

Who is *affected* by the sequence of returns?

It's important to understand how returns and withdrawals may affect your portfolio.

The sequence of returns may have less of an impact on the portfolio of someone who is still working and accumulating assets for retirement; however, during retirement, the relationship between an individual's rate of withdrawal and the sequence of returns can have a dramatic impact on a portfolio's overall ability to last. It is, therefore, very important to understand how it may affect your future lifestyle, and plan accordingly.

Accumulation phase

- Average annualized returns
- Asset allocation
- Staying in the market

Age 65

Distribution phase

- Sequence of returns
- Product allocation
- Portfolio protection

Annual income: **None**
Starting value for Portfolio B = **\$100,000**

NO DIFFERENCE

BIG DIFFERENCE

Total income generated by portfolio during retirement = **\$839,547**

Source: Standard & Poor's. The sequence of returns has an average compounded annualized return of 8% over 25 years and year-to-year volatility that is consistent with a portfolio predominantly comprising stocks. Annual returns have been rounded to the nearest whole number. The accumulation portfolios assume a starting value of \$100,000 at age 40 and no annual withdrawals. The distribution portfolios assume a starting value of either \$100,000 or \$735,302 at age 65 as well as a 5% first-year withdrawal thereafter adjusted for 3% inflation annually. Except where noted, the average annualized return for the 25-year period is 8%.

All charts are hypothetical and for illustrative purposes only and are not intended to predict or project portfolio results. Charges may apply to amounts taken in excess of the withdrawal amount available without a withdrawal charge during the surrender charge period. All withdrawals reduce the death benefit, optional benefits, and contract value. Withdrawals will come first from any gain in the contract. In addition, withdrawals of taxable amounts will be subject to ordinary income tax and, if made prior to age 59½, a 10% IRS penalty tax may apply.
