Class A		1	1 11%			1 06%		12/31/2025

The performance data shown represents past performance, which does not guarantee future results. Returns for periods shorter than one year are cumulative, and results for other share classes will vary. Shares will fluctuate in value and, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance cited. Performance figures assume that all distributions are reinvested. For the most recent month-end performance, visit jhinvestments.com.

Growth of a hypothetical \$10,000 investment

Class I without sales charge - 6/1/06 - 6/30/25

\$24.844

This chart illustrates the growth of a hypothetical \$10,000 investment based on net asset value beginning on the date noted with all distributions reinvested. Performance data shown excludes fees and expenses. The performance data would be lower if such fees and expenses were included. Past performance does not guarantee future results. Returns for periods shorter than one year are cumulative.

What you should know before investing

Obligations

Fixed-income investments are subject to interest-rate and credit risk; their value will normally decline as interest rates rise or if an issuer is unable or unwilling to make principal or interest payments. Investments in higher-yielding, lower-rated securities include a higher risk of default. Foreign investing, especially in emerging markets, has additional risks, such as currency and market volatility and political and social instability. Currency transactions are affected by fluctuations in exchange rates. Liquidity—the extent to which a security may be sold or a derivative position closed without negatively affecting its market value, if at all—may be impaired by reduced trading volume, heightened volatility, rising interest rates, and other market conditions. The use of hedging and derivatives could produce disproportionate gains or losses and may increase costs. Fund distributions generally depend on income from underlying investments and may vary or cease altogether in the future. Please see the fund's prospectus for additional risks.

11.54

The Bloomberg U.S. Aggregate Bond Index tracks the performance of U.S. investment-grade bonds in government, asset-backed, and corporate debt markets. It is not possible to invest directly in an index.

Request a prospectus or summary prospectus from your financial professional, by visiting jhinvestments.com, or by calling us at 800-225-5291. The prospectus includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.

Effective duration ⁷ (yrs)	4.27
30-Day SEC yield ^{8,9} (%)	
Subsidized	4.85%
Unsubsidized	4.80%

Based on Class I shares for the five-year period.

Asset mix ⁴	%
Corporate Bonds	46.40
Foreign Government Obligations	19.69
Term Loans	9.50
U.S. Government Agency	7.36
Collateralized Mortgage Obligations	6.15
U.S. Government	4.17
Preferred Securities	2.50
Convertible Bonds	1.65
Asset Backed	1.58
Other	0.98

4 The asset mix excludes any negative exposures that may result from the use of futures or forward contracts. 5 The portfolio turnover is as of the fund's fiscal year end and is subject to change. The fund's annual report includes further details regarding the portfolio turnover ratio. 6 Upside capture ratio measures a manager's performance in up markets relative to the market itself. Downside capture ratio measures a manager's performance in down markets relative to the market itself. The fifective duration measures the security or portfolio's sensitivity to changes in interest rates. A longer duration will cause fluctuation when interest rates change. 8 Unsubsidized yields reflect what the yield would have been without the effect of reimbursements and waivers. 9 The SEC Yield is a standardized annual yield based on the most recent 30-day period that is calculated in accordance with the prescribed SEC formula. The SEC Yield is subject to change and may be negative when a fund's expenses exceed its income. The SEC Yield may not equal the fund's actual income distribution rate and therefore, a per share distribution may still be paid to shareholders when the SEC Yield is negative. 10 Ratings are from Moody's, if available, and from Standard & Poor's or Fitch, respectively, if not. Securities in the Not rated category have not been rated by a rating agency; however, the subadvisor performs its own credit analysis for many of these securities and assigns comparable ratings that are used for compliance with applicable investment policies. Prior to June 30, 2021, internal ratings provided by the subadvisor were included. Ratings composition will change. Individual bonds are rated by the creditworthiness of their issuers; these ratings do not apply to the fund or its shares. U.S. government and agency obligations are backed by the full faith and credit of the U.S. government. All other bonds are rated on a scale from AAA (extremely strong financial security characteristics) down to CCC and below (having a very high d
