Class R6		1.6	8%			0.32%		12/31/2026

The performance data shown represents past performance, which does not guarantee future results. Returns for periods shorter than one year are cumulative, and results for other share classes will vary. Shares will fluctuate in value and, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance cited. Performance figures assume that all distributions are reinvested. For the most recent month-end performance, visit jhinvestments.com.

4.	Mid Cap Index Fund (Fidelity)	11.65	9.	Emerging Markets Debt Fund (MIM)	0.53
5.	FTSE Developed Markets ETF (Vanguard)	4.77	10.	High Yield Fund (MIM)	0.40

¹ Comparison against the benchmark and Morningstar category is based on Class R6 shares. 2 It is not possible to invest in an index. Index definitions can be found within the "What you should know before Investing" section on the last page of this fact sheet. 3 "Net (what you pay)" represents the effect of a contractual fee waiver and/or expense reimbursement and is subject to change. 4 The asset mix excludes any negative exposures that may result from the use of futures or forward contracts. 5 Listed holdings reflect the largest portions of the fund's total and may change at any time. They are not recommendations to buy or sell any security. Data is expressed as a percentage of net assets and excludes cash and cash equivalents.

What you should know before investing

The portfolio's performance depends on the advisor's skill in determining asset class allocations, the mix of underlying funds, and the performance of those underlying funds. The portfolio is subject to the same risks as the underlying funds and exchange-traded funds in which it invests: Stocks and bonds can decline due to adverse issuer, market, regulatory, or economic developments; foreign investing, especially in emerging markets, has additional risks, such as currency and market volatility and political and social instability; the securities of small companies are subject to higher volatility than those of larger, more established companies; and high-yield bonds are subject to additional risks, such as increased risk of default. Each portfolio's name refers to the approximate retirement year of the investors for whom the portfolio's asset allocation strategy is designed. The portfolios with dates further off initially allocate more aggressively to stock funds. As a portfolio approaches and passes its target date, the allocation will gradually migrate to more conservative, fixed-income funds. The principal value of each portfolio is not guaranteed, and you could lose money at any time, including at, or after, the target date. Liquidity—the extent to which a security may be sold or a derivative position closed without negatively affecting its market value, if at all—may be impaired by reduced trading volume, heightened volatility, rising interest rates, and other market conditions. Hedging and other strategic transactions may increase volatility and result in losses if not successful. Please see the portfolio's prospectus for additional risks.

The S&P Target Date 2065+ Index represents a broadly derived consensus of asset class exposure and glide path for target-date year 2065 or later. The index allocates to equities and fixed income at varying levels according to a predetermined schedule related to the respective target date. Each of the John Hancock Lifetime Indexes is a customized blended index comprising some or all of the following component indices (ordered alphabetically): Bloomberg U.S. Aggregate Bond Index which tracks the performance of U.S. investment grade bonds in government, asset-backed, and corporate debt markets, Bloomberg U.S. Corporate Bond 1-5 Year Index which tracks the performance of the investment-grade, fixed-rate, taxable corporate bond market with maturities between one and five years, Bloomberg U.S. Treasury TIPS 1-5 Year Index which tracks inflation-protected securities issued by the U.S. Treasury with maturities from one to five years, ICE BofA Long U.S. Treasury Principal STRIPS Index which tracks the performance of long maturity Separate Trading of Registered Interest and Principal of Securities (STRIPS) representing the final principal payment of U.S. Treasury bonds, ICE BofA U.S. High Yield Index which tracks the performance of below-investment-grade U.S. dollardenominated corporate bonds publicly issued in the U.S. domestic market and includes issues with a credit rating of BBB or below, JP Morgan Emerging Markets Bond Index Global which is a market-capitalization-weighted index that tracks the performance of U.S. dollar-denominated Brady bonds, Eurobonds, and traded loans issued by sovereign and quasisovereign entities, MSCI Emerging Markets Index which tracks the performance of publicly traded large- and mid-cap emerging-market stocks, MSCI World Energy Index which tracks the performance of publicly traded large- and mid-cap stocks of developed-market energy companies, MSCI World ex USA Index which index tracks the performance of publicly traded large- and mid-cap stocks of developed-market companies, excluding the U.S., MSCI World Metals & Mining Index which tracks the performance of publicly traded large- and mid-cap stocks of developed-market metals and mining companies, Russell 2500 Index which tracks the performance of the 2,500 smallest companies in the Russell 3000 Index, S&P 500 Index which index tracks the performance of 500 of the largest publicly traded companies in the U.S., S&P Global ex-U.S. REIT Index which tracks the performance of the global real estate market, excluding the U.S., S&P Global Infrastructure Index which tracks companies from around the world that represent the listed infrastructure industry while maintaining liquidity and tradability, S&P U.S. REIT Index which tracks the performance of the real estate market in the U.S., and Morningstar LSTA US Leveraged Loan Index which tracks the market-weighted performance of U.S. dollardenominated institutional leveraged loan portfolios. It is not possible to invest in an index. The benchmark shown demonstrates how the fund's performance compares against the returns of similar investments, which may differ from the broad-based securities index shown in the fund's prospectus.
