Management's Discussion of Fund Performance

SUMMARY OF RESULTS

Municipal Opportunities Fund (Class A/TAMBX) returned 6.38% (excluding sales charges) for the year ended May 31, 2026. The most significant factors affecting fund performance during the period included elevated and ultimately easing municipal bond yields, record levels of new municipal bond supply, strong investor demand in the municipal market, three short-term interest rate cuts by the U.S. Federal Reserve, and escalating conflict in the Middle East.

TOP PERFORMANCE CONTRIBUTORS

Duration (interest-rate sensitivity) | Municipal bond prices generally benefited as yields moderated from elevated levels during portions of the period.

Health care municipal bonds | Health care represented the fund's largest sector weighting and outperformed on an absolute basis during the period.

Transportation municipal bonds | The fund benefited from positions in bonds funding airport infrastructure.

TOP PERFORMANCE DETRACTORS

Industrial development revenue bonds | The fund's holdings in this sector declined overall, primarily due to weakness in two holdings—a rail project and a metal recycling plant.

Performance figures assume all distributions have been reinvested and reflect the beneficial effect of any expense reductions. Figures reflect maximum sales charge on Class A shares of 4.00%. Past performance does not guarantee future results. The return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Due to market volatility and other factors, the fund's current performance may be higher or lower than the performance shown and can be found at jhinvestments.com/investments or by calling 800-225-5291. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares. It is not possible to invest directly in an index.
