Use for	Unconstrained global holding	Class I without sales charge	-4.40	-4.40	-8.41	1.76	—	—	-0.06	7/21/21
Morningstar category	Global Large Stock Growth	Class A without sales charge	-4.43	-4.43	-8.55	1.51	—	—	-0.28	7/21/21
Strategy		Class A with sales charge								
An environmental thematic approach	Seeks to invest in companies providing solutions or technologies designed to address pressing environmental challenges	(Maximum initial sales charge 5.00%)	-9.20	-9.20	-13.12	-0.22	—	—	-1.67	7/21/21
Dedicated expertise	The single-theme approach is supported by a team of analysts as well as input from academics and industry experts	MSCI ACWI	-1.32	-1.32	7.15	6.91	—	—	5.79	—
Focused exposure	Benchmark-agnostic investment approach focused on highest-conviction global equities	Global large stock growth category	-3.14	-3.14	2.36	4.22	—	—	—	—
Managed by		Expense ratios²	Gross		Net (what you pay)			Contractual through		
		Class I	1.35%		0.96%			2/28/2026		
		Class A	1.60%		1.21%			2/28/2026		

The performance data shown represents past performance, which does not guarantee future results. Returns for periods shorter than one year are cumulative, and results for other share classes will vary. Shares will fluctuate in value and, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance cited. Performance figures assume that all distributions are reinvested. For the most recent month-end performance, visit jhinvestments.com.

Calendar year returns ³		%			
Class I without sales charge		2021	2022	2023	2024
Global Environmental Opportunities Fund		10.90	-23.71	19.30	3.41
MSCI All Country World Index		6.47	-18.36	22.20	17.49
Global large stock growth category		0.00	-28.22	23.97	15.19

Growth of a hypothetical \$10,000 investment

Class I without sales charge – 8/1/21 – 3/31/25

This chart illustrates the growth of a hypothetical \$10,000 investment based on net asset value beginning on the date noted with all distributions reinvested. Performance data shown excludes fees and expenses. The performance data would be lower if such fees and expenses were included. Past performance does not guarantee future results. Returns for periods shorter than one year are cumulative.

1 It is not possible to invest in an index. Index definitions can be found within the "What you should know before Investing" section on the last page of this fact sheet. **2** "Net (what you pay)" represents the effect of a contractual fee waiver and/or expense reimbursement and is subject to change. **3** Returns for the fund's first year are since fund inception.

Allocation by theme⁴

Theme	%	Theme	%
Industrial Efficiency	17.99	Sustainable & Organic Food	6.64
Software	16.50	Environmental Monitoring	6.45
Building Efficiency	14.37	Components	6.19
Pollution Control	11.64	Other themes	5.61
Waste Management	10.72	Utilities & concessions	3.89

Sector composition⁴

Sector	%	Sector	%
Industrials	47.26	Health Care	6.44
Information Technology	27.79	Utilities	5.77
Materials	8.48	Real Estate	4.26

What you should know before investing

Thematic investing involves the risk that long-term market themes are incorrectly identified or that the securities chosen to represent those themes underperform. The fund's ESG policy could cause it to perform differently than, including underperforming, similar funds that do not have such a policy. Environmental focused investing involves the risk that a fund's environmental criteria may limit the available investments compared with funds with no such criteria. Under certain economic conditions, this could cause the fund to underperform funds that invest in a broader array of investments.

Foreign investing, especially in emerging markets, has additional risks, such as currency and market volatility and political and social instability, and illiquid securities may be difficult to sell at a price approximating their value. The stock prices of midsize and small companies can change more frequently and dramatically than those of large companies, and illiquid securities may be more difficult to sell at a price approximating their value. Liquidity—the extent to which a security may be sold or a derivative position closed without negatively affecting its market value, if at all—may be impaired by reduced trading volume, heightened volatility, rising interest rates, and other market conditions. Please see the fund's prospectus for additional risks.

The MSCI All Country World Index (ACWI) tracks the performance of publicly traded large- and mid-cap stocks of companies in 23 developed markets and 23 emerging markets. It is not possible to invest directly in an index.

Request a prospectus or summary prospectus from your financial professional, by visiting jhinvestments.com, or by calling us at 800-225-5291. The prospectus includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.

Fund	19.87
Benchmark	16.06
Upside capture ratio ⁹ (%)	103.11
Downside capture ratio ⁹ (%)	125.89

Based on Class I shares for the three-year period.

10 largest holdings¹⁰

Rank	Company	%
1.	Waste Connections, Inc.	3.54
2.	Republic Services, Inc.	3.51
3.	Synopsys, Inc.	3.43
4.	WSP Global, Inc.	3.37
5.	Waste Management, Inc.	3.25
6.	Thermo Fisher Scientific, Inc.	3.20
7.	Cadence Design Systems, Inc.	3.05
8.	Agilent Technologies, Inc.	3.00
9.	Carrier Global Corp.	2.80
10.	AECOM	2.71

4 Holdings, sector weightings, market capitalization and portfolio characteristics are subject to change at any time. There is no guarantee the fund will maintain the portfolio characteristics, or the future profitability of the securities identified and set forth herein. **5** Beta measures the sensitivity of a security or portfolio to its benchmark. The beta of the market (as represented by the benchmark) is 1.00. Accordingly, a security or portfolio with a 1.10 beta is expected to have 10% more volatility than the market. **6** R-squared is a measurement that indicates how closely a security or portfolio's performance correlates with the performance of its benchmark index. R-squared can range from 0.00 to 1.00, with 1.00 indicating perfect correlation to the index. **7** Sharpe ratio is a measure of excess return per unit of risk, as defined by standard deviation. A higher Sharpe ratio suggests better risk-adjusted performance. **8** Standard deviation is a statistical measure of the historic volatility of a portfolio. It measures the fluctuation of a security or portfolio's periodic returns from the mean or average. The larger the deviation, the larger the standard deviation and the higher the risk. **9** Upside capture ratio measures a manager's performance in up markets relative to the market itself. Downside capture ratio measures a manager's performance in down markets relative to the market itself. **10** Listed holdings reflect the largest portions of the fund's total and may change at any time. They are not recommendations to buy or sell any security. Data is expressed as a percentage of net assets and excludes cash and cash equivalents.
