Morningstar ratings^{TM 1}

Foreign Large Growth

| | Overall | 3 year | 5 year | 10 year |
|-----------------|---------|--------|--------|---------|
| Class I | ★★★★ | ★★★★ | — | — |
| Class A | ★★★ | ★★★ | — | — |
| Number of funds | 407 | 407 | 351 | 238 |

Overall rating is based on 3-, 5-, and 10-year Morningstar Risk-Adjusted Returns and accounts for variation in a fund's monthly performance. Other share classes may be rated differently. Hollow stars indicate Morningstar's extended performance rating.

Expense ratios⁴

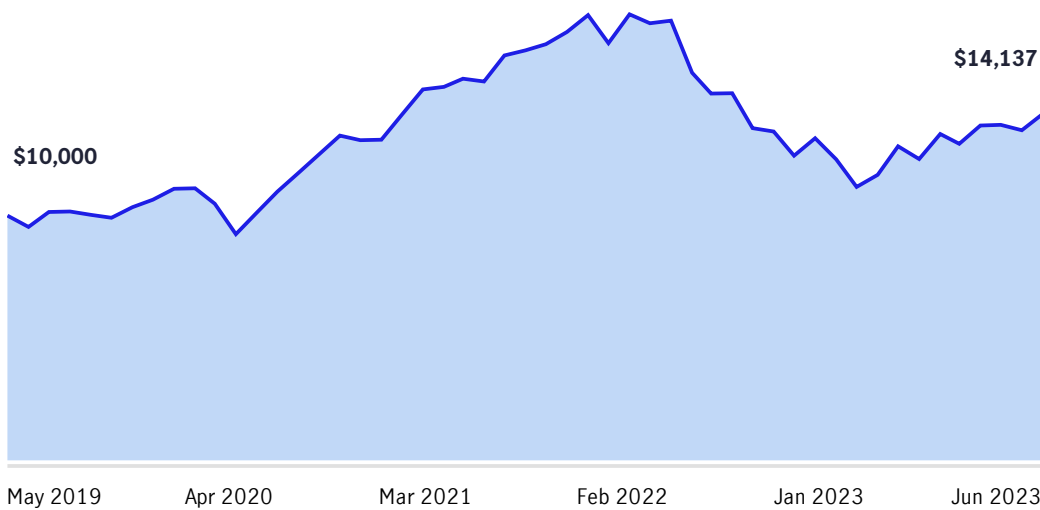

| | Gross | Net (what you pay) | Contractual through |
|---------|-------|--------------------|---------------------|
| Class I | 1.04% | 0.95% | 2/28/2024 |
| Class A | 1.29% | 1.19% | 2/28/2024 |

The past performance shown here reflects reinvested distributions and the beneficial effect of any expense reductions, and does not guarantee future results. The sales charge for Class A shares, reflects the maximum sales charge of 5.0%. For Class I shares, there is no sales charge. Returns for periods shorter than one year are cumulative, and results for other share classes will vary. Shares will fluctuate in value and, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance cited. 1 For each managed product, including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts, with at least a 3-year history, Morningstar calculates a Morningstar RatingTM based on a Morningstar Risk-Adjusted Return that accounts for variation in a fund's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. Exchange-traded funds and open-end mutual funds are considered a single population for comparative purposes. The top 10.0% of funds in each category, the next 22.5%, 35.0%, 22.5%, and bottom 10.0% receive 5, 4, 3, 2, or 1 star(s), respectively. The overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. The rating formula most heavily weights the 3-year rating, using the following calculation: 100% 3-year rating for 36 to 59 months of total returns, 60% 5-year rating/40% 3-year rating for 60 to 119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. Star ratings do not reflect the effect of any applicable sales load. **Morningstar's extended performance rating** is calculated by adjusting the historical total returns of the oldest share class to reflect the fee structure of a younger share class, and then compounding the combined record of actual and adjusted performance into the 3-, 5-, and 10-year time periods necessary to produce Morningstar Risk-Adjusted Returns and a Morningstar Rating. Extended performance ratings do not affect actual Morningstar ratings; the overall ratings for multi-share class funds are based on actual performance only or extended performance only. Once a share class turns 3 years old, the overall Morningstar Rating will be based on actual ratings only. Adjusted historical performance is only an approximation of actual returns, and Morningstar's calculation methodology may differ from those used by other entities. Past performance does not guarantee future results. **2** Class A, Class C, Class I, and Class R6 shares were first offered on 5/3/19. Returns prior to this date are those of Class NAV shares (first offered on 4/17/19) that have not been adjusted for class-specific expenses; otherwise, returns would vary. **3** The MSCI All Country (AC) World ex-USA Growth Index tracks the performance of publicly traded large- and mid-cap stocks with higher forecasted growth rates in 22 developed markets and 24 emerging markets. It is not possible to invest directly in an index. **4** "Net (what you pay)" represents the effect of a contractual fee waiver and/or expense reimbursement and is subject to change.

What you should know before investing

Foreign investing, especially in emerging markets, has additional risks, such as currency and market volatility and political and social instability. Growth stocks may be more susceptible to earnings disappointments. Stock prices can be volatile and are affected by both general economic conditions and the financial prospects of individual companies. Large company stocks could fall out of favor, and the stock prices of small and midsize companies may be more volatile and less liquid than those of large companies. Please see the fund's prospectus for additional risk.
