**What you should know before investing**

As is the case with all exchange-traded closed-end funds, an investment in this fund may trade at a discount or premium to the fund's net asset value (NAV) and is subject to investment and market risks, including the possible loss of principal. Distribution levels are subject to change and may include a substantial return of capital, which is a return of some or all of a shareholder's investment in the fund. Fixed-income investments are subject to interest-rate and credit risk; their value will normally decline as interest rates rise or if a creditor, grantor, or counterparty is unable or unwilling to make principal, interest, or settlement payments. An issuer of securities held by the fund may default, have its credit rating downgraded, or otherwise perform poorly, which may affect fund performance. Investments in higher-yielding, lower-rated securities are subject to a higher risk of default. Liquidity may be impaired by reduced trading volume, heightened volatility, rising interest rates, and other market conditions. The fund's use of leverage may not be successful and creates additional risks, including heightened price and return volatility. Focusing on a particular industry or sector entails unique risks and may increase the fund's volatility. Derivatives transactions, such as hedging and other strategic transactions, may increase a fund's volatility and could produce disproportionate losses, potentially more than the fund's principal investment.

The **Primary Blended Benchmark** comprises 55% ICE Bank of America US All Capital Securities Index (The Intercontinental Exchange (ICE) Bank of America (BoFA) US All Capital Securities Index tracks all fixed- to floating-rate, perpetual callable and capital securities of the ICE BoFA US Corporate Index) and 45% S&P 500 Utilities Index (The S&P 500 Utilities Index is a capitalization-weighted index that consists of companies in the S&P 500 Index that are primarily involved in water, electrical power, and natural gas distribution industries). The **Secondary Blended Benchmark** comprises 55% ICE Bank of America DRD Eligible Preferred Stock Index (The ICE Bank of America Preferred Stock DRD Eligible Index consists of investment-grade fixed-rate U.S. dollar denominated preferred securities and fixed-to-floating-rate securities. The index includes securities having a minimum remaining term of at least one year; Dividend Received Deduction (DRD) eligible preferred stock and senior debt) and 45% S&P 500 Utilities Sector Index. It is not possible to invest in an index.

**3** Closed-end fund shares are not redeemable, but instead are traded in the secondary market and frequently trade at a discount to net asset value. Specialized funds may carry additional risks. **4** The difference between total managed assets and total net assets is due primarily to the fund's use of leverage through borrowings; net assets do not include borrowings. **5** Listed holdings reflect the largest portions of the fund's total and may change at any time. They are not recommendations to buy or sell any security. Data is expressed as a percentage of net assets and excludes cash and cash equivalents. **6** Holdings, sector weightings, market capitalization and portfolio characteristics are subject to change at any time. There is no guarantee the fund will maintain the portfolio characteristics, or the future profitability of the securities identified and set forth herein.
