if the Fund's employees or the employees of its service providers are unable or unwilling to perform their responsibilities as a result of any such event. Even if the Fund's employees and the employees of its service providers are able to work remotely, those remote work arrangements could result in the Fund's business operations being less efficient than under normal circumstances, could lead to delays in its processing of transactions, and could increase the risk of cyber-events.

**Market Events.** Events in certain sectors have historically resulted, and may in the future result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. These events have included, but are not limited to: bankruptcies, corporate restructurings, and other similar events; governmental efforts to limit short selling and high frequency trading; measures to address U.S. federal and state budget deficits, social, political, and economic instability in Europe; economic stimulus by the Japanese central bank; dramatic changes in energy prices and currency exchange rates; and China's economic slowdown. Interconnected global economies and financial markets increase the possibility that conditions in one country or region might adversely impact issuers in a different country or region. Both domestic and foreign equity markets have experienced increased volatility and turmoil, with issuers that have exposure to the real estate, mortgage, and credit markets particularly affected. Financial institutions could suffer losses as interest rates rise or economic conditions deteriorate.

In addition, relatively high market volatility and reduced liquidity in credit and fixed-income markets may adversely affect many issuers worldwide. Actions taken by the U.S. Federal Reserve (the "Fed") or foreign central banks to stimulate or stabilize economic growth, such as interventions in currency markets, could cause high volatility in the equity and fixed-income markets. Reduced liquidity may result in less money being available to purchase raw materials, goods, and services from emerging markets, which may, in turn, bring down the prices of these economic staples. It may also result in emerging-market issuers having more difficulty obtaining financing, which may, in turn, cause a decline in their securities prices.

In addition, while interest rates have been historically low in recent years in the United States and abroad, any decision by the Fed to adjust the target Fed funds rate, among other factors, could cause markets to experience continuing high volatility. A significant increase in interest rates may cause a decline in the market for equity securities. Also, regulators have expressed concern that rate increases may contribute to price volatility. These events and the possible resulting market volatility may have an adverse effect on the Fund.

Political turmoil within the United States and abroad may also impact the Fund. Although the U.S. government has honored its credit obligations, it remains possible that the United States could default on its obligations. While it is impossible to predict the consequences of such an unprecedented event, it is likely that a default by the United States would be highly disruptive to the United States and global securities markets and could significantly impair the value of the Fund's investments. Similarly, political events within the United States at times have resulted, and may in the future result, in a shutdown of government services, which could negatively affect the U.S. economy, decrease the value of many Fund investments, and increase uncertainty in or impair the operation of the United States or other securities markets. In recent years, the U.S. renegotiated many of its global trade relationships and imposed or threatened to impose significant import tariffs. These actions could lead to price volatility and overall declines in U.S. and global investment markets.

A widespread health crisis such as a global pandemic could cause substantial market volatility, exchange trading suspensions and closures, which may lead to less liquidity in certain instruments, industries, sectors or the markets

generally, and may ultimately affect Fund performance. For example, the coronavirus (COVID-19) pandemic has resulted and may continue to result in significant disruptions to global business activity and market volatility due to disruptions in market access, resource availability, facilities operations, imposition of tariffs, export controls and supply chain disruption, among others. The impact of a health crisis and other epidemics and pandemics that may arise in the future, could affect the global economy in ways that cannot necessarily be foreseen at the present time. A health crisis may exacerbate other pre-existing political, social and economic risks. Any such impact could adversely affect the Fund's performance, resulting in losses to your investment.

The United States responded to the coronavirus (COVID-19) pandemic and resulting economic distress with fiscal and monetary stimulus packages. In late March 2020, the government passed the Coronavirus Aid, Relief, and Economic Security Act, a stimulus package providing for over \$2.2 trillion in resources to small businesses, state and local governments, and individuals adversely impacted by the coronavirus (COVID-19) pandemic. In late December 2020, the government also passed a spending bill that included \$900 billion in stimulus relief for the coronavirus (COVID-19) pandemic. Further, in March 2021, the government passed the American Rescue Plan Act of 2021, a \$1.9 trillion stimulus bill to accelerate the United States' recovery from the economic and health effects of the coronavirus (COVID-19) pandemic. In addition, in mid-March 2020 the Fed cut interest rates to historically low levels and promised unlimited and open-ended quantitative easing, including purchases of corporate and municipal government bonds. The Fed also enacted various programs to support liquidity operations and funding in the financial markets, including expanding its reverse repurchase agreement operations, adding \$1.5 trillion of liquidity to the banking system, establishing swap lines with other major central banks to provide dollar funding, establishing a program to support money market funds, easing various bank capital buffers, providing funding backstops for businesses to provide bridging loans for up to four years, and providing funding to help credit flow in asset-backed securities markets. The Fed also extended credit to small- and medium-sized businesses.

To the extent the Fed "tapers" or reduces the amount of securities it purchases pursuant to quantitative easing, and/or raises the federal funds rate, there is a risk that interest rates will rise, which could expose fixed-income and related markets to heightened volatility and could cause the value of a fund's investments, and the fund's NAV, to decline, potentially suddenly and significantly. As a result, the fund may experience high redemptions and, as a result, increased portfolio turnover, which could increase the costs that the fund incurs and may negatively impact the fund's performance.

Political and military events, including in Ukraine, North Korea, Russia, Venezuela, Iran, Syria, and other areas of the Middle East, and nationalist unrest in Europe and South America, also may cause market disruptions.

As a result of continued political tensions and armed conflicts, including the Russian invasion of Ukraine commencing in February of 2022, the extent and ultimate result of which are unknown at this time, the United States and the EU, along with the regulatory bodies of a number of countries, have imposed economic sanctions on certain Russian corporate entities and individuals, and certain sectors of Russia's economy, which may result in, among other things, the continued devaluation of Russian currency, a downgrade in the country's credit rating, and/or a decline in the value and liquidity of Russian securities, property or interests. These sanctions could also result in the immediate freeze of Russian securities and/or funds invested in prohibited assets, impairing the ability of a fund to buy, sell, receive or deliver those securities and/or assets. These sanctions or the threat of additional sanctions could also result in Russia taking counter measures or retaliatory actions, which may further impair the value and liquidity of Russian securities. The United States and other nations or international organizations may also impose additional economic sanctions or take other actions that may adversely affect Russia-exposed issuers and companies in various sectors of the Russian economy. Any or all of these potential results could lead Russia's economy into a recession. Economic sanctions and other actions against Russian institutions, companies, and individuals resulting from the ongoing conflict may also have a substantial negative impact on other economies and securities markets both regionally and globally, as well as on companies with operations in the conflict region, the extent to which is unknown at this time. The United States and the EU have also imposed similar sanctions on Belarus for its support of Russia's invasion of Ukraine. Additional sanctions may be imposed on Belarus and other countries that support Russia. Any such sanctions could present substantially similar risks as those resulting from the sanctions imposed on Russia, including substantial negative impacts on the regional and global economies and securities markets.

In addition, there is a risk that the prices of goods and services in the United States and many foreign economies may decline over time, known as deflation. Deflation may have an adverse effect on stock prices and creditworthiness and may make defaults on debt more likely. If a country's economy slips into a deflationary pattern, it could last for a

prolonged period and may be difficult to reverse. Further, there is a risk that the present value of assets or income from investments will be less in the future, known as inflation. Inflation rates may change frequently and drastically as a result of various factors, including unexpected shifts in the domestic or global economy, and the Fund's investments may be affected, which may reduce the Fund's performance. Further, inflation may lead to the rise in interest rates, which may negatively affect the value of debt instruments held by the Fund, resulting in a negative impact on the Fund's performance. Generally, securities issued in emerging markets are subject to a greater risk of inflationary or deflationary forces, and more developed markets are better able to use monetary policy to normalize markets.

## INVESTMENT RESTRICTIONS

The investment policies and strategies of the Fund described in this SAI and the Prospectus, except for the seven investment restrictions designated as fundamental policies under this caption, are not fundamental and may be changed by the Board without shareholder approval.

### Fundamental Investment Restrictions

As referred to above, the following seven investment restrictions of the Fund are designated as fundamental policies and as such cannot be changed without the approval of the holders of a majority of the Fund's outstanding voting securities, which as used in this SAI means the lesser of (a) 67% of the shares of the Fund present or represented by proxy at a meeting if the holders of more than 50% of the outstanding shares are present or represented at the meeting or (b) more than 50% of outstanding shares of the Fund. As a matter of fundamental policy:

- (1) **Concentration.** The Fund will not concentrate its investments in any industry. For purposes of this restriction, (1) "concentrate" means invest more than 25% of the Fund's total assets (measured at the time of any investment) in any industry and (2) the Fund treats: (A) each of the following, without limitation, as a separate industry: commercial real estate (office), commercial real estate (warehouse), commercial real estate (retail), commercial real estate (hospitality), commercial real estate (multifamily), aircraft (narrow body), aircraft (wide body), shipping (bulk), shipping (container), shipping (tankers), healthcare (drugs), healthcare (devices), consumer loans, residential real estate loans and auto loans; (B) treats different types of securitizations as separate industries based on the underlying asset type (for example, investments in securitizations of commercial real estate (office), commercial real estate (warehouse), commercial real estate (retail), commercial real estate (hospitality), commercial real estate (multifamily), aircraft (narrow body), aircraft (wide body), shipping (bulk), shipping (container), shipping (tankers), healthcare (drugs), healthcare (devices), consumer loans, residential real estate loans and of auto loans are each treated as separate industries from each other), and (C) treats investments in securitizations of each type of underlying asset as a separate industry from investments directly in the underlying asset type (for example, investments in securitizations of residential real estate loans are treated as a separate industry from direct investments in such loans).
- (2) **Borrowing.** The Fund may not borrow money, except as permitted under the 1940 Act and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
- (3) **Underwriting.** The Fund may not engage in the business of underwriting securities issued by others, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
- (4) **Real Estate.** The Fund may not purchase or sell real estate, which term does not include securities of companies which deal in real estate or mortgages or investments secured by real estate or interests therein, as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
- (5) **Commodities.** The Fund may not purchase or sell commodities, except as permitted under the 1940 Act and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
- (6) **Loans.** The Fund may make loans to the extent permitted under the 1940 Act and as interpreted or modified by regulatory authority having jurisdiction, from time to time.

- (7) **Senior Securities.** The Fund may not issue senior securities, except as permitted under the 1940 Act and as interpreted or modified by regulatory authority having jurisdiction, from time to time.

In regard to restriction (2), the Fund may borrow money as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities. The 1940 Act currently requires that the Fund have 300% asset coverage at the time of borrowing with respect to all borrowings other than temporary borrowings.

For purposes of construing restriction (1), securities of the U.S. government, its agencies, or instrumentalities are not considered to represent industries. Tax-exempt municipal obligations backed by the credit of a governmental entity also are not considered to represent industries.

Whenever an investment policy or investment restriction set forth in the Prospectus or this SAI states a maximum percentage of assets that may be invested in any security or other asset or describes a policy regarding quality standards, such percentage limitation or standard shall be determined immediately after and as a result of the Fund's acquisition of such security or asset. Accordingly, any later increase or decrease resulting from a change in values, assets or other circumstances or any subsequent rating change made by a rating agency (or as determined by the Subadvisor if the security is not rated by a rating agency) will not compel the Fund to dispose of such security or other asset. Notwithstanding the foregoing, the Fund must always be in compliance with the borrowing policies set forth above.

#### **REPURCHASES, MANDATORY REPURCHASES AND TRANSFERS OF SHARES**

**Repurchase Offers.** As discussed in the Prospectus, offers to repurchase the Fund's shares of beneficial interest (the "Shares") will be made by the Fund at such times and on such terms as may be determined by the Board in its sole discretion in accordance with the provisions of applicable law. Currently the Fund anticipates making quarterly tender offers as further described in the Prospectus. In determining whether the Fund should repurchase Shares from Shareholders pursuant to written tenders, the Board will consider various factors, including but not limited to those listed in the Prospectus, in making its determinations.

The Board will cause the Fund to make offers to repurchase Shares from Shareholders pursuant to written tenders only on terms it determines to be fair to the Fund and to all Shareholders or persons holding Shares acquired from Shareholders. When the Board determines that the Fund will repurchase Shares, notice will be provided to each Shareholder describing the terms thereof, and containing information Shareholders should consider in deciding whether and how to participate in such repurchase opportunity. Shareholders who are deciding whether to tender their Shares during the period that a repurchase offer is open may ascertain an estimated net asset value as at the latest valuation date of their Shares from the Fund during such period. If a repurchase offer is oversubscribed by Shareholders, the Fund will repurchase only a *pro rata* portion of the Shares tendered by each Shareholder. The potential for pro-rata may cause some Shareholders to tender larger portions of their Shares for repurchase than they otherwise would wish to have repurchased, which may adversely affect others wishing to participate in the tender.

**Mandatory Repurchases.** As noted in the Prospectus, the Fund has the right to repurchase Shares of a Shareholder or any person acquiring Shares from or through a Shareholder under certain circumstances. Such mandatory repurchases may be made if:

- Shares have been transferred or such Shares have vested in any person by operation of law as the result of the death, dissolution, bankruptcy or incompetency of a Shareholder; or
- ownership of Shares by a Shareholder or other person will cause the Fund to be in violation of, or subject the Fund to additional registration or regulation under, the securities, commodities or other laws of the U.S. or any other relevant jurisdiction; or
- continued ownership of such Shares may be harmful or injurious to the business or reputation of the Fund or the Advisor, or may subject the Fund or any Shareholders to an undue risk of adverse tax or other fiscal consequences; or

- any of the representations and warranties made by a Shareholder in connection with the acquisition of Shares was not true when made or has ceased to be true; or
- it would be in the best interests of the Fund and Shareholders to repurchase Shares.

**Transfer of Shares.** No person shall become a substituted Shareholder of the Fund without the consent of the Fund, which consent may be withheld in its sole discretion. Shares held by Shareholders may be transferred only: (i) by operation of law in connection with the death, divorce, bankruptcy, insolvency, or adjudicated incompetence of the Shareholder; or (ii) under other circumstances, with the consent of the Fund (which may be withheld in its sole discretion).

Notice to the Fund of any proposed transfer must include evidence satisfactory to the Board or its delegate that the proposed transferee, at the time of transfer, meets any requirements imposed by the Fund with respect to investor eligibility and suitability. Notice of a proposed transfer of Shares must also be accompanied by a properly completed application in respect of the proposed transferee. In connection with any request to transfer Shares (or portions thereof), the Fund may require the Shareholder requesting the transfer to obtain, at the Shareholder's expense, an opinion of counsel selected by the Fund as to such matters as the Fund may reasonably request. The Board generally will not consent to a transfer if, after the transfer of the Shares, the balance of the account of each of the transferee and transferor is less than \$25,000. Each transferring Shareholder and transferee may be charged reasonable expenses, including, but not limited to, attorneys' and accountants' fees, incurred by the Fund in connection with the transfer and such fees will be paid by the transferor prior to the transfer being effectuated. If such fees have been incurred by the Fund and have not been paid by the transferor for any reason, including a decision to not transfer the interests, the Fund reserves the right to deduct such expenses from the Shareholder's account.

Any transferee meeting the Fund's eligibility requirements that acquires Shares in the Fund by operation of law as the result of the death, dissolution, bankruptcy or incompetency of a Shareholder or otherwise, will be entitled to the allocations and distributions allocable to the Shares so acquired and to transfer such Shares in accordance with the terms of the Fund's Agreement and Declaration of Trust ("Declaration of Trust"), but will not be entitled to the other rights of a Shareholder unless and until such transferee becomes a substituted Shareholder as provided in the Declaration of Trust. If a Shareholder transfers Shares with the approval of the Board, the Fund will promptly take all necessary actions to admit such transferee or successor to the Fund as a Shareholder. Each Shareholder and transferee is required to pay all expenses, including attorneys' and accountants' fees, incurred by the Fund in connection with such transfer. If such a transferee does not meet the Shareholder eligibility requirements, the Fund reserves the right to repurchase its Shares. Any transfer of Shares in violation of the Declaration of Trust will not be permitted and will be void.

The Declaration of Trust provides, in part, that each Shareholder has agreed to indemnify and hold harmless the Fund, the Subadvisor, the Advisor, each other Shareholder and any affiliate of the foregoing against all losses, claims, damages, liabilities, costs and expenses, including legal or other expenses incurred in investigating or defending against any such losses, claims, damages, liabilities, costs and expenses or any judgments, fines and amounts paid in settlement, joint or several, to which such persons may become subject by reason of or arising from any transfer made by such Shareholder in violation of these provisions or any misrepresentation made by such Shareholder in connection with any such transfer.

## **PORTFOLIO TURNOVER**

The Fund has not yet commenced operations. Following commencement of operations, the Fund may experience portfolio turnover, which will not be considered a limiting factor in the execution of investment decisions for the Fund.

## **THOSE RESPONSIBLE FOR MANAGEMENT**

### ***Board's Oversight Role in Management***

The Board's role in management of the Fund is oversight. As is the case with virtually all investment companies (as

distinguished from operating companies), service providers to the Fund, primarily the Advisor, have responsibility for the day-to-day management of the Fund, which includes responsibility for risk management (including management of investment performance and investment risk, valuation risk, issuer and counterparty credit risk, compliance risk and operational risk). As part of its oversight, the Board, acting at its scheduled meetings and between Board meetings, regularly interacts with and receives reports from senior personnel of service providers, including the Advisor's senior managerial and financial officers, the Fund's and the Advisor's Chief Compliance Officer and portfolio management personnel. The Board's Audit Committee, which consists of all of the Fund's Independent Trustees, meets during its scheduled meetings, and, as appropriate, the chair of the Audit Committee maintains contact with the independent registered public accounting firm and Principal Accounting Officer of the Fund. The Board also receives periodic presentations from senior personnel of the Advisor regarding risk management generally, as well as information regarding specific operational, compliance or investment areas, such as business continuity, valuation and investment research. The Board has adopted policies and procedures designed to address certain risks to the Fund. In addition, the Advisor and other service providers to the Fund have adopted a variety of policies, procedures and controls designed to address particular risks to the Fund. Different processes, procedures and controls are employed with respect to different types of risks. However, it is not possible to eliminate all of the risks applicable to the Fund. The Board also receives reports from counsel to the Fund or the Board's own independent legal counsel regarding regulatory compliance and governance matters. The Board's oversight role does not make the Board a guarantor of the Fund's investments or activities.

### ***Board Composition and Leadership Structure***

To rely on certain exemptive rules under the 1940 Act, a majority of the Fund's Board members must not be "interested persons" (as defined in the 1940 Act) of the Fund (the "Independent Trustees"), and for certain important matters, such as the approval of investment advisory agreements or transactions with affiliates, the 1940 Act or the rules thereunder require the approval of a majority of the Independent Trustees. The Trustees elect officers who are responsible for the day-to-day operations of the fund and who execute policies formulated by the Trustees. Currently, three Trustees are Independent Trustees, including the Chairman of the Board.

The Fund's Trustees, including the three Independent Trustees, interact directly with senior management of the Advisor at scheduled meetings and between meetings as appropriate and an Independent Trustee chairs the Audit Committee. The Board has determined that its leadership structure, is appropriate in light of the specific characteristics and circumstances of the Fund, including, but not limited to: (i) the services that the Advisor provides to the Fund and potential conflicts of interest that could arise from this relationship, (ii) the extent to which the day-to-day operations of the Fund are conducted by Fund officers, respectively, and employees of the Advisor, (iii) the Board's oversight role in management of the Fund, and (iv) the Board's size and the cooperative working relationship among the Independent Trustees and among all Trustees.

### ***Information About Each Board Member's Experience, Qualifications, Attributes or Skills***

The tables below present certain information regarding the Trustees and officers of the Fund, including their principal occupations which, unless specific dates are shown, are of at least five years' duration. In addition, the table includes information concerning other directorships held by each Trustee in other registered investment companies or publicly traded companies. Information is listed separately for each Trustee who is an "interested person" (as defined in the 1940 Act) of the Fund (each a "Non-Independent Trustee") and the Independent Trustees. Board members of the Fund, together with information as to their positions with the Fund, principal occupations and other board memberships for the past five years, are shown below. The address of each Trustee and officer of the Fund is 197 Clarendon Street, Boston, Massachusetts, 02116.

Name (Birth Year)	Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee
<b>Independent Trustees</b>			
Hassell H. McClellan (1945)	Trustee and Chairperson of the Board (since 2021)	<p>Director/Trustee, Virtus Funds (2008–2020); Lead Independent Director, The Barnes Group (2010–2021); Associate Professor, The Wallace E. Carroll School of Management, Boston College (retired 2013).</p> <p>Trustee (since 2014) and Chairperson of the Board (since 2017), John Hancock Collateral Trust; Trustee (since 2015) and Chairperson of the Board (since 2017), John Hancock Exchange-Traded Fund Trust; Trustee (since 2012) and Chairperson of the Board (since 2017), various trusts within the John Hancock Fund Complex; Trustee (2005–2006 and since 2012) and Chairperson of the Board (since 2017), John Hancock Funds III; Trustee (since 2005) and Chairperson of the Board (since 2017), John Hancock Variable Insurance Trust and John Hancock Funds II; Trustee and Chairperson of the Board, John Hancock GA Mortgage Trust (since 2019).</p>	3

Traded Fund Trust (since 2015); Trustee, various trusts within the John Hancock Fund Complex (since 2012); Trustee, John Hancock Variable Insurance Trust and John Hancock Funds II (since 2008); Trustee, John Hancock GA Mortgage Trust (since 2019).

**Non-Independent Trustee**

Andrew G. Arnott <sup>1</sup> (1971)	Trustee (since 2021)	<p>Head of Wealth and Asset Management, United States and Europe, for John Hancock and Manulife (since 2018); Director and Executive Vice President, John Hancock Investment Management LLC (since 2005, including prior positions); Director and Executive Vice President, John Hancock Variable Trust Advisers LLC (since 2006, including prior positions); President, John Hancock Investment Management Distributors LLC (since 2004, including prior positions); President of various trusts within the John Hancock Fund Complex (since 2007, including prior positions).</p> <p>Trustee of various trusts within the John Hancock Fund Complex (since 2017).</p>	3
---	-------------------------	---	---

<sup>1</sup> The Trustee is a Non-Independent Trustee due to current or former positions with the Advisor and certain of its affiliates.

The following table presents information regarding the current principal officers of the Fund who are not Trustees, including their principal occupations which, unless specific dates are shown, are of at least five years' duration. Each of the officers is an affiliated person of the Advisor. All of the officers listed are officers or employees of the Advisor or its affiliates.

**Principal Officers who are not Trustees**

Name (Birth Year)	Position(s) with the Fund <sup>1</sup>	Principal Occupation(s) During Past 5 Years
Charles A. Rizzo (1957)	Chief Financial Officer (since 2021)	Vice President, John Hancock Financial Services (since 2008); Senior Vice President, John Hancock Investment Management LLC and John Hancock Variable Trust Advisers LLC (since 2008); Chief Financial Officer of various trusts within the John Hancock Fund Complex (since 2007).
Salvatore Schiavone (1965)	Treasurer (since 2021)	Assistant Vice President, John Hancock Financial Services (since 2007); Vice President, John Hancock Investment Management LLC and John Hancock Variable Trust Advisers LLC (since 2007); Treasurer of various trusts within the John Hancock Fund Complex (since 2007, including prior positions).

<b>Name (Birth Year)</b>	<b>Position(s) with the Fund<sup>1</sup></b>	<b>Principal Occupation(s) During Past 5 Years</b>
Christopher (Kit) Sechler (1973)	Secretary and Chief Legal Officer (since 2021)	Vice President and Deputy Chief Counsel, John Hancock Investment Management (since 2015); Assistant Vice President and Senior Counsel (2009–2015), John Hancock Investment Management; Assistant Secretary of John Hancock Investment Management LLC and John Hancock Variable Trust Advisers LLC (since 2009); Chief Legal Officer and Secretary of various trusts within the John Hancock Fund Complex (since 2009, including prior positions).
Trevor Swanberg (1979)	Chief Compliance Officer (since 2022)	Chief Compliance Officer, John Hancock Investment Management LLC, and John Hancock Variable Trust Advisers LLC (since 2020); Deputy Chief Compliance Officer, John Hancock Investment Management LLC and John Hancock Variable Trust Advisers LLC (2019–2020); Assistant Chief Compliance Officer, John Hancock Investment Management LLC and John Hancock Variable Trust Advisers LLC (2016–2019); Vice President, State Street Global Advisors (2015–2016); Chief Compliance Officer of various trusts within the John Hancock Fund Complex (since 2016, including prior positions).

- 1 Each officer holds office for an indefinite term until his or her successor is duly elected and qualified or until he/she dies, retires, resigns, is removed or becomes disqualified.

### ***Additional Information about the Trustees***

Additional information about each Trustee follows (supplementing the information provided in the table above) that describes some of the specific experiences, qualifications, attributes or skills that the Trustee possesses which the Board believes has prepared them to be effective Board members. Each Trustee believes that the significance of each Trustee’s experience, qualifications, attributes or skills is an individual matter (meaning that experience that is important for one Trustee may not have the same value for another) and that these factors are best evaluated at the board level, with no single Trustee, or particular factor, being indicative of board effectiveness. Each Board member believes that collectively the Trustees have balanced and diverse experience, skills, attributes and qualifications that allow the Board to operate effectively in governing the Fund and protecting the interests of Investors. Among the attributes common to all Trustees is their ability to critically review, evaluate, question and discuss information provided to them, and to interact effectively with management, service providers and counsel, in order to exercise effective business judgment in the performance of their duties; each Board member believes that each member satisfies this standard. Experience relevant to having this ability may be achieved through a Trustee’s educational background; business, professional training or practice (e.g., accounting or securities), public service or academic positions; experience from service as a board member; and/or other life experiences. The Board and any committees have the ability to engage other experts as appropriate. The Board evaluates its performance on an annual basis.

### **Independent Trustees**

*William H. Cunningham* – Mr. Cunningham has management and operational oversight experience as a former Chancellor and President of a major university. Mr. Cunningham regularly teaches a graduate course in corporate governance at the law school and at the Red McCombs School of Business at The University of Texas at Austin. He also has oversight and corporate governance experience as a current and former director of a number of operating companies, including an insurance company.

*Grace K. Fey* — Ms. Fey has significant governance, financial services, and asset management industry expertise based on her extensive non-profit board experience, as well as her experience as a consultant to non-profit and corporate boards, and as a former director and executive of an investment management firm.

*Hassell H. McClellan* — As a former professor of finance and policy in the graduate management department of a major university, a current director of a public company, and as a former director of several privately held companies, Mr. McClellan has experience in corporate and financial matters. He also has experience as a director of other investment companies not affiliated with the Fund.

### **Non-Independent Trustee**

*Andrew G. Arnott* — Through his positions as Executive Vice President of John Hancock Financial Services; Director and Executive Vice President of the Advisor and an affiliated investment advisor, John Hancock Variable Trust Advisers LLC; President of John Hancock Investment Management Distributors LLC; and President of the John Hancock Fund Complex, Mr. Arnott has experience in the management of investments, registered investment companies, variable annuities and retirement products, enabling him to provide management input to the Board.

### **Trustee Ownership of Shares of John Hancock Funds**

The table below sets forth the aggregate dollar range of equity securities beneficially owned by the Trustees in the Fund and in all other funds in the family of investment companies of the Fund overseen by each Trustee as of December 31, 2021. The information as to beneficial ownership is based on statements furnished to the Fund by the Trustees. Each of the Trustees has all voting and investment powers with respect to the shares indicated.

<u>Trustees</u>	<u>Fund</u>	<u>John Hancock Fund Complex</u>
<i><b>Independent Trustees</b></i>		
William H. Cunningham	None	Over \$100,000
Grace K. Fey	None	Over \$100,000
Hassell H. McClellan	None	Over \$100,000
<i><b>Non-Independent Trustee</b></i>		
Andrew G. Arnott	None	None

### **Trustee Compensation**

It is estimated that the Independent Trustees will each be paid the following amounts by the Fund for the calendar year ended December 31, 2022: Hassell H. McClellan, \$90,000; William H. Cunningham, \$75,000; and Grace K. Fey, \$75,000. All Trustees are reimbursed for their reasonable out-of-pocket expenses. The Trustees do not receive any pension or retirement benefits from the Fund.

### **CONTROL PERSONS**

The Fund will commence operations on or following the date of this SAI and the officers and Trustees of the Fund as a group beneficially owned no Shares of any class of the Fund as of the date of this SAI.

As of June 16, 2022, each of Manulife Reinsurance (Bermuda) Ltd., located at Victoria Place, 5th Floor, 31 Victoria Street, Hamilton HM 10, Bermuda, and John Hancock Life Insurance Company (U.S.A.), located at 200 Berkeley Street, Boston, Massachusetts, 02116, owned beneficially 50% of the outstanding Class I Shares of the Fund. For so long as each such entity has a greater than 25% interest in the outstanding voting securities of the Fund, it may be deemed to be a “control person” of the Fund for purposes of the 1940 Act and therefore could determine the outcome of a Shareholder meeting with respect to a proposal directly affecting the Fund or that share class, as applicable.

### **Codes of Ethics**

Each of the Fund, the Advisor, the Distributor, and the Subadvisor has adopted a code of ethics under Rule 17j-1 of the 1940 Act (collectively the “Ethics Codes”). Rule 17j-1 and the Ethics Codes are designed to prevent unlawful practices in connection with the purchase or sale of securities by covered personnel (“Access Persons”). The Ethics

Codes apply to the Fund and permit Access Persons to, subject to certain restrictions, invest in securities, including securities that may be purchased or held by the Fund. Under the Ethics Codes, Access Persons may engage in personal securities transactions, but are required to report their personal securities transactions for monitoring purposes. In addition, certain Access Persons are required to obtain approval before investing in initial public offerings, private placements or certain other securities. The Ethics Codes can be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-202-551-8090. The Codes are available on the EDGAR database on the SEC's website at [www.sec.gov](http://www.sec.gov), and also may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: [publicinfo@sec.gov](mailto:publicinfo@sec.gov), or by writing the SEC's Public Reference Room, 100 F Street, N.E., Washington, D.C. 20549-0102.

## INVESTMENT ADVISORY AND OTHER SERVICES

### THE ADVISOR

The Advisor is a Delaware limited liability company whose principal offices are located at 200 Berkeley Street, Boston, Massachusetts 02116 and serves as the Fund's investment advisor. The Advisor is registered with the SEC as an investment advisor under the Advisers Act.

Founded in 1968, the Advisor is an indirect principally owned subsidiary of John Hancock Life Insurance Company (U.S.A.), a subsidiary of Manulife Financial Corporation ("Manulife Financial" or the "Company"). Manulife Financial is the holding company of The Manufacturers Life Insurance Company (the "Life Company") and its subsidiaries. John Hancock Life Insurance Company (U.S.A.) and its subsidiaries ("John Hancock") today offer a broad range of financial products and services, including whole, term, variable, and universal life insurance, as well as college savings products, mutual funds, fixed and variable annuities, long-term care insurance and various forms of business insurance. Additional information about John Hancock may be found on the Internet at [johnhancock.com](http://johnhancock.com).

The Advisor's parent company has been helping individuals and institutions work toward their financial goals since 1862. The Advisor offers investment solutions managed by institutional money managers, taking a disciplined team approach to portfolio management and research, leveraging the expertise of seasoned investment professionals. The Advisor has been managing closed-end funds since 1971. As of March 31, 2022, the Advisor had total assets under management of approximately \$168.8 billion.

Manulife Financial Corporation is a leading international financial services group with principal operations in Asia, Canada and the United States. Operating primarily as John Hancock in the United States and Manulife elsewhere, it provides financial protection products and advice, insurance, as well as wealth and asset management services through its extensive network of solutions for individuals, groups and institutions. Its global headquarters are in Toronto, Canada, and it trades as 'MFC' on the Toronto Stock Exchange, New York Stock Exchange (the "NYSE"), and the Philippine Stock Exchange, and under '945' in Hong Kong. Manulife Financial Corporation can be found on the Internet at [manulife.com](http://manulife.com).

Pursuant to the Investment Advisory Agreement, the Advisor is responsible, subject to the supervision of the Board, for formulating a continuing investment program for the Fund. The Investment Advisory Agreement was initially approved by the Fund's full Board and by the Independent Trustees at a meeting held on June 15, 2022, and is also approved by the initial Shareholder of the Fund. The Investment Advisory Agreement is terminable without penalty, on 60 days prior written notice by the Board, by vote of a majority of the outstanding Shares of the Fund, or by the Advisor. The Investment Advisory Agreement has an initial term that expires two years after the Fund has commenced investment operations. Thereafter, the Investment Advisory Agreement will continue in effect from year to year if its continuance is approved annually by either the Board or the vote of a majority of the outstanding Shares of the Fund, respectively, provided that, in either event, the continuance also is approved by a majority of the Independent Trustees by vote cast at a meeting called for the purpose of voting on such approval. The Investment Advisory Agreement also provides that it will terminate automatically in the event of its "assignment" (as defined in the 1940 Act).

The Management Fee shall be paid to the Advisor at the end of each calendar month, at the annual rate of 1.350% of the average monthly value of the Managed Assets of the Fund (the "Management Fee"). The term Managed Assets means the total assets of the Fund (including any assets attributable to any preferred shares that may be issued or to

indebtedness), minus the Fund's liabilities incurred in the normal course of operations other than liabilities relating to indebtedness.

The Fund also pays the Advisor an Incentive Fee (the "Incentive Fee") as follows:

The Incentive Fee is earned on Pre-Incentive Fee Net Investment Income, as defined below, attributable to each Share Class, and shall be calculated and accrued on a monthly basis while being determined and payable in arrears as of the end of each fiscal quarter beginning on and after the commencement of the first fiscal quarter following the one-year anniversary of the effective date of the Advisory Agreement.

Thus, the calculation of the Incentive Fee for each fiscal quarter is as follows:

- No Incentive Fee shall be payable in any fiscal quarter in which the Pre-Incentive Fee Net Investment Income attributable to the Class does not exceed a quarterly return of 1.25% per quarter based on the Class's average beginning monthly net assets for the applicable quarterly payment period (calculated in accordance with US GAAP and gross of any accrued (but unpaid) performance fee if applicable during the payment period) (the "Quarterly Return"), or 5.00% annualized;
- All Pre-Incentive Fee Net Investment Income attributable to the Class (if any) that exceeds the Quarterly Return, but is less than or equal to 1.4286% of the average beginning monthly net assets of that Class (calculated in accordance with US GAAP and gross of any accrued (but unpaid) performance fee if applicable during the payment period) for the fiscal quarter (5.714% annualized), shall be payable to the Advisor; and
- For any fiscal quarter in which Pre-Incentive Fee Net Investment Income attributable to the Class exceeds 1.4286% of the Class's average beginning monthly net assets (calculated in accordance with US GAAP and gross of any accrued (but unpaid) performance fee if applicable during the payment period), the Incentive Fee with respect to that Class shall equal 12.5% of Pre-Incentive Fee Net Investment Income attributable to the Class.

"Pre-Incentive Fee Net Investment Income," with respect to each Class, is defined as the Class's share of net investment income (allocated based on the net asset value of the Class relative to the Fund as a whole), which will include investment income earned by the Fund (i.e., interest income, dividend income, etc.) reduced by (1) Fund-related investment expenses (i.e., interest and dividend expense, expenses related to the execution of the investment strategy) and (2) after subtracting any reimbursement made by the Advisor to the Fund pursuant to any expense waiver or cap arrangement agreed to between the Advisor and the Fund, any other Fund expenses, determined in accordance with US GAAP prior to the application of the Incentive Fee except that such "other Fund expenses" shall not include, without limitation, any payments under a Rule 12b-1 plan.

The Incentive Fee is accrued monthly and taken into account for the purpose of determining the Fund's net asset value. Accordingly, the repurchase price received by a Shareholder whose Shares are repurchased in a tender offer will be based on a valuation that will reflect an Incentive Fee accrual, if any. The Incentive Fee presents certain risks that are not present in funds without an Incentive Fee.

The Investment Advisory Agreement provides that, in the absence of willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations to the Fund, the Advisor and any trustee, officer, member or employee thereof, or any of their affiliates, executors, heirs, assigns, successors or other legal representatives, will not be liable to the Fund, for any error of judgment, for any mistake of law or for any act or omission by such person in connection with the performance of services under the Investment Advisory Agreement. The Investment Advisory Agreement also provides for indemnification, to the fullest extent permitted by law, by the Fund of the Advisor, or any Trustee, member, officer or employee thereof, and any of their affiliates, executors, heirs, assigns, successors or other legal representatives, against any liability or expense to which such person may be liable which arises in connection with the performance of services to the Fund, as the case may be, provided that the liability or expense is not incurred by reason of the person's willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations to the Fund.

### ***The Subadvisory Agreement***

The Advisor entered into a Subadvisory Agreement dated June 15, 2022, with the Subadvisor (the “Subadvisory Agreement”). The Subadvisor handles the Fund’s portfolio management activities, subject to oversight by the Advisor. The Subadvisor is Marathon Asset Management LP. As of December 31, 2021, the Subadvisor had total assets under management of approximately \$23 billion. The Subadvisor is located at One Bryant Park, New York, New York 10036.

Under the terms of the Subadvisory Agreement, the Subadvisor is responsible for managing the investment and reinvestment of the assets of the Fund, subject to the supervision and control of the Board and the Advisor. For services rendered by the Subadvisor under the Subadvisory Agreement, the Advisor (and not the Fund) pays the Subadvisor a fee at the annual rate of 0.625% of the average monthly value of the Fund’s Managed Assets. “Managed Assets” means the total assets of the Fund (including any assets attributable to any preferred shares that may be issued or to indebtedness), minus the Fund’s liabilities incurred in the normal course of operations other than liabilities relating to indebtedness.

**Duties of the Subadvisor.** Under the terms of the current subadvisory agreement (the “Subadvisory Agreement”), the Subadvisor manages the investment and reinvestment of the assets of the Fund, subject to the supervision of the Board and the Advisor. The Subadvisor formulates a continuous investment program for the Fund consistent with its investment objective and policies outlined in the Prospectus. The Subadvisor implements such programs by purchases and sales of securities, instruments and other assets (including the placing of orders or the usage of special purpose vehicles for such purchases and sales), entering into derivative transactions to the extent authorized by its registration statement, and managing all cash in the Fund (collectively, “Assets”), and regularly reports to the Advisor and the Board with respect to the implementation of such programs. The Subadvisor, at its expense, furnishes all necessary investment and management facilities, including salaries of personnel required for it to execute its duties, as well as administrative facilities, including bookkeeping, clerical personnel, and equipment necessary for the conduct of the investment affairs of the Fund. Additional information about the Fund’s portfolio managers, including other accounts managed, ownership of fund shares, and compensation structure, can be found below in the “Portfolio Managers” section.

The Advisor has delegated to the Subadvisor the responsibility to vote all proxies, to the extent such may be relevant, relating to the securities held by the Fund. See “Other Services — Proxy Voting” below, for additional information.

### ***Additional Information Applicable to Subadvisory Agreement***

**Term of the Subadvisory Agreement.** The Subadvisory Agreement will initially continue in effect as to the Fund for a period no more than two years from the date of its execution (or the execution of an amendment making the agreement applicable to that Fund) and thereafter if such continuance is specifically approved at least annually either: (a) by the Trustees; or (b) by the vote of a majority of the outstanding voting securities of the Fund. In either event, such continuance also shall be approved by the vote of the majority of the Trustees who are not interested persons of any party to the Subadvisory Agreement.

Any required shareholder approval of any continuance of the Subadvisory Agreement shall be effective with respect to the Fund if a majority of the outstanding voting securities of the Fund votes to approve such continuance, even if such continuance may not have been approved by a majority of the outstanding voting securities of the Fund.

**Failure of Shareholders to Approve Continuance of the Subadvisory Agreement.** If the outstanding voting securities of the Fund fail to approve any continuance of the Subadvisory Agreement, the party may continue to act as investment subadvisor with respect to the Fund pending the required approval of the continuance of the Subadvisory Agreement or a new agreement with either that party or a different subadvisor, or other definitive action.

**Termination of the Subadvisory Agreement.** The Subadvisory Agreement may be terminated at any time without the payment of any penalty on 60 days’ written notice to the other party or parties to the Agreement, and also to the Fund. The following parties may terminate the Subadvisory Agreement:

- the Board;
- a majority of the outstanding voting securities of the Fund;
- the Advisor; and
- the Subadvisor.

The Subadvisory Agreement will automatically terminate in the event of its assignment or upon termination of the Advisory Agreement.

**Amendments to the Subadvisory Agreement.** The Subadvisory Agreement may be amended by the parties to the agreement, provided that the amendment is approved by the vote of a majority of the outstanding voting securities of the Fund (except as noted below) and by the vote of a majority of the Independent Trustees. The required shareholder approval of any amendment to the Subadvisory Agreement shall be effective with respect to the Fund if a majority of the outstanding voting securities of the Fund votes to approve the amendment, even if the amendment may not have been approved by a majority of the outstanding voting securities of the Fund.

### **Service Agreement**

*The description below of the Service Agreement is only a summary and is not necessarily complete. The description set forth below is qualified in its entirety by reference to the Service Agreement attached as an exhibit to this Registration Statement.*

Pursuant to a Service Agreement, the Advisor is responsible for providing, at the expense of the Fund, certain financial, accounting and administrative services such as legal services, tax, accounting, valuation, financial reporting and performance, compliance and service oversight. Pursuant to the Service Agreement, the Advisor shall determine, subject to Board approval, the expenses to be reimbursed by the Fund, including an overhead allocation. The payments under the Service Agreement are not intended to provide a profit to the Advisor. Instead, the Advisor provides the services under the Service Agreement because it also provides advisory services under the Investment Advisory Agreement. The reimbursement shall be calculated and paid monthly in arrears.

The Advisor is not liable for any error of judgment or mistake of law or for any loss suffered by a Fund in connection with the matters to which the Service Agreement relates, except losses resulting from willful misfeasance, bad faith or negligence by the Advisor in the performance of its duties or from reckless disregard by the Advisor of its obligations under the Agreement.

The Service Agreement has an initial term of two years, and continues thereafter so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Independent Trustees. The Fund or the Advisor may terminate the Agreement at any time without penalty on 60 days' written notice to the other party. The Agreement may be amended by mutual written agreement of the parties, without obtaining Shareholder approval.

### **PORTFOLIO MANAGERS**

The Subadvisor handles the Fund's portfolio management activities, subject to oversight by the Advisor. The individuals jointly and primarily responsible for the day-to-day management of the Fund's portfolio are listed below.

The following tables present information regarding accounts other than the Fund for which each portfolio manager has day-to-day management responsibilities. Accounts are grouped into three categories: (i) other investment companies, (ii) other pooled investment vehicles, and (iii) other accounts. To the extent that any of these accounts pay advisory fees based on account performance, information on those accounts is specifically broken out. In addition, any assets denominated in foreign currencies have been converted into U.S. dollars using the exchange rates as of the applicable date. Also shown below the chart is each portfolio manager's investment in the Fund.

The following table reflects approximate information as of December 31, 2022:

	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets \$Million	Number of Accounts	Total Assets \$Million	Number of Accounts	Total Assets \$Million
Ed Cong	0	0	19	7,003	4	697
Louis Hanover	4	822	90	21,349	20	4,729
Andrew Springer	0	0	29	8,622	4	697

### Performance-Based Fees for Other Accounts Managed

*Number and value of accounts within the total accounts that are subject to a performance-based advisory fee:*

	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets \$Million	Number of Accounts	Total Assets \$Million	Number of Accounts	Total Assets \$Million
Ed Cong	0	0	16	4,468	4	697
Louis Hanover	0	0	66	14,998	12	3,191
Andrew Springer	0	0	24	5,815	4	697

### Portfolio Manager Ownership of Shares of the Fund

The following table indicates as of December 31, 2021, the value of shares beneficially owned by the portfolio managers in the Fund.

Portfolio Manager	Range of Beneficial Ownership in the Fund
Ed Cong	None
Louis Hanover	None
Andrew Springer	None

### Conflicts of Interest.

Material conflicts of interest exist whenever a portfolio manager simultaneously manages multiple accounts. A conflict of interest may arise as a result of the portfolio manager being responsible for multiple accounts, including the Fund, which may have different investment guidelines and objectives. In addition to the Fund, these accounts may include accounts of other registered investment companies for which the Subadvisor serves as sub-advisor, private pooled investment vehicles and other accounts. The Subadvisor has adopted aggregation and allocation of investments procedures designed to ensure that all of its clients are treated fairly and equitably over time and to prevent this form of conflict from influencing the allocation of investment opportunities among its clients. As a general matter, the Subadvisor will offer clients the right to participate in all investment opportunities that it determines are appropriate for the client in view of relative amounts of capital available for new investments, each client's investment program, and the then current portfolios of its clients at the time an allocation decision is made. As a result, in certain situations priority or weighted allocations can be expected to occur in respect of certain accounts, including but not limited to situations where clients have differing: (A) portfolio concentrations with respect to geography, asset class, issuer, sector or rating, (B) investment restrictions, (C) tax or regulatory limitations, (D) leverage limitations or volatility targets, (E) ramp up or ramp down scenarios or (F) counterparty relationships. The Subadvisor maintains conflicts of interest policies and procedures containing provisions designed to prevent potential conflicts related to personal trading, allocation, and fees among other potential conflicts of interest. Such potential conflicts and others are disclosed in Subadvisor's Form ADV Part 2A filing.

### Compensation of Portfolio Managers

The Subadvisor has adopted a system of compensation for portfolio managers and others involved in the investment process that is applied systematically among investment professionals. The Advisor pays the Subadvisor a fee consisting of two components – a base management fee based on the assets under management and an incentive fee based upon pre-incentive fee net investment income attributable to each Share Class, and shall be calculated and accrued on a monthly basis while being determined and payable in arrears as of the end of each fiscal quarter, and is subject to a hurdle rate, expressed as a rate of return based on a Class’s average beginning monthly net assets for the applicable quarterly payment period, equal to 1.25% per quarter (or an annualized hurdle rate of 5%) subject to a “catch up” feature, as set forth in the Subadvisory Agreement between the Subadvisor and the Advisor. The Subadvisor pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Fund. Such compensation consists of an annual salary and a discretionary year-end bonus for the Subadvisor’s employees.

## **Other Services**

### ***Proxy Voting Policies and Procedures***

On occasion, the Fund may receive notices or proposals from issuers seeking the consent of or voting by holders of their securities (“proxies”). The Advisor has delegated any voting of proxies in respect of security portfolio holdings to the Subadvisor to vote the proxies in accordance with the Subadvisor’s proxy voting guidelines and procedures. In general, the Advisor believes that voting proxies in accordance with the policies described below will be in the best interests of the Fund. Complete descriptions of the proxy voting procedures of the Advisor and the Subadvisor are set forth in Appendix B to this SAI.

## **CALCULATION OF NET ASSET VALUE**

The net asset value per share for each class of Shares of the Fund is determined monthly (or more frequently as needed) by dividing the value of total assets for the class of Shares minus liabilities for the class of Shares by the total number of shares outstanding for such class at the date as of which the determination is made. The Class I Shares’ net asset value, plus the Class S Shares’ net asset value, plus the Class D Shares’ net asset value equals the total net asset value of the Fund. The Class I Share net asset value, the Class S Share net asset value and the Class D Share net asset value will be calculated separately based on the fees and expenses applicable to each class. Because of differing class fees and expenses, the per Share net asset value of the classes will vary over time. A “Business Day” with respect to the Fund is each day the New York Stock Exchange and the Fund are open.

In calculating the value of the Fund’s investment assets, the Fund will assess whether market quotations are available or whether indicative prices from pricing services or brokers or dealers have been received. Investments for which market quotations or indicative prices are available will be valued at such market quotations. Portfolio securities also may be fair valued by the Fund’s Pricing Committee in certain instances pursuant to procedures established by the Trustees. The Trustees are assisted in their responsibility to fair value securities by the Fund’s Pricing Committee, and the actual calculation of a security’s fair value may be made by the Pricing Committee acting pursuant to the procedures established by the Trustees.

The Fund will follow ASC Topic 820 for measuring fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values are determined with models or other valuation techniques, valuation inputs, and assumptions market participants would use in pricing an asset or liability. Valuation inputs are organized in a hierarchy that gives the highest priority to prices for identical assets or liabilities quoted in active markets (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of inputs in the fair value hierarchy are described below:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.
- Level 2: Inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly. If the asset or liability has a specified term, a Level 2 input must be observable for substantially the full term of the asset or liability. Level 2 inputs include: (i) quoted prices for similar

- assets or liabilities in active markets, (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, (iii) inputs other than quoted prices that are observable for the asset or liability, and (iv) inputs that are derived principally from or corroborated by observable market data.
- Level 3: Unobservable inputs for the asset or liability, and situations where there is little, if any, market activity for the asset or liability at the measurement date.

The inputs into the determination of fair value will be based upon the best available information under the circumstances at the time the NAV is calculated and may require significant management judgment or estimation. The fair valuations upon which the Fund calculates its month end net asset values may be subject to later adjustment based on information reasonably available at that time. Other adjustments may occur from time to time. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy will be based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety will require judgment, and will consider factors specific to the investment.

The Fund expects to assess the levels of the investments at each measurement date, and recognize transfers between levels on the measurement dates. All of the Fund's investments, which will be measured at fair value, are expected to be categorized as Level 3 based upon the expected lowest level of significant input to the valuations.

Consistent with the policies and methodologies to be adopted by the Board, the Fund will perform detailed investment valuations, including an analysis of the investment purchase commitments, using both the market and income approaches as appropriate. There is no one methodology to estimate investment value and, in fact, for any one investment, value is generally best expressed as a range of values. The Fund may also engage one or more independent business appraisal firms(s) to conduct independent appraisals of investments to develop the range of values, from which the Fund may derive a single estimate of value. The Fund will determine the frequency of the appraisal process considering various factors that may include:

- recent changes to the investment or the market for the investment;
- the cost to be incurred for the appraisal; and
- events including legal disputes that may affect the investment.

Application of valuation methodologies will involve a significant degree of judgment by management. Fair values of new investments or investments where an arm's length transaction occurred in the same security is generally assumed to equal to their cost for up to three months after their initial purchase.

Due to the inherent uncertainty of determining the fair value of Level 3 investments, the fair value of the investments may differ significantly from the values that may have been used had a ready market or observable inputs to exist for such investments and may differ materially from the values that may ultimately be received or settled. Further, such investments will generally be subject to legal and other restrictions, or otherwise will be less liquid than publicly traded instruments. If the Fund is required to liquidate a portfolio investment in a forced or liquidation sale, the Fund might realize significantly less than the value at which such investment will have been previously been recorded. The Fund's investments will be subject to market risk. Market risk is the potential for changes in the value due to market changes. Market risk is directly impacted by the volatility and liquidity in the markets in which the investments are traded.

#### **BROKERAGE ALLOCATION**

Pursuant to the Subadvisory Agreement, the Subadvisor is responsible for placing all orders for the purchase and sale of portfolio securities of the Fund. The Subadvisor has no formula for the distribution of the Fund's brokerage business; rather it places orders for the purchase and sale of securities with the primary objective of obtaining the most favorable overall results for the Fund and the Subadvisor's other clients. The cost of securities transactions for the Fund primarily consists of brokerage commissions or dealer or underwriter spreads. Fixed-income securities and money market instruments generally are traded on a net basis and normally do not involve either brokerage commissions or transfer taxes.

Occasionally, securities may be purchased directly from the issuer. For securities traded primarily in the OTC market, the Subadvisor will, where possible, deal directly with dealers who make a market in the securities unless better prices and execution are available elsewhere. Such dealers usually act as principals for their own account.

### **Approved Trading Counterparties**

The Subadvisor maintains and periodically updates a list of approved trading counterparties. Portfolio managers may execute trades only with pre-approved broker-dealer/counterparties. The Subadvisor's Best Execution Committee reviews and approves all broker-dealers/counterparties.

### **Selection of Brokers, Dealers, and Counterparties**

In placing orders for purchase and sale of securities and selecting trading counterparties (including banks or broker-dealers) to effect these transactions, the Subadvisor seeks prompt execution of orders at the most favorable prices reasonably obtainable. The Subadvisor will consider a number of factors when selecting trading counterparties, including the overall direct net economic result to the Fund (including commissions, which may not be the lowest available, but which ordinarily will not be higher than the generally prevailing competitive range), the financial strength, reputation and stability of the counterparty, the efficiency with which the transaction is effected, the ability to effect the transaction when a large block trade is involved, the availability of the counterparty to stand ready to execute possibly difficult transactions in the future, and other matters involved in the receipt of brokerage and research services.

### **Best Execution**

The Subadvisor owes a duty to its clients to seek best execution when executing trades on behalf of clients. "Best execution" generally is understood to mean the most favorable cost or net proceeds reasonably obtainable under the circumstances. However, the SEC has stated that in deciding what constitutes best execution, the determinative factor is not necessarily the lowest possible commission cost, but whether the transaction represents the best qualitative execution. The Subadvisor is not obligated to choose the broker-dealer offering the lowest available commission rate if, in the Subadvisor's reasonable judgment, there is a material risk that the total cost or proceeds from the transaction might be less favorable than may be obtained elsewhere, or, if a higher commission is justified by the trading provided by the broker-dealer, or if other considerations dictate using a different broker-dealer. Negotiated commission rates generally will reflect overall execution requirements of the transaction without regard to whether the broker may provide other services in addition to execution.

The Subadvisor may pay higher or lower commissions to different brokers that provide different categories of services.

The reasonableness of brokerage commission is evaluated on an ongoing basis and at least semi-annually on a formal basis.

When more than one broker-dealer is believed to be capable of providing the best combination of price and execution with respect to a particular portfolio transaction, the Subadvisor will select a broker-dealer based on factors that include, as applicable, average commission rate charged by each broker, finance rates and related services, the brokers inventory of, and ability to obtain, "hard to locate" securities, the services provided by the broker other than execution (i.e., research or other services used in the management of client accounts), whether the execution and other services provided by the broker were satisfactory (taking into account such factors as the speed of execution, the certainty of execution, and the ability to handle large orders or orders requiring special handling), reason for using that broker (i.e., research, execution only, etc.), unusual trends (such as higher than usual commission rates or a large volume of business directed to an unknown broker), and potential conflicts of interest. The amount of brokerage allotted to a particular broker-dealer is not made pursuant to any binding agreement or commitment with any selected broker-dealer.

### **Soft Dollar Considerations**

While the Subadvisor generally does not enter into traditional "soft dollar" arrangements, the Subadvisor cannot be certain that it does not "pay-up" for the execution of trades; thus, the Fund may be deemed to be paying for research services provided by the broker. Research and related products or services furnished by brokers will be limited to

services that constitute research within the meaning of Section 28(e) of the 1934 Act. Accordingly, research and related products or services may include, but are not limited to, written information and analyses concerning specific securities, companies or sectors; market, financial and economic studies and forecasts, as well as discussions with research personnel; financial and industry publications; and statistical and pricing services utilized in the investment management process. The research and related products or services may include both proprietary research created or developed by the broker-dealer and research created or developed by a third party. Research services obtained by the use of commissions arising from the Fund's portfolio transactions may not only benefit the Fund, but may be used by the Subadvisor in its other investment activities.

When the Subadvisor receives research or other products or services from brokers or dealers to whom it directs trades, it may receive a benefit because it does not have to produce or pay for such research, products, or services. The receipt of research and other "soft-dollar" benefits from broker-dealers may provide an incentive for the Subadvisor to select or recommend a broker-dealer based on its interest in receiving the research or other products or services, rather than on the Fund's interest in receiving the most favorable execution. Using a broker who provides the Subadvisor with research or other "soft-dollar" benefits may cause the Fund to pay commissions higher than the commissions charged by broker-dealers who do not so provide.

Previously, the Subadvisor has acquired the following types of research and related products or services from brokers with whom it did business: written information and analyses concerning specific securities, companies or sectors; market, financial and economic studies and forecasts, as well as discussions with research personnel; financial and industry publications; statistical and pricing services, along with software, databases and other technical and telecommunication services utilized in the investment management process.

#### **Trade Aggregation by the Subadvisor**

Because investment decisions often affect more than one client, the Subadvisor frequently will attempt to acquire or dispose of the same security for more than one client at the same time. The Subadvisor, to the extent permitted by applicable law, regulations and advisory contracts, may aggregate purchases and sales of securities on behalf of its various clients for which it has discretion, provided that in the Subadvisor's opinion, all client accounts are treated equitably and fairly and that block trading will result in a more favorable overall execution. Trades will not be combined when a client has directed transactions to a particular broker-dealer or when the Subadvisor determines that combined orders would not be efficient or practical.

When appropriate, the Subadvisor will allocate such block orders at the average price obtained or according to a system that the Subadvisor considers to be fair to all clients over time. Generally speaking, the Subadvisor shall exercise best efforts to allocate such opportunity pro rata based upon the total notional capital of each client account devoted to such security, sector or strategy.

#### **Affiliated Underwriting Transactions by the Subadvisor**

The Board has approved procedures in conformity with Rule 10f-3 under the 1940 Act whereby the Fund may purchase securities that are offered in underwritings in which an affiliate of the Advisor or a Subadvisor participates. These procedures prohibit the Fund from directly or indirectly benefiting an Advisor or Subadvisor affiliate in connection with such underwritings. In addition, for underwritings where an Advisor or Subadvisor affiliate participates as a principal underwriter, certain restrictions may apply that could, among other things, limit the amount of securities that the Fund could purchase.

### **ERISA AND OTHER CONSIDERATIONS**

Investors subject to the Employee Retirement Income Security Act of 1974, as amended ("ERISA") and other tax-exempt entities, including employee benefit plans, individual retirement accounts (each, an IRA) and 401(k) Plans (collectively, "ERISA Plans") may purchase Shares. Because the Fund is an investment company registered under the 1940 Act, the underlying assets of the Fund will not be considered to be "plan assets" of an ERISA Plan investing in the Fund for purposes of ERISA's fiduciary responsibility and prohibited transaction rules. Thus, the Advisor will not be a fiduciary within the meaning of ERISA with respect to the assets of any ERISA Plan that becomes a Shareholder, solely as a result of the ERISA Plan's investment in the Fund.

## ADDITIONAL INFORMATION CONCERNING TAXES

The following discussion of U.S. federal income tax matters is based on the advice of K&L Gates LLP, counsel to the Fund. The Fund intends to elect to be treated and to qualify each year as a regulated investment company (“RIC”) under the Code.

To qualify as a RIC for income tax purposes, the Fund must derive at least 90% of its annual gross income from dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in stock, securities and currencies, and net income derived from an interest in a qualified publicly traded partnership. A “qualified publicly traded partnership” is a publicly traded partnership that meets certain requirements with respect to the nature of its income. To qualify as a RIC, the Fund must also satisfy certain requirements with respect to the diversification of its assets. The Fund must have, at the close of each quarter of the taxable year, at least 50% of the value of its total assets represented by cash, cash items, U.S. government securities, securities of other regulated investment companies, and other securities that, in respect of any one issuer, do not represent more than 5% of the value of the assets of the Fund nor more than 10% of the voting securities of that issuer. In addition, at those times not more than 25% of the market value (or fair value if market quotations are unavailable) of the Fund’s assets can be invested in securities (other than United States government securities or the securities of other regulated investment companies) of any one issuer, or of two or more issuers, which the Fund controls and which are engaged in the same or similar trades or businesses or related trades or businesses, or of one or more qualified publicly traded partnerships. If the Fund fails to meet the annual gross income test described above, the Fund will nevertheless be considered to have satisfied the test if (i) (a) such failure is due to reasonable cause and not due to willful neglect and (b) the Fund reports the failure, and (ii) the Fund pays an excise tax equal to the excess non-qualifying income. If the Fund fails to meet the asset diversification test described above with respect to any quarter, the Fund will nevertheless be considered to have satisfied the requirements for such quarter if the Fund cures such failure within 6 months and either (i) such failure is *de minimis* or (ii) (a) such failure is due to reasonable cause and not due to willful neglect and (b) the Fund reports the failure and pays an excise tax.

As a RIC, the Fund generally will not be subject to U.S. federal income tax on its investment company taxable income (as that term is defined in the Code, but without regard to the deductions for dividends paid) and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it distributes in each taxable year to its shareholders; provided that it distributes at least the sum of 90% of its investment company taxable income and 90% of its net tax-exempt interest income for such taxable year. The Fund intends to distribute to its shareholders, at least annually, substantially all of its investment company taxable income, net tax-exempt interest income and net capital gain. In order to avoid incurring a nondeductible 4% U.S. federal excise tax obligation, the Code requires that the Fund distribute (or be deemed to have distributed) by December 31 of each calendar year an amount at least equal to the sum of (i) 98% of its ordinary income for such year, (ii) 98.2% of its capital gain net income (which is the excess of its realized net long-term capital gain over its realized net short-term capital loss), generally computed on the basis of the one-year period ending on December 31 of such year, after reduction by any available capital loss carryforwards and (iii) 100% of any ordinary income and capital gain net income from the prior year (as previously computed) that were not paid out during such year and on which the Fund paid no U.S. federal income tax. Under current law, provided that the Fund qualifies as a RIC for U.S. federal income tax purposes, the Fund should not be liable for any income, corporate excise or franchise tax in the Commonwealth of Massachusetts.

If the Fund does not qualify as a RIC or fails to satisfy the 90% distribution requirement for any taxable year, subject to the opportunity to cure such failures under applicable provisions of the Code as described above, the Fund’s taxable income will be subject to corporate income taxes, and distributions from earnings and profits, including distributions of net capital gain (if any), will generally constitute ordinary dividend income for U.S. federal income tax purposes. To the extent so designated by the Fund, such distributions generally would be eligible (i) to be treated as qualified dividend income in the case of individual and other noncorporate shareholders and (ii) for the dividends received deduction (“DRD”) in the case of corporate shareholders. In addition, in order to requalify for taxation as a RIC, the Fund may be required to recognize unrealized gains, pay substantial taxes and interest, and make certain distributions.

For U.S. federal income tax purposes, distributions paid out of the Fund’s current or accumulated earnings and profits will, except in the case of distributions of qualified dividend income and capital gain dividends described below, be taxable as ordinary dividend income. Certain income distributions paid by the Fund (whether paid in cash or reinvested

in additional Fund shares) to individual taxpayers that are attributable to the Fund's qualified dividend income and capital gain are taxed at rates applicable to net long-term capital gains (maximum rates of 20%, 15%, or 0% for individuals depending on the amount of their taxable income for the year). This tax treatment applies only if certain holding period requirements and other requirements are satisfied by the shareholder and the dividends are attributable to qualified dividend income received by the Fund itself. For this purpose, "qualified dividend income" means dividends received by the Fund from United States corporations and "qualified foreign corporations," provided that the Fund satisfies certain holding period and other requirements in respect of the stock of such corporations. Only a small portion, if any of the distributions from the Fund may consist of income eligible to be treated as qualified dividend income. An additional 3.8% Medicare tax will also apply in the case of some individuals.

Shareholders receiving any distribution from the Fund in the form of additional shares pursuant to the dividend reinvestment plan will be treated as receiving a taxable distribution in an amount equal to the fair market value of the shares received, determined as of the reinvestment date.

Distributions of net capital gain, if any, reported as capital gains dividends are taxable to a shareholder as long-term capital gains, regardless of how long the shareholder has held Fund shares. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits will be treated by a shareholder as a return of capital which is applied against and reduces the shareholder's basis in his or her shares. To the extent that the amount of any such distribution exceeds the shareholder's basis in his or her shares, the excess will be treated by the shareholder as gain from a sale or exchange of the shares. Distributions of gains from the sale of investments that the Fund owned for one year or less will be taxable as ordinary income.

The Fund may elect to retain its net capital gain or a portion thereof for investment and be taxed at corporate rates on the amount retained. In such case, it may designate the retained amount as undistributed capital gains in a notice to its shareholders who will be treated as if each received a distribution of his *pro rata* share of such gain, with the result that each shareholder will (i) be required to report his *pro rata* share of such gain on his tax return as long-term capital gain, (ii) receive a refundable tax credit for his *pro rata* share of tax paid by the Fund on the gain and (iii) increase the tax basis for his shares by an amount equal to the deemed distribution less the tax credit.

Selling shareholders generally will recognize gain or loss in an amount equal to the difference between the shareholder's adjusted tax basis in the shares sold and the sale proceeds. If the shares are held as a capital asset, the gain or loss will be a capital gain or loss. The current maximum tax rate applicable to net capital gains recognized by individuals and other non-corporate taxpayers is (i) the same as the maximum ordinary income tax rate for gains recognized on the sale of capital assets held for one year or less, or (ii) for gains recognized on the sale of capital assets held for more than one year (as well as certain capital gain distributions) (20%, 15%, or 0% for individuals depending on the amount of their taxable income for the year). An additional 3.8% Medicare tax will also apply in the case of some individuals.

Any loss realized upon the sale or exchange of Fund shares with a holding period of six months or less will be treated as a long-term capital loss to the extent of any capital gain distributions received (or amounts designated as undistributed capital gains) with respect to such shares. In addition, all or a portion of a loss realized on a sale or other disposition of Fund shares may be disallowed under "wash sale" rules to the extent the shareholder acquires other shares of the Fund (whether through the reinvestment of distributions or otherwise) within a period of 61 days beginning 30 days before and ending 30 days after the date of disposition of the Common Shares. Any disallowed loss will result in an adjustment to the shareholder's tax basis in some or all of the other shares acquired.

Sales charges paid upon a purchase of shares cannot be taken into account for purposes of determining gain or loss on a sale of the shares before the 91st day after their purchase to the extent a sales charge is reduced or eliminated in a subsequent acquisition of shares of the Fund (or of another fund), during the period beginning on the date of such sale and ending on January 31 of the calendar year following the calendar year in which such sale was made, pursuant to the reinvestment or any exchange privilege. Any disregarded amounts will result in an adjustment to the shareholder's tax basis in some or all of any other shares acquired.

For federal income tax purposes, the Fund is permitted to carry forward a net capital loss incurred in any year to offset net capital gains, if any, in any subsequent year until such loss carry forwards have been fully used. Capital losses carried forward will retain their character as either short-term or long-term capital losses. The fund's ability to utilize

capital losses in a given year or in total may be limited. To the extent subsequent net capital gains are offset by such losses, they would not result in federal income tax liability to the fund and would not be distributed as such to shareholders.

Certain net investment income received by an individual having adjusted gross income in excess of \$200,000 (or \$250,000 for married individuals filing jointly) will be subject to a tax of 3.8%. Undistributed net investment income of trusts and estates in excess of a specified amount will also be subject to this tax. Dividends and capital gains distributed by the Fund, and gain realized on redemption of Fund shares, will constitute investment income of the type subject to this tax.

Only a small portion, if any, of the distributions from the Fund may qualify for the dividends-received deduction for corporations, subject to the limitations applicable under the Code. The qualifying portion is limited to properly designated distributions attributed to dividend income (if any) the Fund receives from certain stock in U.S. domestic corporations and the deduction is subject to holding period requirements and debt-financing limitations under the Code.

If the Fund should have dividend income that qualifies for the reduced tax rate applicable to qualified dividend income, the maximum amount allowable will be designated by the Fund. This amount will be reflected on Form 1099-DIV for the current calendar year.

Dividends and distributions on the Fund's shares generally are subject to U.S. federal income tax as described herein to the extent they do not exceed the Fund's realized income and gains, even though such dividends and distributions may economically represent a return of a particular shareholder's investment. Such distributions are likely to occur in respect of shares purchased at a time when the Fund's net asset value reflects gains that are either unrealized, or realized but not distributed. Such realized gains may be required to be distributed even when the Fund's net asset value also reflects unrealized losses. Certain distributions declared in October, November or December to shareholders of record of such month and paid in the following January will be taxed to shareholders as if received on December 31 of the year in which they were declared. In addition, certain other distributions made after the close of a taxable year of the Fund may be "spilled back" and treated as paid by the Fund (except for purposes of the non-deductible 4% U.S. federal excise tax) during such taxable year. In such case, shareholders will be treated as having received such dividends in the taxable year in which the distributions were actually made.

The Fund will inform shareholders of the source and tax status of all distributions promptly after the close of each calendar year.

Legislation passed by Congress in 2008 requires the Fund (or its administrative agent) to report to the IRS and furnish to shareholders the cost basis information and holding period for the Fund's shares purchased on or after January 1, 2012, and repurchased by the Fund on or after that date. The Fund will permit shareholders to elect from among several permitted cost basis methods. In the absence of an election, the Fund will use a default cost basis method. The cost basis method a shareholder elects may not be changed with respect to a repurchase of shares after the settlement date of the repurchase. Shareholders should consult with their tax advisors to determine the best permitted cost basis method for their tax situation and to obtain more information about how the new cost basis reporting rules apply to them.

The benefits of the reduced tax rates applicable to long-term capital gains and qualified dividend income may be impacted by the application of the alternative minimum tax to individual shareholders.

Special tax rules apply to investments through defined contribution plans and other tax-qualified plans. Shareholders should consult their tax advisor to determine the suitability of shares of the Fund as an investment through such plans.

The Fund may invest in debt obligations that are in the lowest rating categories or are unrated, including debt obligations of issuers not currently paying interest or who are in default. Investments in debt obligations that are at risk of or in default present special tax issues for the Fund. Tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities and how payments received on obligations in default should be allocated between principal and income, and whether exchanges of debt obligations in a workout context are taxable. These and other issues will be addressed by the Fund if it acquires such obligations in order to reduce the risk of

distributing insufficient income to preserve its status as a regulated investment company and to seek to avoid becoming subject to federal income or excise tax.

The Fund is required to accrue income on any debt securities that have more than a *de minimis* amount of original issue discount (or debt securities acquired at a market discount, if the Fund elects to include market discount in income currently) prior to the receipt of the corresponding cash payments. The mark to market or constructive sale rules applicable to certain options, futures, forwards, short sales or other transactions also may require the Fund to recognize income or gain without a concurrent receipt of cash. Additionally, some countries restrict repatriation, which may make it difficult or impossible for the Fund to obtain cash corresponding to its earnings or assets in those countries. However, the Fund must distribute to shareholders for each taxable year substantially all of its net income and net capital gains, including such income or gain, to qualify as a regulated investment company and avoid liability for any federal income or excise tax. Therefore, the Fund may have to dispose of its portfolio securities under disadvantageous circumstances to generate cash, or borrow cash, to satisfy these distribution requirements.

The Fund may recognize gain (but not loss) from a constructive sale of certain “appreciated financial positions” if the Fund enters into a short sale, offsetting notional principal contract, or forward contract transaction with respect to the appreciated position or substantially identical property. Appreciated financial positions subject to this constructive sale treatment include interests (including options and forward contracts and short sales) in stock and certain other instruments. Constructive sale treatment does not apply if the transaction is closed out not later than thirty days after the end of the taxable year in which the transaction was initiated, and the underlying appreciated securities position is held unhedged for at least the next sixty days after the hedging transaction is closed.

Gain or loss from a short sale of property generally is considered as capital gain or loss to the extent the property used to close the short sale constitutes a capital asset in the Fund’s hands. Except with respect to certain situations where the property used to close a short sale has a long-term holding period on the date the short sale is entered into, gains on short sales generally are short-term capital gains. A loss on a short sale will be treated as a long-term capital loss if, on the date of the short sale, “substantially identical property” has been held by the Fund for more than one year. In addition, entering into a short sale may result in suspension of the holding period of “substantially identical property” held by the Fund.

Gain or loss on a short sale generally will not be realized until such time as the short sale is closed. However, as described above in the discussion of constructive sales, if the Fund holds a short sale position with respect to securities that have appreciated in value, and it then acquires property that is the same as or substantially identical to the property sold short, the Fund generally will recognize gain on the date it acquires such property as if the short sale were closed on such date with such property. Similarly, if the Fund holds an appreciated financial position with respect to securities and then enters into a short sale with respect to the same or substantially identical property, the Fund generally will recognize gain as if the appreciated financial position were sold at its fair market value on the date it enters into the short sale. The subsequent holding period for any appreciated financial position that is subject to these constructive sale rules will be determined as if such position were acquired on the date of the constructive sale.

The Fund’s transactions in futures contracts and options will be subject to special provisions of the Code that, among other things, may affect the character of gains and losses realized by the Fund (*i.e.*, may affect whether gains or losses are ordinary or capital, or short-term or long-term), may accelerate recognition of income to the Fund and may defer Fund losses. These rules could, therefore, affect the character, amount and timing of distributions to shareholders. These provisions also (a) will require the Fund to mark-to-market certain types of the positions in its portfolio (*i.e.*, treat them as if they were closed out), and (b) may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the 90% distribution requirement for qualifying to be taxed as a RIC and the distribution requirement for avoiding excise taxes. The Fund will monitor its transactions, will make the appropriate tax elections and will make the appropriate entries in its books and records when it acquires any futures contract, option or hedged investment in order to mitigate the effect of these rules and prevent disqualification of the Fund from being taxed as a RIC.

For the Fund’s options and futures contracts that qualify as “section 1256 contracts,” Code Section 1256 generally will require any gain or loss arising from the lapse, closing out or exercise of such positions to be treated as 60% long-term and 40% short-term capital gain or loss. In addition, the Fund generally will be required to “mark to market” (*i.e.*, treat as sold for fair market value) each outstanding “section 1256 contract” position at the close of each taxable

year (and on December 31 of each year for excise tax purposes). If a “section 1256 contract” held by the Fund at the end of a taxable year is sold in the following year, the amount of any gain or loss realized on such sale will be adjusted to reflect the gain or loss previously taken into account under the “mark to market” rules. The Fund’s options that do not qualify as “section 1256 contracts” under the Code generally will be treated as equity options governed by Code Section 1234. Pursuant to Code Section 1234, if a written option expires unexercised, the premium received is short-term capital gain to the Fund. If the Fund enters into a closing transaction, the difference between the premium received for writing the option, and the amount paid to close out its position generally is short-term capital gain or loss. If a call option written by the Fund that is not a “section 1256 contract” is cash settled, any resulting gain or loss will be short-term.

The Code contains special rules that apply to “straddles,” defined generally as the holding of “offsetting positions with respect to personal property.” For example, the straddle rules normally apply when a taxpayer holds stock and an offsetting option with respect to such stock or substantially identical stock or securities. In general, investment positions will be offsetting if there is a substantial diminution in the risk of loss from holding one position by reason of holding one or more other positions. If two or more positions constitute a straddle, recognition of a realized loss from one position generally must be deferred to the extent of unrecognized gain in an offsetting position. In addition, long-term capital gain may be recharacterized as short-term capital gain, or short-term capital loss as long-term capital loss. Interest and other carrying charges allocable to personal property that is part of a straddle are not currently deductible but must instead be capitalized. Similarly, “wash sale” rules apply to prevent the recognition of loss by the Fund from the disposition of stock or securities at a loss in a case in which identical or substantially identical stock or securities (or an option to acquire such property) is or has been acquired within a prescribed period.

The Code allows a taxpayer to elect to offset gain and loss from positions that are part of a “mixed straddle.” A “mixed straddle” is any straddle in which one or more but not all positions are “section 1256 contracts.” The Fund may be eligible to elect to establish one or more mixed straddle accounts for certain of its mixed straddle trading positions. The mixed straddle account rules require a daily “marking to market” of all open positions in the account and a daily netting of gain and loss from all positions in the account. At the end of a taxable year, the annual net gain or loss from the mixed straddle account are recognized for tax purposes. The net capital gain or loss is treated as 60% long-term and 40% short-term capital gain or loss if attributable to the “section 1256 contract” positions, or all short-term capital gain or loss if attributable to the non-section 1256 contract positions.

Further, certain of the Fund’s investment practices are subject to special and complex U.S. federal income tax provisions that may, among other things, (i) convert dividends that would otherwise constitute qualified dividend income into short-term capital gain or ordinary income taxed at the higher rate applicable to ordinary income, (ii) treat dividends that would otherwise be eligible for the corporate dividends received deduction as ineligible for such treatment, (iii) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (iv) convert long-term capital gain into short-term capital gain or ordinary income, (v) convert an ordinary loss or deduction into a capital loss (the deductibility of which is more limited), (vi) cause the Fund to recognize income or gain without a corresponding receipt of cash, (vii) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (viii) adversely alter the characterization of certain complex financial transactions, and (ix) produce income that will not qualify as good income for purposes of the 90% annual gross income requirement described above. While it may not always be successful in doing so, the Fund will seek to avoid or minimize any adverse tax consequences of its investment practices.

Dividends and interest received, and gains realized, by the Fund on foreign securities may be subject to income, withholding or other taxes imposed by foreign countries and United States possessions (collectively “foreign taxes”) that would reduce the return on its securities. Tax conventions between certain countries and the United States, however, may reduce or eliminate foreign taxes, and many foreign countries do not impose taxes on capital gains in respect of investments by U.S. investors. Depending on the number of foreign shareholders in the Fund, however, such reduced foreign withholding tax rates may not be available for investments in certain jurisdictions.

The Fund may invest in the stock of “passive foreign investment companies” (“PFICs”). A PFIC is any foreign corporation (with certain exceptions) that, in general, meets either of the following tests: (1) at least 75% of its gross income is passive or (2) an average of at least 50% of its assets produce, or are held for the production of, passive income. Under certain circumstances, the Fund will be subject to U.S. federal income tax on a portion of any “excess distribution” received on the stock of a PFIC or of any gain from disposition of that stock (collectively “PFIC

income”), plus interest thereon, even if the Fund distributes the PFIC income as a taxable dividend to its shareholders. The balance of the PFIC income will be included in the Fund’s investment company taxable income and, accordingly, will not be taxable to it to the extent it distributes that income to its shareholders.

If the Fund invests in a PFIC and elects to treat the PFIC as a “qualified electing fund” (“QEF”), then in lieu of the foregoing tax and interest obligation, the Fund will be required to include in income each year its *pro rata* share of the QEF’s annual ordinary earnings and net capital gain—which it may have to distribute to satisfy the distribution requirement and avoid imposition of the excise tax—even if the QEF does not distribute those earnings and gain to the Fund. In most instances it will be very difficult, if not impossible, to make this election because of certain of its requirements.

The Fund may elect to “mark-to-market” its stock in any PFIC. “Marking-to-market,” in this context, means including in ordinary income each taxable year the excess, if any, of the fair market value of a PFIC’s stock over the Fund’s adjusted basis therein as of the end of that year. Pursuant to the election, the Fund also would be allowed to deduct (as an ordinary, not capital, loss) the excess, if any, of its adjusted basis in PFIC stock over the fair market value thereof as of the taxable year-end, but only to the extent of any net mark-to-market gains (reduced by any prior deductions) with respect to that stock included by the Fund for prior taxable years under the election. The Fund’s adjusted basis in each PFIC’s stock with respect to which it has made this election will be adjusted to reflect the amounts of income included and deductions taken thereunder. The reduced rates for “qualified dividend income” are not applicable to (i) dividends paid by a foreign corporation that is a PFIC, (ii) income inclusions from a QEF election with respect to a PFIC, and (iii) ordinary income from a “mark-to-market” election with respect to a PFIC.

The Fund may invest a portion of its assets in one or more subsidiaries organized outside of the United States (each, a “Non-US Subsidiary”). A foreign corporation, such as a Non-US Subsidiary, generally is not subject to federal income tax unless it is engaged in the conduct of a trade or business in the United States. Many of a Non-US Subsidiary’s investments will be outside of the United States. With respect to its investments in the United States, a Non-US Subsidiary intends to operate in a manner that is expected to meet the requirements of a safe harbor under section 864(b)(2) of the Code, under which it may trade in stocks or securities or certain commodities for its own account without being deemed to be engaged in a U.S. trade or business. If, however, certain of a Non-US Subsidiary’s activities did not meet those safe harbor requirements, it might be considered as engaging in such a trade or business. Even if a Non-US Subsidiary is not so engaged, it may be subject to a withholding tax at a rate of 30% on some portion of its U.S.-source gross income that is not effectively connected with the conduct of a U.S. trade or business.

A Non-US Subsidiary will be treated as a controlled foreign corporation (a “CFC”), and the Fund will be a “United States shareholder” thereof. As a result, the Fund will be required to include in its gross income each taxable year all of a Non-US Subsidiary’s “subpart F income” and its “GILTI” income. It is expected that much of each Non-US Subsidiary’s income will be “subpart F income.” If a Non-US Subsidiary realizes a net loss, that loss generally will not be available to offset the Fund’s income. The Fund’s inclusion of a Non-US Subsidiary’s ‘subpart F income’ in its gross income will increase the Fund’s tax basis in its shares of the Non-US Subsidiary. Distributions by the Subsidiary to the Fund will not be taxable to the extent of its previously undistributed “subpart F income” and will reduce the Fund’s tax basis in those shares. A Non-U.S. Subsidiary may be subject to foreign withholding taxes or income taxes on its income or gains.

Although income from certain asset based investments held by a Non-US Subsidiary would not be qualifying income if received directly by the Fund, the Code provides that a RIC’s “subpart F income” inclusions will be treated as qualifying income if the CFC distributes such income to the RIC during the year of inclusion. Further, the IRS has issued Regulations providing that the annual net profit, if any, realized by a Non-US Subsidiary in which the Fund invests as part of its business of investing in stock or securities and included in the Fund’s income under the subpart F rules will constitute “qualifying income” for purposes of remaining qualified as a RIC whether or not the included income is distributed by a Non-US Subsidiary to the Fund.

For U.S. federal income tax purposes, a Non-US Subsidiary is treated as a corporation. A Non-US Subsidiary would be subject to U.S. federal income tax, at the 21% rate currently applicable to U.S. corporations, on its net income that is treated as “effectively connected” with the conduct of a trade or business in the United States (“effectively connected income”). In addition, a Non-US Subsidiary would be subject to a 30% U.S. branch profits tax in respect of its “dividend equivalent amount,” as defined in Section 884 of the Code, attributable to effectively connected income.

The Fund expects that, in general, the activities of each Non-US Subsidiary will be conducted in a manner such that the Non-US Subsidiary will not be treated as engaged in the conduct of a U.S. trade or business. There can be no assurance, however, that a Non-US Subsidiary will not recognize any effectively connected income. The imposition of U.S. federal tax on a Non-US Subsidiary's effectively connected income could significantly reduce the Fund's returns.

The federal income tax treatment of the Fund's income from a Non-US Subsidiary also may be adversely affected by future legislation, Regulations, and/or other guidance that could affect the character, timing of recognition, and/or amount of the Fund's taxable income and/or net capital gains and, therefore, the distributions it makes.

Income from certain asset based investments will not be qualifying income if received by the Fund and, in some cases, income from those investments also would result in "effectively connected income" if received by a Non-US Subsidiary. For that reason, certain investments may be held by the Fund indirectly through one or more subsidiaries organized in the United States (each, a "Domestic Subsidiary"). A Domestic Subsidiary would be subject to U.S. federal income tax, at the 21% rate currently applicable to U.S. corporations, on its net income and gains, as well as any applicable state income tax. Dividends paid by a Domestic Subsidiary to the Fund would be qualifying income for the Fund.

The RIC diversification requirements provide that not more than 25% of the value of the Fund's total assets can be invested (x) in securities (other than U.S. government securities or securities of other RICs) of any one issuer or of two or more issuers that the Fund controls and that are engaged in the same, similar or related trades or businesses. As a result, the Fund's total investment in certain Non-US Subsidiaries and Domestic Subsidiaries that are engaged in the same, similar or related trades or business is limited to no more than 25% of the value of the Fund's total assets.

Under Section 988 of the Code, gains or losses attributable to fluctuations in exchange rates between the time the Fund accrues income or receivables or expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such income or receivables or pays such liabilities generally are treated as ordinary income or loss. Similarly, gains or losses on foreign currency forward contracts and the disposition of debt securities denominated in a foreign currency, to the extent attributable to fluctuations in exchange rate between the acquisition and disposition dates, also are treated as ordinary income or loss.

If a shareholder realizes a loss on disposition of the Fund's shares of \$2 million or more in any single taxable year (or \$4 million or more in any combination of taxable years in which the transaction is entered into and the five succeeding taxable years) for an individual shareholder, corporation or Trust or \$10 million or more in any single taxable year (or \$20 million or more in any combination of taxable years in which the transaction is entered into and the five succeeding taxable years) for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Amounts paid by the Fund to individuals and certain other shareholders who have not provided the Fund with their correct taxpayer identification number ("TIN") and certain certifications required by the IRS as well as shareholders with respect to whom the Fund has received certain information from the IRS or a broker may be subject to "backup" withholding of U.S. federal income tax arising from the Fund's taxable dividends and other distributions as well as the gross proceeds of sales of shares, at a rate of 24%. An individual's TIN generally is his or her social security number. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from payments made to a shareholder may be refunded or credited against such shareholder's U.S. federal income tax liability, if any; provided that the required information is furnished to the IRS.

Distributions will not be subject to backup withholding to the extent they are subject to the withholding tax on foreign persons described in the next paragraph.

Dividend distributions are in general subject to a U.S. withholding tax of 30% when paid to a nonresident alien individual, foreign estate or trust, a foreign corporation, or a foreign partnership ("foreign shareholder"). Persons who are resident in a country, such as the U.K., that has an income tax treaty with the U.S. may be eligible for a reduced

withholding rate (upon filing of appropriate forms), and are urged to consult their tax advisors regarding the applicability and effect of such a treaty. Distributions of capital gain dividends paid by the Fund to a foreign shareholder, and any gain realized upon the sale of Fund shares by such a shareholder, will ordinarily not be subject to U.S. taxation, unless the recipient or seller is a nonresident alien individual who is present in the United States for more than 182 days during the taxable year. Such distributions and sale proceeds may be subject, however, to backup withholding, unless the foreign investor certifies his non-U.S. residency status. Also, foreign shareholders with respect to whom income from the Fund is “effectively connected” with a U.S. trade or business carried on by such shareholder will in general be subject to U.S. federal income tax on a net basis on the income derived from the Fund at the graduated rates applicable to U.S. citizens, residents or domestic corporations, whether such income is received in cash or reinvested in shares, and, in the case of a foreign corporation, also may be subject to a branch profits tax. Properly-designated dividends are generally exempt from U.S. federal withholding tax where they are (i) “interest-related dividends” paid in respect of the Fund’s “qualified net interest income” (generally, the Fund’s U.S. source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which the Fund is at least a 10% shareholder, reduced by expenses that are allocable to such income) or (ii) “short-term capital gain dividends” paid in respect of the Fund’s “qualified short-term gains” (generally, the excess of the Fund’s net short-term capital gain over the Fund’s long-term capital loss for such taxable year). Depending on its circumstances, the Fund may designate all, some or none of its potentially eligible dividends as such interest-related dividends or as short-term capital gain dividends and/or treat such dividends, in whole or in part, as ineligible for this exemption from withholding. The Fund’s capital gain distributions are also exempt from such withholding. Foreign shareholders who are residents in a country with an income tax treaty with the United States may obtain different tax results, and are urged to consult their tax advisors.

The Foreign Account Tax Compliance Act (FATCA), imposes a 30% U.S. withholding tax on certain U.S. source payments, including interest (even if the interest is otherwise exempt from the withholding rules described above), dividends and other fixed or determinable annual or periodical income (“Withholdable Payments”), if paid to a foreign financial institution, unless such institution registers with the IRS and enters into an agreement with the IRS or a governmental authority in its own jurisdiction to collect and provide substantial information regarding U.S. account holders, including certain account holders that are foreign entities with U.S. owners, with such institution. The legislation also generally imposes a withholding tax of 30% on Withholdable Payments made to a non-financial foreign entity unless such entity provides the withholding agent with a certification that it does not have any substantial U.S. owners or a certification identifying the direct and indirect substantial U.S. owners of the entity. These withholding and reporting requirements generally apply to income payments made after June 30, 2014. A withholding tax that would apply to the gross proceeds from the disposition of certain investment property and that was scheduled to go into effect in 2019 would be eliminated by proposed regulations (having an immediate effect while pending). Holders are urged to consult with their own tax advisors regarding the possible implications of this recently enacted legislation on their investment in the Fund.

The foregoing briefly summarizes some of the important U.S. federal income tax consequences to Common Shareholders of investing in Common Shares, reflects U.S. federal tax law as of the date of this SAI, and does not address special tax rules applicable to certain types of investors, such as corporate and foreign investors. Unless otherwise noted, this discussion assumes that an investor is a United States person and holds Common Shares as a capital asset. This discussion is based upon present provisions of the Code, the regulations promulgated thereunder, and judicial and administrative ruling authorities, all of which are subject to change or differing interpretations by the courts or the IRS retroactively or prospectively. Investors should consult their tax advisors regarding other U.S. federal, state or local tax considerations that may be applicable to their particular circumstances, as well as any proposed tax law changes.

#### **OTHER INFORMATION**

The Fund is an organization of the type commonly known as a “Massachusetts business trust.” Under Massachusetts law, shareholders of such a trust may, in certain circumstances, be held personally liable as partners for the obligations of the trust. The Declaration of Trust contains an express disclaimer of shareholder liability in connection with Fund property or the acts, obligations or affairs of the Fund. The Declaration of Trust also provides for indemnification out of Fund property of any shareholder held personally liable for the claims and liabilities to which a shareholder may become subject by sole reason of being or having been a shareholder. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund itself is unable to meet its obligations. The Fund has been advised by its counsel that the risk of any shareholder incurring any liability for the

obligations of the Fund is remote.

The Declaration of Trust provides that the Trustees will not be liable for errors of judgment or mistakes of fact or law; but nothing in the Declaration of Trust protects a Trustee against any liability to the Fund or its shareholders to which he or she would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of his or her office. Voting rights are not cumulative with respect to the election of Trustees, which means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees and, in such event, the holders of the remaining less than 50% of the shares voting on the matter will not be able to elect any Trustees.

The foregoing description of the Declaration of Trust and By-Laws are qualified in their entirety by the full text of the Declaration of Trust and By-Laws, each effective as of September 27, 2021, which is available by writing to the Secretary of the Fund at 200 Berkeley Street, Boston, Massachusetts 02116, and are available on the SEC's website. The Declaration of Trust also is available on the Secretary of the Commonwealth of Massachusetts' website.

#### **CUSTODIAN AND TRANSFER AGENT**

State Street Bank and Trust Company ("State Street") located at One Lincoln Street, Boston, Massachusetts 02111, currently acts as custodian, transfer agent and dividend paying agent with respect to the Fund's assets. State Street has selected various banks and trust companies in foreign countries to maintain custody of certain foreign securities. The Fund also may use special purpose custodian banks from time to time for certain assets. State Street is authorized to use the facilities of the Depository Trust Company, the Participants Trust Company and the book-entry system of the Federal Reserve Banks.

#### **INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

Ernst & Young LLP serves as the independent registered public accounting firm for the Fund.

#### **FINANCIAL STATEMENTS**

The audited Statement of Assets and Liabilities of the Fund dated June 16, 2022, and the related Statement of Operations for the period from September 27, 2021 (date of organization) to June 16, 2022, and the independent registered public accounting firm's report thereon are set forth in the following pages. The Fund sends Shareholders unaudited semiannual and audited annual reports within 60 days after the close of the period covered by the report, or as otherwise required by the 1940 Act.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Trustees of John Hancock Asset-Based Lending Fund

### Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of John Hancock Asset-Based Lending Fund (the "Fund") as of June 16, 2022, and the related statement of operations for the period from September 27, 2021 (date of organization) to June 16, 2022 and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund at June 16, 2022, and the results of its operations for the period from September 27, 2021 (date of organization) to June 16, 2022, in conformity with U.S. generally accepted accounting principles.

### Basis for Opinion

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of the Fund's internal control over financial reporting. As part of our audit, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the auditor of one or more John Hancock Investment Companies since 2019.

## NOTES TO FINANCIAL STATEMENTS

### Note 1. Organization

John Hancock Asset-Based Lending Fund (the Fund) is a continuously offered, non-diversified, closed-end management investment company organized as a Massachusetts business trust on September 27, 2021. The Fund has had no operations to date other than matters relating to its organization under the Investment Company Act of 1940, as amended, and the sale and issuance of 5,000 of its Class I shares of beneficial interest to the initial shareholders, split evenly between John Hancock Life Insurance Company, USA (JHLIC), and Manulife Reinsurance (Bermuda) Ltd, at the initial subscription price of \$20.00.

The Fund will not list the shares on any securities exchange. At the sole discretion of the Board and provided that it is in the best interests of the Fund and shareholders to do so, the Fund intends to provide a limited degree of liquidity to the shareholders by conducting repurchase offers generally quarterly; however, there can be no assurance that any such tender offers will be conducted on a quarterly basis or at all. The Fund currently does not intend to offer to repurchase shares at any time during the first two years of operations of the Fund.

### Note 2. Significant Accounting Policies

**Use of Estimates**—The financial statements will be prepared in conformity with accounting principles generally accepted in the United States of America (“US GAAP”), which require management to make certain estimates and assumptions as of the date of the financial statements. Actual results could differ from those estimates and those differences could be significant. The fund intends to qualify as an investment company under Topic 946 of Accounting Standards Codification of US GAAP. Events or transactions occurring after the end of the period through the date that the financial statements were issued have been evaluated in the preparation of the financial statements.

**Federal Income Taxes**—The Fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended. By so qualifying, the Fund will not be subject to US Federal income taxes to the extent it distributes all of its taxable income and net realized gains, if any, for its fiscal year. Therefore, no Federal income tax provision will be required.

**Organization Expenses and Offering Costs**— Organization expenses and offering costs were recorded as a Fund expense as incurred and such costs were paid by the Advisor. It is anticipated that the Fund will reimburse the Advisor for these costs following the commencement of investment operations. Offering costs are estimated to be approximately \$552,000 and are accounted for as a deferred charge by the Fund and will be amortized to expense over 12 months from the commencement of investment operations.

### Note 3. Agreements and Transactions with Related Parties

The Fund has entered into an advisory agreement with John Hancock Investment Management LLC (the Advisor). John Hancock Investment Management Distributors LLC (the Distributor), an affiliate of the Advisor, acts as the distributor of shares. The Advisor and the Distributor are indirect, principally owned subsidiaries of John Hancock Life Insurance Company (U.S.A.), which in turn is a subsidiary of MFC. The Advisor has engaged Marathon Asset Management LP (the Subadvisor) to serve as a subadvisor to the Fund. The Subadvisor will be responsible for the day-to-day management of the Fund’s portfolio investments. The Advisor does not itself manage the Fund’s portfolio assets but has ultimate responsibility to oversee the Subadvisor.

**Management Fee** — The Fund has agreed to pay the Advisor as compensation under the Advisory Agreement a fee, calculated and paid monthly, at an annual rate of 1.35% of the Fund’s average monthly value of the Managed Assets. Managed Assets means the total assets of the Fund (including any assets attributable to any preferred shares that may

be issued or to indebtedness), minus the Fund's liabilities incurred in the normal course of operations other than liabilities relating to indebtedness. Pursuant to a subadvisory agreement, the Advisor (and not the Fund) has agreed to pay a subadvisory fee directly to Marathon Asset Management LP.

**Incentive Fee** — The Fund also has agreed to pay the Advisor an Incentive Fee based upon pre-incentive fee net investment income starting in 2023.

**Expense limitation agreement** — The Advisor contractually agrees to reduce its Management Fee for the Fund or, if necessary, make payment to the Fund, in an amount equal to the amount by which the following expenses of the Fund, incurred in the ordinary course of the Fund's business, exceed 0.60% percent of average monthly net assets (on an annualized basis) of the Fund: (a) administrative fees; (b) custody and accounting fees; (c) audit fees; (d) legal fees; (e) independent trustee fees; (f) valuation fees; (g) blue sky fees; (h) insurance premiums; (i) printing costs; (j) registration and filing expenses; (k) organizational and offering expenses; (l) transfer agent fees and service fees; and (m) other miscellaneous ordinary expenses, but excluding any cashiering or other investment servicing fees. This agreement expires on February 28, 2024, unless renewed by mutual agreement of the advisor and the fund based upon a determination that this is appropriate under the circumstances at that time.

The Advisor also contractually agrees to waive a portion of its Management Fee and/or reimburse expenses for the Fund and certain other John Hancock funds according to an asset level breakpoint schedule that is based on the aggregate net assets of all the funds participating in the waiver or reimbursement. This waiver is allocated proportionally among the participating funds. This agreement expires on July 31, 2024, unless renewed by mutual agreement of the Fund and the Advisor based upon a determination that this is appropriate under the circumstances at that time.

The expense reductions described above amounted to \$707,865 for the period ended June 16, 2022. Expenses waived or reimbursed in the current fiscal period are not subject to recapture in future fiscal periods.

**Accounting and legal Service Fee** — The Fund also has entered into a service agreement with the Advisor, under which the Advisor is responsible for providing, at the expense of the Fund, certain financial, accounting, and administrative services such as legal services, tax, accounting, valuation, financial reporting, and performance, compliance, and service oversight. The Fund shall reimburse the Advisor for all expenses associated with providing all such accounting and administrative services.

#### **Note 4. Shares of Beneficial Interest**

At June 16, 2022, affiliates of the Fund owned 100% of the shares of beneficial interest outstanding. JHLIC and Manulife Reinsurance (Bermuda) Ltd each owned 2,500 shares of Class I.

#### **Note 5. Guarantees and indemnifications**

Under the Trust's organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. The risk of material loss from such claims is considered remote.

## APPENDIX A

### DESCRIPTION OF BOND RATINGS

#### DESCRIPTIONS OF CREDIT RATING SYMBOLS AND DEFINITIONS

The ratings of Moody's Investors Service, Inc. ("Moody's"), S&P Global Ratings, Fitch Ratings ("Fitch"), Kroll Bond Rating Agency ("KBRA") and DBRS Morningstar represent their respective opinions as of the date they are expressed and not statements of fact as to the quality of various long-term and short-term debt instruments they undertake to rate. It should be emphasized that ratings are general and are not absolute standards of quality. Consequently, debt instruments with the same maturity, coupon and rating may have different yields while debt instruments of the same maturity and coupon with different ratings may have the same yield.

Ratings do not constitute recommendations to buy, sell, or hold any security, nor do they comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of any payments of any security.

#### IN GENERAL

**Moody's.** Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities.

Note that the content of this Appendix A, to the extent that it relates to the ratings determined by Moody's, is derived directly from Moody's electronic publication of "Ratings Symbols and Definitions" which is available at: [https://www.moody.com/researchdocumentcontentpage.aspx?docid=PBC\\_79004](https://www.moody.com/researchdocumentcontentpage.aspx?docid=PBC_79004).

**S&P Global Ratings.** An S&P Global Ratings issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings' view of the obligor's capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue ratings are an assessment of default risk but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy.

Note that the content of this Appendix A, to the extent that it relates to the ratings determined by S&P Global Ratings, is derived directly from S&P Global Ratings' electronic publication of "S&P's Global Ratings Definitions," which is available at: [https://www.standardandpoors.com/en\\_US/web/guest/article/-/view/sourceId/504352](https://www.standardandpoors.com/en_US/web/guest/article/-/view/sourceId/504352).

**Fitch.** Fitch's opinions are forward looking and include Fitch's views of future performance. In many cases, these views on future performance may include forecasts, which may in turn (i) be informed by non-disclosable management projections, (ii) be based on a trend (sector or wider economic cycle) at a certain stage in the cycle, or (iii) be based on historical performance. As a result, while ratings may include cyclical considerations and attempt to assess the likelihood of repayment at "ultimate/final maturity," material changes in economic conditions and expectations (for a particular issuer) may result in a rating change.

The terms "investment grade" and "speculative grade" have established themselves over time as shorthand to describe the categories 'AAA' to 'BBB' (investment grade) and 'BB' to 'D' (speculative grade). The terms investment grade and speculative grade are market conventions and do not imply any recommendation or endorsement of a specific security for investment purposes. Investment grade categories indicate relatively low to moderate credit risk, while

ratings in the speculative categories either signal a higher level of credit risk or that a default has already occurred. For the convenience of investors, Fitch may also include issues relating to a rated issuer that are not and have not been rated on its web page. Such issues are also denoted as ‘NR’.

Note that the content of this Appendix A, to the extent that it relates to the ratings determined by Fitch, is derived directly from Fitch’s electronic publication of “Definitions of Ratings and Other Forms of Opinion” which is available at: <https://www.fitchratings.com/research/structured-finance/rating-definitions-21-03-2022>.

## **GENERAL PURPOSE RATINGS**

### **LONG-TERM ISSUE RATINGS**

#### **MOODY’S GLOBAL LONG-TERM RATING SCALE**

Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

**Aaa:** Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

**Aa:** Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

**A:** Obligations rated A are considered upper-medium grade and are subject to low credit risk.

**Baa:** Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

**Ba:** Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

**B:** Obligations rated B are considered speculative and are subject to high credit risk.

**Caa:** Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

**Ca:** Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

**C:** Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

**Note: Addition of a Modifier 1, 2 or 3:** Moody’s appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a “(hyb)” indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment.

Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

## **S&P GLOBAL RATINGS LONG-TERM ISSUE CREDIT RATINGS**

Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

**AAA:** An obligation rated 'AAA' has the highest rating assigned by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

**AA:** An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

**A:** An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

**BBB:** An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments on the obligation.

**BB, B, CCC, CC and C:** Obligations rated 'BB', 'B', 'CCC', 'CC' and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

**BB:** An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

**B:** An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments on the obligation.

**CCC:** An obligation rated 'CCC' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

**CC:** An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

**C:** An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

**D:** An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

**Note: Addition of a Plus (+) or minus (-) sign:** The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

**Dual Ratings** – Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, ‘AAA/A-1+’ or ‘A-1+/A-1’). With U. S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, ‘SP-1+/A-1+’).

## **FITCH CORPORATE FINANCE OBLIGATIONS – LONG-TERM RATING SCALES**

Ratings of individual securities or financial obligations of a corporate issuer address relative vulnerability to default on an ordinal scale. In addition, for financial obligations in corporate finance, a measure of recovery given default on that liability is also included in the rating assessment. This notably applies to covered bond ratings, which incorporate both an indication of the probability of default and of the recovery given a default of this debt instrument.

**AAA: Highest credit quality.** ‘AAA’ ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

**AA: Very high credit quality.** ‘AA’ ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

**A: High credit quality.** ‘A’ ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

**BBB: Good credit quality.** ‘BBB’ ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

**BB: Speculative.** ‘BB’ ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

**B: Highly speculative.** ‘B’ ratings indicate that material credit risk is present.

**CCC: Substantial credit risk.** “CCC” ratings indicate that substantial credit risk is present.

**CC: Very high levels of credit risk.** “CC” ratings indicate very high levels of credit risk.

**C: Exceptionally high levels of credit risk.** “C” indicates exceptionally high levels of credit risk.

Corporate finance defaulted obligations typically are not assigned ‘RD’ or ‘D’ ratings but are instead rated in the ‘CCC’ to ‘C’ rating categories, depending on their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

**Note: Addition of a Plus (+) or minus (-) sign:** Within rating categories, Fitch may use modifiers. The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. For example, the rating category ‘AA’ has three notch-specific rating levels (‘AA+’; ‘AA’; ‘AA-’; each a rating level). Such suffixes are not added to ‘AAA’ ratings and ratings below the ‘CCC’ category. For the short-term rating category of ‘F1’, a ‘+’ may be appended. For Viability Ratings, the modifiers ‘+’ or ‘-’ may be appended to a rating to denote relative status within categories from ‘aa’ to ‘ccc’.

## **CORPORATE AND TAX-EXEMPT COMMERCIAL PAPER RATINGS**

## **SHORT-TERM ISSUE RATINGS**

### **MOODY'S GLOBAL SHORT-TERM RATING SCALE**

Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect both the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

**P-1:** Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

**P-2:** Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

**P-3:** Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

**NP:** Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

The following indicates the long-term ratings consistent with different short-term ratings when such long-term ratings exist. (Note: Structured finance short-term ratings are usually based either on the short-term rating of a support provider or on an assessment of cash flows available to retire the financial obligation).

### **S&P'S SHORT-TERM ISSUE CREDIT RATINGS**

S&P Global Ratings' short-term ratings are generally assigned to those obligations considered short-term in the relevant market. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium term notes are assigned long-term ratings. Ratings are graded into several categories, ranging from 'A' for the highest-quality obligations to 'D' for the lowest. These categories are as follows:

**A-1:** A short-term obligation rated 'A-1' is rated in the highest category by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitments on these obligations is extremely strong.

**A-2:** A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitments on the obligation is satisfactory.

**A-3:** A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor's capacity to meet its financial commitments on the obligation.

**B:** A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor's inadequate capacity to meet its financial commitments.

**C:** A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

**D:** A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty,

for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

**Dual Ratings** - Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, 'AAA/A-1+' or 'A-1+/A-1'). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, 'SP-1+/A-1+').

### **FITCH'S SHORT-TERM ISSUER OR OBLIGATION RATINGS**

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term deposit ratings may be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as "short term" based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

**F1:** Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added ("+") to denote any exceptionally strong credit feature.

**F2:** Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

**F3:** Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

**B:** Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

**C:** High short-term default risk. Default is a real possibility.

**RD:** Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

**D:** Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

### **TAX-EXEMPT NOTE RATINGS**

### **MOODY'S U.S. MUNICIPAL SHORT-TERM DEBT RATINGS**

While the global short-term 'prime' rating scale is applied to US municipal tax-exempt commercial A-8 paper, these programs are typically backed by external letters of credit or liquidity facilities and their short-term prime ratings usually map to the long-term rating of the enhancing bank or financial institution and not to the municipality's rating. Other short-term municipal obligations, which generally have different funding sources for repayment, are rated using two additional short-term rating scales (i.e., the MIG and VMIG scale discussed below).

The Municipal Investment Grade (MIG) scale is used to rate US municipal bond anticipation notes of up to five years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels—MIG 1 through MIG 3—while speculative grade short-term obligations are designated SG.

**MIG 1:** This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

**MIG 2:** This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

**MIG 3:** This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

**SG:** This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Variable Municipal Investment Grade (VMIG) ratings of demand obligations with unconditional liquidity support are mapped from the short-term debt rating (or counterparty assessment) of the support provider, or the underlying obligor in the absence of third party liquidity support, with VMIG 1 corresponding to P-1, VMIG 2 to P-2, VMIG 3 to P-3 and SG to not prime. For example, the VMIG rating for an industrial revenue bond with Company XYZ as the underlying obligor would normally have the same numerical modifier as Company XYZ's prime rating. Transitions of VMIG ratings of demand obligations with conditional liquidity support, as shown in the diagram below, differ from transitions on the Prime scale to reflect the risk that external liquidity support will terminate if the issuer's long-term rating drops below investment grade.

**VMIG 1:** This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

**VMIG 2:** This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

**VMIG 3:** This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

**SG:** This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

\* For VRDBs supported with conditional liquidity support, short-term ratings transition down at higher long-term ratings to reflect the risk of termination of liquidity support as a result of a downgrade below investment grade. VMIG ratings of VRDBs with unconditional liquidity support reflect the short-term debt rating (or counterparty assessment) of the liquidity support provider with VMIG 1 corresponding to P-1, VMIG 2 to P-2, VMIG 3 to P-3 and SG to not prime.

For more complete discussion of these rating transitions, please see Annex B of Moody's Methodology titled Variable Rate Instruments Supported by Conditional Liquidity Facilities.

## **S&P'S GLOBAL RATINGS' MUNICIPAL SHORT-TERM NOTE RATINGS**

### **MUNICIPAL SHORT-TERM NOTE RATINGS**

An S&P Global Ratings municipal note rating reflects S&P Global Ratings' opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings' analysis will review the following considerations:

- Amortization schedule – the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment – the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

**SP-1:** Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

**SP-2:** Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

**SP-3:** Speculative capacity to pay principal and interest.

**D:** 'D' is assigned upon failure to pay the note when due, completion of a distressed exchange offer, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

### **FITCH PUBLIC FINANCE RATINGS**

See FITCH SHORT-TERM ISSUER OR OBLIGATIONS RATINGS above.

### **KROLL - LONG-TERM CREDI RATINGS**

Kroll Bond Rating Agency ("KBRA") assigns credit ratings to issuers and their obligations using the same rating scale. In either case, KBRA's ratings are intended to reflect both the probability of default and severity of loss in the event of default, with greater emphasis on probability of default at higher rating categories. For obligations, the determination of expected loss severity is, among other things, a function of the seniority of the claim. Generally speaking, issuer-level ratings assume a loss severity consistent with a senior unsecured claim. KBRA appends an (sf) indicator to ratings assigned to structured obligations. These definitions should be used in conjunction with KBRA's rating methodologies.

AAA	Determined to have almost no risk of loss due to credit-related events. Assigned only to the very highest quality obligors and obligations able to survive extremely challenging economic events.
AA	Determined to have minimal risk of loss due to credit-related events. Such obligors and obligations are deemed very high quality.
A	Determined to be of high quality with a small risk of loss due to credit-related events.

	Issuers and obligations in this category are expected to weather difficult times with low credit losses.
BBB	Determined to be of medium quality with some risk of loss due to credit-related events. Such issuers and obligations may experience credit losses during stressed environments.
BB	Determined to be of low quality with moderate risk of loss due to credit-related events. Such issuers and obligations have fundamental weaknesses that create moderate credit risk.
B	Determined to be of very low quality with high risk of loss due to credit-related events. These issuers and obligations contain many fundamental shortcomings that create significant credit risk.
CCC	Determined to be at substantial risk of loss due to credit-related events, near default, or in default with high recovery expectations.
CC	Determined to be near default or in default with average recovery expectations.
C	Determined to be near default or in default with low recovery expectations.

KBRA defines default as occurring if:

- |   |   |
|---|---|
| D | <ol style="list-style-type: none"> <li>1. There is a missed interest payment, principal payment, or preferred dividend payment, as applicable, on a rated obligation which is unlikely to be recovered.</li> <li>2. The rated entity files for protection from creditors, is placed into receivership, or is closed by regulators such that a missed payment is likely to result.</li> <li>3. The rated entity seeks and completes a distressed exchange, where existing rated obligations are replaced by new obligations with a diminished economic value.</li> </ol> |
|---|---|

KBRA may append - or + modifiers to ratings in categories AA through CCC to indicate, respectively, upper and lower risk levels within the broader category.

### **DBRS MORNINGSTAR**

DBRS Morningstar has several rating scales related to credit ratings which are described on DBRS Morningstar's website: [dbrsmorningstar.com/understanding-ratings](http://dbrsmorningstar.com/understanding-ratings)

## APPENDIX B

### PROXY VOTING POLICIES

#### JOHN HANCOCK ASSET-BASED LENDING FUND PROXY VOTING POLICIES AND PROCEDURES

##### Overview

The Fund is required to disclose its proxy voting policies and procedures in its registration statement and, pursuant to Rule 30b1-4 under the 1940 Act, file annually with the Securities and Exchange Commission and make available to shareholders its actual proxy voting record.

##### Investment Company Act

An investment company is required to disclose in its SAI either (a) a summary of the policies and procedures that it uses to determine how to vote proxies relating to portfolio securities or (b) a copy of its proxy voting policies.

The Fund is also required by Rule 30b1-4 of the Investment Company Act of 1940 to file Form N-PX annually with the SEC, which contains a record of how the Fund voted proxies relating to portfolio securities. For each matter relating to a portfolio security considered at any shareholder meeting, Form N-PX is required to include, among other information, the name of the issuer of the security, a brief identification of the matter voted on, whether and how the Fund cast its vote, and whether such vote was for or against management. In addition, the Fund is required to disclose in its SAI and its annual and semi-annual reports to shareholders that such voting record may be obtained by shareholders, either by calling a toll-free number or through the Fund's website, at the Fund's option.

##### Advisers Act

Under Advisers Act Rule 206(4)-6, investment advisers are required to adopt proxy voting policies and procedures, and investment companies typically rely on the policies of their advisers or sub-advisers.

##### Policy

The Majority of the Independent Board of Trustees (the "Board") of the Fund, has adopted these proxy voting policies and procedures (the "Fund Proxy Policy").

It is the Adviser's policy to comply with Rule 206(4)-6 of the Advisers Act and Rule 30b1-4 of the 1940 Act as described above. In general, the Adviser defers proxy voting decisions to the Sub-adviser. It is the policy of the Fund to delegate the responsibility for voting proxies to the Adviser or, if the Fund's Adviser has delegated portfolio management responsibilities to the Sub-adviser, to the Sub-adviser(s), subject to the Board's continued oversight. The Sub-adviser shall vote all proxies relating to securities held by the Fund and in that connection, and subject to any further policies and procedures contained herein, shall use proxy voting policies and procedures adopted by the Sub-adviser in conformance with Rule 206(4)-6 under the Advisers Act.

If an instance occurs where a conflict of interest arises between the shareholders and the Sub-adviser, however, the Adviser retains the right to influence and/or direct the conflicting proxy voting decisions in the best interest of shareholders.

##### Delegation of Proxy Voting Responsibilities

It is the policy of the Fund to delegate the responsibility for voting proxies relating to portfolio securities held by the Fund to the Adviser or, if the Adviser has delegated portfolio management responsibilities to the Sub-adviser, to the Sub-adviser(s), subject to the Board's continued oversight. The Sub-adviser shall vote all proxies relating to securities held by the Fund and in that connection, and subject to any further policies and procedures

contained herein, shall use proxy voting policies and procedures adopted by the Sub-adviser in conformance with Rule 206(4)-6 under the Investment Advisers Act of 1940, as amended (the “Advisers Act”).

Except as noted below under Material Conflicts of Interest, the Fund Proxy Policy shall incorporate that adopted by the Sub-adviser with respect to voting proxies held by its clients (the “Sub-adviser Proxy Policy”). The Sub-adviser Policy, as it may be amended from time to time, is hereby incorporated by reference into the Fund Proxy Policy. The Sub-adviser is directed to comply with these policies and procedures in voting proxies relating to portfolio securities held by the Fund, subject to oversight by the Adviser and by the Board. The Adviser retains the responsibility, and is directed, to oversee the Sub-adviser’s compliance with these policies and procedures, and to adopt and implement such additional policies and procedures as it deems necessary or appropriate to discharge its oversight responsibility. Additionally, the Fund’s Chief Compliance Officer (“CCO”) shall conduct such monitoring and supervisory activities as the CCO or the Board deems necessary or appropriate in order to appropriately discharge the CCO’s role in overseeing the Sub-adviser’s compliance with these policies and procedures.

The delegation by the Board of the authority to vote proxies relating to portfolio securities of the Fund is entirely voluntary and may be revoked by the Board, in whole or in part, at any time.

#### **Material Conflicts of Interest**

If (1) the Sub-adviser becomes aware that a vote presents a material conflict between the interests of (a) shareholders of the Fund; and (b) the Fund’s Adviser, Sub-adviser, principal underwriter, or any of their affiliated persons, and (2) the Sub-adviser does not propose to vote on the particular issue in the manner prescribed by its Sub-adviser Proxy Policy or the material conflict of interest procedures set forth in its Sub-adviser Proxy Policy are otherwise triggered, then the Sub-adviser will follow the material conflict of interest procedures set forth in its Sub-adviser Proxy Policy when voting such proxies.

If the Sub-adviser Proxy Policy provides that in the case of a material conflict of interest between Fund shareholders and another party, the Sub-adviser will ask the Board to provide voting instructions, the Sub-adviser shall vote the proxies, in its discretion, as recommended by an independent third party, in the manner prescribed by its Sub-adviser Proxy Policy or abstain from voting the proxies.

#### **Proxy Voting Committee(s)**

The Adviser will from time to time, and on such temporary or longer-term basis as they deem appropriate, establish one or more Proxy Voting Committees. A Proxy Voting Committee shall include the Adviser’s CCO and may include legal counsel. The terms of reference and the procedures under which a Proxy Voting Committee will operate will be reviewed from time to time by the Legal and Compliance Department. Records of the deliberations and proxy voting recommendations of a Proxy Voting Committee will be maintained in accordance with applicable law, if any, and these Proxy Procedures. Requested shareholder proposals or other Shareholder Advocacy in the name of the Fund must be submitted for consideration pursuant to the Shareholder Advocacy Policy and Procedures.

#### **Disclosure of Proxy Voting Policies and Procedures in the Fund’s Statement of Additional Information (“SAI”)**

The Fund shall include in its SAI a summary of the Fund Proxy Policy and of the Sub-adviser Proxy Policy included therein. (In lieu of including a summary of these policies and procedures, the Fund may include each full Fund Proxy Policy and Sub-adviser Proxy Policy in the SAI.)

#### **Disclosure of Proxy Voting Policies and Procedures in Annual and Semi-Annual Shareholder Reports**

The Fund shall disclose in annual and semi-annual shareholder reports that a description of the Fund Proxy Policy, including the Sub-adviser Proxy Policy, and the Fund’s proxy voting record for the most recent 12 months ended June 30 are available on the Securities and Exchange Commission’s (“SEC”) website, and without charge, upon request, by calling a specified toll-free telephone number. The Fund will send these documents within three business days of receipt of a request, by first-class mail or other means designed to ensure equally prompt delivery. The Fund Administration Department is responsible for preparing appropriate disclosure regarding proxy voting for inclusion in shareholder reports and distributing reports. The Legal Department supporting the Fund is responsible for reviewing such disclosure once it is prepared by the Fund

Administration Department.

**Filing of Proxy Voting Record on Form N-PX**

The Fund will annually file their complete proxy voting record with the SEC on Form N-PX. The Form N-PX shall be filed for the twelve months ended June 30 no later than August 31 of that year. The Fund Administration department, supported by the Legal Department supporting the Fund, is responsible for the annual filing.

**Regulatory Requirement**

Rule 206(4)-6 of the Advisers Act and Rule 30b1-4 of the 1940 Act

**Reporting**

**Disclosures in SAI:** The Fund shall disclose in annual and semi-annual shareholder reports that a description of the Fund Proxy Policy, including the Sub-adviser Proxy Policy, and the Fund’s proxy voting record for the most recent 12 months ended June 30.

**Form N-PX:** The proxy voting service will file Form N-PX for each twelve-month period ending on June 30. The filing must be submitted to the SEC on or before August 31 of each year.

**Review of Sub-advisers’ Proxy Voting**

The Fund has delegated proxy voting authority with respect to Fund portfolio securities in accordance with the Fund Proxy Policy, as set forth above.

Consistent with this delegation, the Sub-adviser is responsible for the following:

1. Implementing written policies and procedures, in compliance with Rule 206(4)-6 under the Advisers Act, reasonably designed to ensure that the Sub-adviser votes portfolio securities in the best interest of shareholders of the Fund.
2. Providing the Adviser with a copy and description of the Sub-adviser Proxy Policy prior to being approved by the Board as the Sub-adviser, accompanied by a certification that represents that the Sub-adviser Proxy Policy has been adopted in conformance with Rule 206(4)-6 under the Advisers Act. Thereafter, providing the Adviser with notice of any amendment or revision to that Sub-adviser Proxy Policy or with a description thereof. The Adviser is required to report all material changes to a Sub-adviser Proxy Policy quarterly to the Board. The CCO’s annual written compliance report to the Board will contain a summary of the material changes to the Sub-adviser Proxy Policy during the period covered by the report.
3. Providing the Adviser with a quarterly certification indicating that the Sub-adviser did vote proxies of the Fund and that the proxy votes were executed in a manner consistent with the Sub-adviser Proxy Policy. If the Sub-adviser voted any proxies in a manner inconsistent with the Sub-adviser Proxy Policy, the Sub-adviser will provide the Adviser with a report detailing the exceptions.

**Adviser Responsibilities**

The Fund has retained a proxy voting service to coordinate, collect, and maintain all proxy-related information, and to prepare and file the Fund’s reports on Form N-PX with the SEC.

The Adviser, in accordance with their general oversight responsibilities, will periodically review the voting records maintained by the proxy voting service in accordance with the following procedures:

1. Receive a file with the proxy voting information directly from the Sub-adviser on a quarterly basis.
2. Select a sample of proxy votes from the files submitted by the Sub-adviser and compare them against the proxy voting service files for accuracy of the votes.
3. Deliver instructions to shareholders on how to access proxy voting information via the Fund’s semi-annual and annual shareholder reports.

The Fund Administration Department, in conjunction with the Legal Department supporting the Fund, is responsible for the foregoing procedures.

**Proxy Voting Service Responsibilities**

Proxy voting services retained by the Fund are required to undertake the following procedures:

- **Aggregation of Votes:**

The proxy voting service's proxy disclosure system will collect Fund-specific and/or account-level voting records, including votes cast by multiple sub-advisers or third-party voting services.

- **Reporting:**

The proxy voting service's proxy disclosure system will provide the following reporting features:

1. multiple report export options;
2. report customization by fund-account, portfolio manager, security, etc.; and
3. account details available for vote auditing.

- **Form N-PX Preparation and Filing:**

The Adviser will be responsible for oversight and completion of the filing of the Fund's reports on Form N-PX with the SEC. The proxy voting service will prepare the EDGAR version of Form N-PX and will submit it to the Adviser for review and approval prior to filing with the SEC. The proxy voting service will file Form N-PX for each twelve-month period ending on June 30. The filing must be submitted to the SEC on or before August 31 of each year. The Fund Administration Department, in conjunction with the Legal Department supporting the Fund, is responsible for the foregoing procedures.

The Fund Administration Department in conjunction with the CCO oversees compliance with this policy.

The Fund Administration Department maintains operating procedures affecting the administration and disclosure of the Fund's proxy voting records.

The Fund's Chief Legal Counsel is responsible for including in the Fund's SAI information regarding the Adviser's and the Sub-advisers proxy voting policies as required by applicable rules and form requirements.

**JOHN HANCOCK INVESTMENT MANAGEMENT LLC**  
**PROXY VOTING POLICIES AND PROCEDURES**  
**December 1, 2019**

**Overview**

The SEC adopted Rule 206(4)-6 under the Advisers Act, which requires investment advisers with voting authority to adopt and implement written policies and procedures that are reasonably designed to ensure that the investment adviser votes client securities in the best interest of clients. The procedures must include how the investment adviser addresses material conflicts that may arise between the interests of the investment adviser and those of its clients. The Advisers are registered investment advisers under the Advisers Act and serve as the investment advisers to the Funds. The Advisers generally retain one or more sub-advisers to manage the assets of the Funds, including voting proxies with respect to a Fund's portfolio securities. From time to time, however, the Advisers may elect to manage directly the assets of a Fund, including voting proxies with respect to such Fund's portfolio securities, or a Fund's Board may otherwise delegate to the Advisers authority to vote such proxies. Rule 206(4)-6 under the Advisers Act requires that a registered investment adviser adopt and implement written policies and procedures reasonably designed to ensure that it votes proxies with respect to a client's securities in the best interest of the client.

Firms are required by Advisers Act Rule 204-2(c)(2) to maintain records of their voting policies and procedures, a copy of each proxy statement that the investment adviser receives regarding client securities, a record of each vote cast by the investment adviser on behalf of a client, a copy of any document created by the investment adviser that was material to making a decision how to vote proxies on behalf of a client, and a copy of each written client request for information on how the adviser voted proxies on behalf of the client, as well as a copy of any written response by the investment adviser to any written or oral client request for information on how the adviser voted that client's proxies.

Investment companies must disclose information about the policies and procedures used to vote proxies on the investment company's portfolio securities and must file the fund's proxy voting record with the SEC annually on Form N-PX.

Pursuant thereto, the Advisers have adopted and implemented these proxy voting policies and procedures (the "Proxy Procedures").

**Policy**

It is the Advisers' policy to comply with Rule 206(4)-6 and Rule 204-2(c)(2) under the Advisers Act as described above. In general, the Advisers delegate proxy voting decisions to the sub-advisers managing the funds. If an instance occurs where a conflict of interest arises between the shareholders and a particular sub-adviser, however, the Adviser retains the right to influence and/or direct the conflicting proxy voting decisions.

**Regulatory Requirement**

Rule 206(4)-6 under the Advisers Act

**Reporting**

Form N-PX

Advisers will provide the Board with notice and a copy of any amendments or revisions to the Procedures and will report quarterly to the Board all material changes to these Proxy Procedures.

The CCO's annual written compliance report to the Board will contain a summary of material changes to the Proxy Procedures during the period covered by the report.

If the Advisers or the Designated Person vote any proxies in a manner inconsistent with either these Proxy Procedures or a Fund's proxy voting policies and procedures, the CCO will provide the Board with a report detailing such exceptions.

## Procedure

### **Fiduciary Duty**

The Advisers have a fiduciary duty to vote proxies on behalf of a Fund in the best interest of the Fund and its shareholders.

### **Voting of Proxies - Advisers**

The Advisers will vote proxies with respect to a Fund's portfolio securities when authorized to do so by the Fund and subject to the Fund's proxy voting policies and procedures and any further direction or delegation of authority by the Fund's Board. The decision on how to vote a proxy will be made by the person(s) to whom the Advisers have from time to time delegated such responsibility (the "Designated Person"). The Designated Person may include the Fund's portfolio manager(s) or a Proxy Voting Committee, as described below.

When voting proxies with respect to a Fund's portfolio securities, the following standards will apply:

- The Designated Person will vote based on what it believes is in the best interest of the Fund and its shareholders and in accordance with the Fund's investment guidelines.
- Each voting decision will be made independently. To assist with the analysis of voting issues and/or to carry out the actual voting process the Designated Person may enlist the services of (1) reputable professionals (who may include persons employed by or otherwise associated with the Advisers or any of its affiliated persons) or (2) independent proxy evaluation services such as Institutional Shareholder Services. However, the ultimate decision as to how to vote a proxy will remain the responsibility of the Designated Person.
- The Advisers believe that a good management team of a company will generally act in the best interests of the company. Therefore, the Designated Person will take into consideration as a key factor in voting proxies with respect to securities of a company that are held by the Fund the quality of the company's management. In general, the Designated Person will vote as recommended by company management except in situations where the Designated Person believes such recommended vote is not in the best interests of the Fund and its shareholders.
- As a general principle, voting with respect to the same portfolio securities held by more than one Fund should be consistent among those Funds having substantially the same investment mandates.
- The Advisers will provide the Fund, from time to time in accordance with the Fund's proxy voting policies and procedures and any applicable laws and regulations, a record of the Advisers' voting of proxies with respect to the Fund's portfolio securities.

### **Material Conflicts of Interest**

In carrying out its proxy voting responsibilities, the Advisers will monitor and resolve potential material conflicts ("Material Conflicts") between the interests of (a) a Fund and (b) the Advisers or any of its affiliated persons. Affiliates of the Advisers include Manulife Financial Corporation and its subsidiaries. Material Conflicts may arise, for example, if a proxy vote relates to matters involving any of these companies or other issuers in which the Advisers or any of their affiliates has a substantial equity or other interest.

If the Advisers or a Designated Person become aware that a proxy voting issue may present a potential Material Conflict, the issue will be referred to the Advisers' Legal Department and/or the Office of the CCO. If the Legal Department and/or the Office of the CCO, as applicable determines that a potential Material Conflict does exist, a Proxy Voting Committee will be appointed to consider and resolve the issue. The Proxy Voting Committee may make any determination that it considers reasonable and may, if it chooses, request the advice of an independent, third-party proxy service on how to vote the proxy.

### **Voting Proxies of Underlying Funds of a Fund of Funds**

The Advisers or the Designated Person will vote proxies with respect to the shares of a Fund that are held by another

Fund that operates as a Fund of Funds”) in the manner provided in the proxy voting policies and procedures of the Fund of Funds (including such policies and procedures relating to material conflicts of interest) or as otherwise directed by the board of trustees or directors of the Fund of Funds.

**Proxy Voting Committee(s)**

The Advisers will from time to time, and on such temporary or longer-term basis as they deem appropriate, establish one or more Proxy Voting Committees. A Proxy Voting Committee shall include the Advisers’ CCO and may include legal counsel. The terms of reference and the procedures under which a Proxy Voting Committee will operate will be reviewed from time to time by the Legal and Compliance Department. Records of the deliberations and proxy voting recommendations of a Proxy Voting Committee will be maintained in accordance with applicable law, if any, and these Proxy Procedures. Requested shareholder proposals or other Shareholder Advocacy must be submitted for consideration pursuant to the Shareholder Advocacy Policy and Procedures.

**Voting of Proxies - SubAdvisers**

In the case of proxies voted by a sub-adviser to a Fund pursuant to the Fund’s proxy voting procedures, the Advisers will request the sub-adviser to certify to the Advisers that the sub-adviser has voted the Fund’s proxies as required by the Fund’s proxy voting policies and procedures and that such proxy votes were executed in a manner consistent with these Proxy Procedures and to provide the Advisers with a report detailing any instances where the sub-adviser voted any proxies in a manner inconsistent with the Fund’s proxy voting policies and procedures. The COO of the Advisers will then report to the Board on a quarterly basis regarding the sub-adviser certification and report to the Board any instance where the sub-adviser voted any proxies in a manner inconsistent with the Fund’s proxy voting policies and procedures.

The Fund Administration Department maintains procedures affecting all administration functions for the mutual funds. These procedures detail the disclosure and administration of the Trust’s proxy voting records.

The Trust’s Chief Legal Counsel is responsible for including, in the SAI of each Trust, information about the proxy voting of the Advisers and each sub-adviser.

**Reporting to Fund Boards**

The CCO of the Advisers will provide the Board with a copy of these Proxy Procedures, accompanied by a certification that represents that the Proxy Procedures have been adopted by the Advisers in conformance with Rule 206(4)-6 under the Advisers Act. Thereafter, the Advisers will provide the Board with notice and a copy of any amendments or revisions to the Procedures and will report quarterly to the Board all material changes to these Proxy Procedures.

The CCO’s annual written compliance report to the Board will contain a summary of material changes to the Proxy Procedures during the period covered by the report.

If the Advisers or the Designated Person vote any proxies in a manner inconsistent with either these Proxy Procedures or a Fund’s proxy voting policies and procedures, the CCO will provide the Board with a report detailing such exceptions

<b>Document Retention Requirements</b>
The Advisers will retain (or arrange for the retention by a third party of) such records relating to proxy voting

pursuant to these Proxy Procedures as may be required from time to time by applicable law and regulations, including the following:

1. These Proxy Procedures and all amendments hereto;
2. All proxy statements received regarding Fund portfolio securities;
3. Records of all votes cast on behalf of a Fund;
4. Records of all Fund requests for proxy voting information;
5. Any documents prepared by the Designated Person or a Proxy Voting Committee that were material to or memorialized the basis for a voting decision;
6. All records relating to communications with the Funds regarding Conflicts; and
7. All minutes of meetings of Proxy Voting Committees.

The Office of the CCO, and/or the Legal Department are responsible for maintaining the documents set forth above as needed and deemed appropriate. Such documents will be maintained in the Office of the CCO, and/or the Legal Department for the period set forth in the Records Retention Schedule.

**MARATHON ASSET MANAGEMENT LP**  
**PROXY VOTING POLICIES AND PROCEDURES**  
**December 2021**

Policy Statement

These procedures apply to all Funds and other Client accounts for which the Adviser is responsible for voting proxies, including all limited partnerships, limited liability companies, Managed Accounts and other accounts for which it acts as investment adviser. From time to time, the Adviser is asked to vote on or otherwise consent to certain actions on behalf of a Client as holder of such investments. It is the Adviser's general policy not to vote proxies for securities that are not held in a Client's account at the time such proxy is received or on the vote date of such proxy. The Adviser will determine whether a proposal is in the best interests of its Clients and may take into account the following factors, among others: (i) whether the proposal was recommended by management and the Adviser's opinion of management; (ii) whether the proposal acts to entrench existing management; and (iii) whether the proposal fairly compensates management for past and future performance.

This policy provides a framework for analysis and decision making, but does not address all potential issues. In voting proxies, the Adviser is guided by general fiduciary principles. The Adviser's goal is to act prudently, solely in the best interest of the beneficial owners of the accounts it manages. The Adviser attempts to consider all aspects of its vote that could affect the value of the investment; and where the Adviser votes proxies, it will do so in the manner that it believes will be consistent with efforts to maximize shareholder values.

Voting of Proxies

Proxy material is promptly reviewed to evaluate the issues presented. Regularly recurring matters are usually voted as recommended by the issuer's board of directors or "management," but there are many circumstances that might cause the Adviser to vote against such proposals. These might include, among others, excessive compensation, unusual management stock options, preferential voting or "poison pills." The Adviser will decide these issues on a case-by-case basis.

The Adviser may determine to abstain from voting a proxy or a specific proxy item when it concludes that the potential benefit of voting is outweighed by the cost, when the Adviser does not receive a solicitation or enough information within a sufficient time prior to the proxy-voting deadline, or when it is not in the Client account's best interest to vote. The Adviser shall cast ballots in a manner it believes to be consistent with the interests of the Fund or Client account and shall not subordinate Client interests to its own. When a Client has authorized the Adviser to vote proxies on its behalf, the Adviser will generally not accept instructions from the Client regarding how to vote proxies. If the Adviser exercises voting authority with respect to Client securities, the Adviser is required to adopt and implement written policies and procedures that are reasonably designed to ensure that the Adviser votes Client securities in a manner consistent with the best interests of such Client. (Rule 206(4)-6).

In certain situations, a Client's investment strategy can impact voting determinations. For example, the Adviser may consider social issues when voting proxies for socially screened accounts and consider environmental issues when voting proxies for sustainability screened portfolios and accounts. The Adviser may also take social or environmental issues into account when voting proxies for portfolios and accounts that do not have social or sustainability screens if the Adviser believes that doing so is in the best interest of the relevant Client(s) and otherwise consistent with the Client's best interest, applicable laws, and the Advisers' duties, such as where material environmental or social risks may have economic ramifications for shareholders.

Proxy Advisory Firms

The Adviser does not currently rely on proxy advisory firms when voting proxies. To the extent that the Adviser engages one or more proxy advisory firms in the future, it will implement policies regarding the engagement and review of such firms, including with respect to the identification and mitigation of conflicts.

## Conflicts of Interest

In furtherance of the Adviser's goal to vote proxies in the best interests of Clients, the Adviser follows procedures designed to identify and address material conflicts that may arise between the Adviser's interests and those of its Clients before voting proxies on behalf of such Clients.

### *Procedures for Identifying Conflicts of Interest.*

The Adviser relies on the following to seek to identify conflicts of interest with respect to proxy voting:

- The Adviser shall monitor the potential for conflicts of interest on the part of the Adviser with respect to voting proxies on behalf of Client accounts as a result of personal relationships, significant Client relationships (those accounting for greater than 5% of annual revenues) or special circumstances that may arise during the conduct of the Adviser's business.
- If the Adviser has a conflict of interest in voting proxies on behalf of Client accounts in respect of a specific issuer, the Compliance Officer or her designee shall maintain an up to date list of such issuers. The Adviser shall not vote proxies relating to issuers on such list on behalf of Client accounts until it has been determined that the conflict of interest is not material or a method for resolving such conflict of interest has been agreed upon and implemented, as described below.

### *Procedures for Assessing Materiality of Conflicts of Interest and for Addressing Material Conflicts of Interest.*

The Compliance Officer or her designee will determine whether a conflict of interest is material. A conflict of interest will be considered material to the extent that it is determined that such conflict has the potential to influence the Adviser's decision-making in voting the proxy. A conflict of interest shall be deemed material in the event that the issuer that is the subject of the proxy or any

executive officer of that issuer has a Client relationship with the Adviser of the type described above. All other materiality determinations will be based on an assessment of the particular facts and circumstances. The Compliance Officer or her designee shall maintain a written record of all materiality determinations.

If it is determined that a conflict of interest is not material, the Adviser may vote proxies notwithstanding the existence of the conflict.

If it is determined that a conflict of interest is material, one or more methods may be used to resolve the conflict, including:

- disclosing the conflict to the Client and obtaining its consent before voting;
- suggesting to the Client that it engage another party to vote the proxy on its behalf;
- engaging a third party to recommend a vote with respect to the proxy based on application of the policies set forth herein; or
- such other method as is deemed appropriate under the circumstances, given the nature of the conflict.

The Adviser shall maintain a written record of the method used to resolve a material conflict of interest.

## Recordkeeping

The Adviser shall maintain the following records relating to proxy voting:

- a copy of these policies and procedures;
- a copy of each proxy form (as voted);

- a copy of each proxy solicitation (including proxy statements) and related materials with regard to each vote;
- documentation relating to the identification and resolution of conflicts of interest;
- any documents created by the Adviser that were material to a proxy voting decision or that memorialized the basis for that decision; and
- a copy of each written Client request for information on how the Adviser voted proxies on behalf of the Client, and a copy of any written response by the Adviser to any (written or oral) Client request for information on how the Adviser voted proxies on behalf of the requesting Client.

Such records shall be maintained and preserved in an easily accessible place for a period of not less than five years from the end of the fiscal year during which the last entry was made on such record, the first two years in the Adviser's office.

In lieu of keeping copies of proxy statements, the Adviser may rely on proxy statements filed on the EDGAR system as well as on third party records of proxy statements and votes cast if the third party provides an undertaking to provide the documents promptly upon request.

The Compliance Officer or her designee shall review this policy on an annual basis and revise it as necessary.
